Privacy online fair information practices in the electronic marketplace : a report to Congress CreateSpace This report is part of a series of products from the 1990 Nationwide Personal Transportation Survey (NPTS). The NPTS dataset contains information about the amount and nature of personal travel in the U.S., as related to the demographics of persons and households. This

report highlights the survey results with emphasis on comparing the 1990 data to NPTS data collected in 1969, 1977, and 1983. The report includes topics such as household vehicle availability and use, annual miles per licensed driver, household travel rates, vehicle occupancy, and home-to-work trips. The report also contains a brief look at travel by women and older persons. **Horse Trading in the Age of Cars** Haynes Publishing Models covered: VW Golf, GTI, Jetta and Cabrio

How does your company define creativity? Or does creativity define your company? In this remarkable book, Jerry Hirshberg,

founder and president of Nissan Design International (NDI), distills his experience as leader of the world's hotbed of automotive innovation and reveals his strategy for designing an organization around creativity. In *The Creative Priority* Hirshberg weaves together enlightening real-world anecdotes with the story of NDI's genesis to illustrate eleven interlocking strategies that came to define NDI's creative priority. Richly illustrated with NDI's elegant

designs and sketched, *The Creative Priority* is at once a compelling narrative, a rich store of hands-on experience, and a grab bag of breakthrough insights that can help your business perform its most vital function.

How to Modify Your Nissan and Datsun OHC Engine
Dark Horse Comics

It's hard to imagine the lifetime of talent and skill that goes into the art of an animated cartoon.

"The MLaaTR Sketchbook" from the artists behind "My Life as a Teenage Robot" gives a glimpse into the work of four dozen of the

world's best. "If an animated cartoon is well executed it may give the viewer the impression he is watching a cartoon actor handling individual props and performing on an imaginative set. In reality, of course, the character, props, and set are actually thousands of separate images recreated repeatedly by dozens of different artists across two continents. A key goal of an animation designer is to create an image strong enough to survive its long journey of reinterpretation with its style and personality intact. These pages contain a very small sampling of the images designed by our artists to be

both functional and inspiring. These original pencil sketches reveal the artists' thought processes and exhibit raw personality that can never be completely duplicated." -Alex Kirwan, 'Teenage Robot' art director

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles The light-duty vehicle fleet is expected to undergo substantial

technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection

Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty

Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.
