the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development

and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in

'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

Now an Apple TV+ limited series, Wanted: The

Escape of Carlos Ghosn

The unprecedented rise and catastrophic fall of one of the world's most feared and admired business executives—Carlos Ghosn—a remarkable story of innovation, hubris, alleged crimes, and daring international escape, as chronicled by two Wall Street Journal reporters.

Carlos Ghosn always wanted more. Born in the Amazon, raised by a well-off—if scandalized—family in Beirut, and educated in Paris, Ghosn rose to prominence at Michelin in the United States, Renault in France, and Nissan in Japan. Along the way he earned monikers of Le Cost

---

Killer, for his incisive business savvy, and Mr. 7-Eleven, for the hours he devoted to his work. Initially Ghosn thrived, becoming a poster boy for globalization and multinational corporations. Employees believed him to be among the greatest business minds of his generation, and the press hailed him a financial genius. The trouble started when Ghosn began to believe them. His power rose in tandem with an increasing certainty that he was underpaid and undervalued at his multiple posts. Executives grew unhappy with Ghosn's talk of a merger with Renault, calling his loyalty to Nissan into question. Resentments brewed, enough so that a group of Nissan executives set out to uncover the truth about the man who many throughout Nissan and Japan perceived as a

savior. Eventually, Ghosn was accused of financial misconduct and arrested for a bevy of alleged crimes—all of which he vehemently denied. Yet even as he insisted his financial transactions were above board, Ghosn was planning an astounding escape, one that would either smuggle him out of Tokyo and back to his ancestral homeland of Lebanon; or land him in a Japanese prison for life. Drawing from intensive investigative reporting, and including never-before-seen insider details from key players in Ghosn's life and the investigations into him, Nick Kostov and Sean McLain piece together this fallen icon's life and actions across the globe. Their sensational globetrotting adventure reveals the complexity of a man who watched for decades as contemporaries with far less

talent amassed far greater wealth, and who took drastic measures to ensure he would finally get his due.

Medium- and heavy-duty trucks, motor coaches, and transit buses - collectively, "medium- and heavy-duty vehicles", or MHDVs - are used in every sector of the economy. The fuel consumption and greenhouse gas emissions of MHDVs have become a focus of legislative and regulatory action in the past few years. Reducing the Fuel Consumption and Greenhouse Gas Emissions of Medium- and Heavy-Duty Vehicles, Phase Two is a follow-on to the National Research Council's 2010 report, Technologies and Approaches to Reducing the Fuel Consumption of Medium-and Heavy-Duty

Vehicles. That report provided a series of findings and recommendations on the development of regulations for reducing fuel consumption of MHDVs. This report comprises the first periodic, five-year follow-on to the 2010 report. Reducing the Fuel Consumption and Greenhouse Gas Emissions of Medium- and Heavy-Duty Vehicles, Phase Two reviews NHTSA fuel consumption regulations and considers the technological, market and regulatory factors that may be of relevance to a revised and updated regulatory regime taking effect for model years 2019-2022. The report analyzes and provides options for improvements to the certification and compliance procedures for medium- and heavy-duty vehicles; reviews an updated analysis

---

of the makeup and characterization of the medium- and heavy-duty truck fleet; examines the barriers to and the potential applications of natural gas in class 2b through class 8 vehicles; and addresses uncertainties and performs sensitivity analyses for the fuel consumption and cost/benefit estimates.
