Electronic instrument panel displays systems covers the many technical considerations of instrument panel display systems including brightness, contrast, temperature sensitivity, space requirements, color capabilities and human factors concepts. As part of the Progress in Technology Electronics Series, this book contains 40 technical papers written in the last eleven years on the progress of instrument panel displays and their corresponding electronic systems. Papers are grouped according to display technology and present the most recent advances in that area plus several of historical interest. Electronic Instrument Panel Display Systems is divided into ten sections: vacuum fluorescent displays; fluorescent indicator panels; liquid crystal displays; electroluminescent displays; light emitting diode displays; electroluminescent displays; light emitting diode displays; cathode ray tube displays; head up displays; virtual and holographic displays; reconfigurable displays; and human factors considerations.
