The American Revolution presented a series of unique tactical challenges to its competing factions. For Britain, the Army would be forced to re-learn many of the lessons from the Seven Years' War. After the debacle of Concord and Bunker Hill, the British implemented a range of changes throughout the Army, including the modification of accepted tactical doctrine. Additionally, the British formed alliances with various independent German states. The soldiers they provided thus answered to different armies. How much their tactics adapted during the war, therefore varied from state to state. The Continental Army was founded in 1775 and was initially heavily styled on its British opponents. That began to change in 1778 thanks to the efforts of Prussian officer Baron Friedrich Wilhelm von Steuben. Following their formal alliance with the

colonies in 1778, France deployed military assets to North America. French officers also provided tactical advice to the Continental Army, and vice versa, particularly when they worked together successfully during the siege of Yorktown in 1781. Featuring specially commissioned artwork, this absorbing study investigates the various participants' battlefield tactics, casting light on how tactical theory and battlefield experience shaped the conduct of battle in the American Revolution. Organized by therapeutic goals,
the Third Edition of this
comprehensive textbook on
electrotherapies provides a
fundamental understanding of
contemporary, evidence-based
intervention and assessment
procedures. The text takes a
problem-oriented approach and
recommends interventions
consistent with both theory and
the clinical efficacy of the
intervention for specific, clearly
identified clinical disorders. This
edition has a new chapter on
electrical stimulation and
biofeedback for genitourinary
dysfunction, including
incontinence management in
both women and men. All the
intervention-based chapters have
a new format that emphasizes
evidence-based practice and
practical application. Additional
self-study questions are included

in each chapter. **NEW TO THIS
EDITION:** New chapter on
Electrical Stimulation and
Biofeedback for Genitourinary
Dysfunction (Chapter 9) includes
topics such as incontinence
management in both women and
men, and gives solid evidence to
support or refute specific
procedures. New organization
Chapter on mechanisms of pain
transmission and pain control
with electrotherapy will be
moved up to chapter 4 to make
the first four chapters the
theoretical basis for the clinical
application chapters that follow.
Chapter on electrophysiologic
evaluation will become the last
chapter (chapter 12) in order to
enable students to meet core
educational competencies. New
chapter format for the
intervention chapters (chapters
5-11) adds consistency and clarity
to emphasize evidenced-based
practice and practical application.
Additional self-study questions
are included in each chapter to
enhance understanding of key
concepts. New emphasis on
evidence-based preferential
practice patterns.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that

"killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
