This volume chronicles the maturation of the South Korean auto industry and its native automakers, from the 1997 Asian Crisis to 2019. After examining the context for domestic vehicle production in South Korea, the author presents multiple case studies for all five Korean automakers: General Motors Korea/Daewoo Motors, Kia, Hyundai, Ssangyong and Renault Samsung. This includes coverage of Hyundai-Kia 's foreign plants in North America, Europe, India, China, and Emerging Asia. The book closes by assessing the five-to-ten-year future outlooks for Korean automakers at home and abroad. This important work will prove informative to scholars of business, management, automotive history, international development, Asian studies, and public administration.

Just as pilots and doctors improve by studying crash reports and postmortems, experience designers can improve by learning how customer experience failures cause products to fail in the marketplace. Rather than proselytizing a particular approach to design, *Why We Fail* holistically explores what teams actually built, why the products failed, and how we can learn from the past to avoid failure ourselves.

This book completes my unmanned systems trilogy and provides an update on the capabilities and threat potential of Unmanned Systems since my previous two books, entitled *Unmanned Systems: Savior or Threat* and *The Importance and Vulnerabilities of U.S. Critical Infrastructure to Unmanned Systems and Cyber*. The U.S. Congress and military services claim humans will control artificial intelligence (AI)-enhanced autonomous weapon systems, yet they are severely mistaken. The age of autonomous warfare has already arrived, and its incorporation of AI has begun. Our strategic competitors know that AI will digest volumes of information and make decisions far faster than human beings. They have already been unleashed without a human in the loop to authorize engagements against human beings. Our world is embroiled in a technological revolution with unmanned systems and the meteoric rise of more responsive and innovative AI algorithms. These two entities are not in their infancy, for they have emerged and grown immensely in capability, potential, and threat. There is a fierce, modern-day race among countries to conduct research and development to get improved unmanned systems and AI out to military forces, governments, companies, and the general populace. By combining armed and autonomous unmanned systems with AI, we are leap-frogging humanity past science fiction movies towards real-world militarized, AI-enhanced, autonomous unmanned systems and, quite possibly, Skynet.

*Collision Reconstruction Methodologies - Volume 7B* - The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers

have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

"Chock-full of amusing car-related trivia and miscellany." —Detroit News Did you know that after James Dean's death behind the wheel of his Porsche 550 Spyder, parts of the car were sold off, and said parts then cursed their new owners? (Or did they?) Did you know Bonnie and Clyde stole Ford V-8s almost exclusively as getaway cars because they were the fastest cars of their day—and that Clyde wrote Henry Ford a thank-you note? Did you know that a monkey by the name of Jocko Flocko once won a Grand National race? (NASCAR Hall of Fame driver Tim Flock helped.) Rumors, myths, and fantastic stories have swirled around the automobile for over a century. This fascinating collection compiles funny stories and a trunkful of trivia: What was the first car to break the sound barrier? Who won the first Indy 500? What kind of car was dancer Isadora Duncan in when she was killed? What car performed the most spectacular stunt in the James Bond movie oeuvre? In all of these cases, the answers may not be what

you think. "Entertaining stories of vehicular crime, racing, moviemaking and various mishaps and mayhem." —The New York Times

Written by a practicing emergency physician, The White Coat Investor is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible Escape from student loans within two to five years of residency graduation Purchase the right types and amounts of insurance Decide when to buy a house and how much to spend on it Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor Avoid investments which are designed to be sold, not bought Select advisors who give great service and advice at a fair price Become a millionaire within five to ten years of residency graduation Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes Protect your hard-won assets from professional and personal lawsuits Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money Decide between an employee job and an independent contractor job Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation Take a look at the first pages of the book by clicking on the Look Inside feature Praise For The White Coat Investor "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first place." - Allan S.
