This comprehensive collection of 38 cases selected from Ivey Publishing helps students understand the complex issues that marketing professionals deal with on a regular basis. The cases were chosen to help students apply conceptual, strategic thinking to issues in marketing management, as well as provide them with more practical operational ideas and methods. Cases were chosen from around the world, from small and large corporations, and include household names such as Twitter, Best Buy, Ruth's Chris, and Kraft Foods. The majority of the cases are very recent (from 2009 or later). Each chapter begins with an introductory review of the topic area prior to the set of cases, and questions are included after each case to help students to think

critically about the material. Cases in Marketing Management is edited by Kenneth E. Clow and Donald Baack, and follows the structure and goals of their textbook Marketing Management: A Customer-Oriented Approach. It can also be used as a stand-alone text, or as a supplement to any other marketing management textbook, for instructors who want to more clearly connect theory and practice to actual cases.

In the recent years there has  
been a dramatic increase in  
research activity and also  
applications of magnesium alloys.  
The driving force is the growing  
demand by the automobile  
industry resulting from the  
pressure to reduce weight and  
hence to reduce the fuel  
consumption. The U.S. car  
industry incorporates the largest  
amount of magnesium at the  
present time. In Europe,  
Volkswagen had a history of  
using magnesium in the VW  
Beetle. Volkswagen, in common  
with other major car producers  
has initiated a major research  
and development programme for  
advanced magnesium materials.  
The main emphasis of this book  
is in the field of general physical  
metallurgy and alloy

development reflecting the need to  
provide a wider range of alloys  
both casting and wrought alloys  
to meet the increasing demands  
of industry. Other topics are  
nevertheless well represented such  
as casting, recycling, joining,  
corrosion, and surface treatment.
