From the *Surveill., Epidem., & End Results (SEER) Prog.* based at the Nat. Cancer Inst. Intended as a coding manual beginning with cases diagnosed from Jan. 1, 2001 rather than a staging guide. Each anatomic site in the Topography Sect. of the *Internat. Class. of Disease for Oncology -- 3rd Ed. (ICD-0-3)* has a corresponding summary staging scheme. Certain specific histologic types also have specific staging schemes. In some cases, sites which previously had separate guides (such as the segments of the colon) have a single staging scheme (colon), whereas some sites which previously had a single guide (e.g., larynx) have separate schemes for each sub-site of the larynx.

The aim of this work, consisting of 9 individual, self-contained booklets, is to describe commercial vehicle technology in a way that is clear, concise and illustrative. Compact and easy to understand, it provides an overview of the technology that goes into modern commercial vehicles. Starting from the customer's fundamental requirements, the characteristics and systems that define the design of the vehicles are presented knowledgeably in a series of articles, each of which can be read and studied on their own. This volume, *The Diesel Engine*, provides an initial overview of the vast topic that is the diesel engine. It offers basic information about the mechanical functioning of the engine. The integration of the engine in the vehicle and major systems such as the cooling system, the fuel system and the exhaust gas treatment system are explained so that readers in training and in a practical setting may gain an understanding of the diesel engine.
