A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

Chilton's General Motors Full Size Trucks Untreed Reads
Praise for the first edition: "A fascinating book [and] a sympathetic look at the man who glued General Motors together and in the process made Flint one of the great

industrial centers of America." ---Detroit Free Press "It is refreshing to report that Billy Durant is one of the best researched books dealing with an automotive giant." ---Antique Automobile "Billy Durant fills in a masterly way the only important void remaining concerning the work of the motorcar pioneers." ---Richard Crabb, author of Birth of a Giant: The Men and Incidents That Gave America the Motorcar What explains Billy Durant's powerful influence on the auto industry during its early days? And why, given Durant's impact, has he been nearly forgotten for decades? In search of answers to these questions, Lawrence Gustin interviewed Durant's widow, who provided a wealth of previously unpublished autobiographical notes, letters, and personal papers. Gustin also interviewed two of Durant's personal secretaries and others who had known and worked with the man who created General Motors. The result is the amazing account of the mastermind behind what would become, as the twentieth century progressed, the world's largest company.

In *Savage Yard*, G. F. Harper employs narrative in a poetic prose that captures the realness of the American experience and explores the bewilderment of the human condition. The work is unvarnished and brutally unromantic but at the same time the writing hints at a romantic sense of hope while each poem lives out the gritty reality of Harper's intense perception of life, often driven by a distinctive dark humor style. Harper's work contemplates unemployment, loneliness, love, war, abandonment, and transformation. The images are crisp

and Harper has composed a world for readers to bring to life with their imagination.

The Complete Book of Corvette University of Michigan Press
Fiery aristocrat, Eden Rose, uprooted from her native Scotland, has tended a foundering marriage and failing ranch at the corner of Crazy Woman Creek and the Powder River for a decade. Best friend, backwoods spitfire Maddie True, has her own woes a few miles away: widowed with a passel of young children, and caretaker to her addled father. Abandoned by her husband during the height of Wyoming Territory's worst drought in history, Eden depends on her inept brother, Aiden, to see her through the coming winter. But when he disappears into the wild Bighorn mountains, she shuns Maddie's fearful cautions, teaming with enigmatic Lakota holy man, Intah, to find her brother before the wicked snow holds them all hostage. "Light of the Northern Dancers is a powerful novel of a woman's journey, thought-provoking and unsettling in its authenticity and unflinching honesty." — Susan Wiggs, NYT Bestselling Romance Author "Half of what happens to us may have reason, the rest is chaos. Robin F. Gainey's second novel, Light of the Northern Dancers, has this brand of existentialism. It's real and it doesn't let go!" — Tom Skerritt, Award Winning Actor, Writer, Director

The Car Book 2008

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Billy Durant

A businessman was attending a company meeting in Chicago when all power fails. Cars and trucks stop, planes fall from the sky, and cell phones fail. Everything that has anything to do with the movement of electrons is useless. Not knowing the cause of the failure or how long it will last, he is forced to make a decision to sit it out in Chicago or try to get home to his wife in Alabama.
