**Nissan Maxima 1993 thru 2008** John Wiley & Sons

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

**Complete Guide to Used Cars PublicAffairs**  
In what quickly came to be called the Battle of the Bulge, the 291st Engineer Combat Battalion found itself directly in the path of the German spearhead. With heart-stopping suspense, Colonel David Pergrin describes one of the European theater's critical delaying actions as his unit destroyed bridges, planted mines, and defended roadblocks in the face of oncoming tank columns. Here, in gritty detail, is the story of how "those damned Engineers" ruined Hitler's winter offensive, and how the 291st, with a reputation almost as big as its accomplishments, went on to build a 1100-foot pontoon bridge across the Rhine at Remagen in 32 hours-in the face of fierce opposition and near-impossible odds. Pergrin follows the battalion from its formation and training through the campaigns in France, Belgium, and Germany, making us witness the genuine heroics, skill, and spirit that lifted the 291st to the realm of legend.

**Car Leasing Done Right Haynes Manuals N. America, Incorporated**  
Vehicle leasing is one of the most cost-effective ways of solving transportation needs in Canada. Still, it doesn't mean everybody does it right. It took more than 15 years to gather all the information provided in this book. It is a guide that will help anyone to confidently sign and satisfy his/her transportation needs with a lease contract. You will learn to easily understand the numbers. How to sign a contract that gives you peace of mind. How to transfer your lease without affecting your credit. You will learn the right way of leasing a car you can afford without hurting your finances. And many more other tips for your insurance, warranty, saving money and time. This book is divided into three main parts: Vehicle Leasing Basics, Lease Transfer & Takeover, and Car Leasing Statistics in Canada. If you are new to car

leasing (or financing) or just want to get rid of all those doubts you may have regarding a vehicle purchase, Part One: Vehicle Leasing Basics, is a must-read. You will learn to understand all the way down from pricing, kilometers (km), term, agreement and all other factors that define a lease contract. You will come to understand these all in a way that won't make getting your next car a big deal. Simply put, leasing a vehicle will seem like the regular transaction it was always supposed to be. Additionally, you will learn about the coverage products that come along with your car. Those designed to cover the "unexpected" and give you peace of mind. Scratches, dents, and damage will always happen because your vehicle (and others) are on the go. It was designed and expected to receive damage, wear, and depreciation. You just need to be prepared for it! Next, in Part Two: Lease Transfer & Takeover, you will learn the perks of one of the most important components of a lease contract: the opportunity to terminate your contract by giving it away to someone else. You will learn about the process, the benefits, and the costs of doing this. Although we can all estimate how long we might need a car, life will always throw surprises at us and our loved ones: a newborn, a new work vehicle, new routes to a new office, downsizing, or any other major life change. After operating the LeaseCosts™ Lease Takeover Marketplace for years, I've learned so many things that would love to share with you here, from both the buyer and the seller perspective. And Part Three: Car Leasing Statistics in Canada, will give you a lot of new insights on how we Canadians consume our vehicles. You will also get a look into a deep 15-year study that involves over 23,000 vehicle leasing contracts cross-country that will help you understand things like: - How much Canadians pay per month on average on a car lease. - The average for each specific car make. - The most popular leasing terms by manufacturer. - The average down payment for Volkswagen, Audi, KIA, etc. and how many people make a down payment. - How many people actually take the Wear & Tear coverage [LA1] [JD2] and how it can impact on future unexpected events. - The kind of average payment you should expect for high-end vehicles compared to mass-market ones. - How much you should offer as an incentive if you need to transfer your lease. After finishing all three parts, you will walk away with a solid understanding of how car leasing works in Canada – and I guarantee that you will feel prepared and confident when considering and signing your new car lease.

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Every company has a personality. Does yours help or hinder your results? Does it make you fit for growth? Find out by taking the quiz that 's helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual 's personality, so too can you understand a company 's type—what makes it tick, what 's good and bad about it. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what 's good and fix what 's wrong. You 'll feel the shock of recognition ( " That 's me, that 's my company " ) as you find out whether your organization is:

- **Passive-Aggressive** ( " everyone agrees, smiles, and nods, but nothing changes " ): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall
- **Fits-and-Starts** ( " let 1,000 flowers bloom " ): filled with smart people pulling in different directions
- **Outgrown** ( " the good old days meet a brave new world " ): reacts slowly to market developments, since it 's too hard to run new ideas up the flagpole
- **Overmanaged** ( " we 're from corporate and we 're here to help " ): more reporting than working, as managers check on their subordinates ' work so they can in turn report to their

bosses

- **Just-in-Time** ( " succeeding, but by the skin of our teeth " ): can turn on a dime and create real breakthroughs but also tends to burn out its best and brightest
- **Military Precision** ( " flying in formation " ): executes brilliant strategies but usually does not deal well with events not in the playbook
- **Resilient** ( " as good as it gets " ): flexible, forward-looking, and fun; bounces back when it hits a bump in the road and never, ever rests on its laurels

For anyone who 's ever said, " Wow, that 's a great idea, but it 'll never happen here " or " Whew, we pulled it off again, but I 'm tired of all this sprinting, " Results provides robust, practical ideas for becoming and remaining a resilient business.
