Real Trails Rowman & Littlefield

By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the New York Times Magazine that has earned favorable comparisons to Rachel Carson's Silent Spring and John Hersey's Hiroshima. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation. In the book *Losing Earth*, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.

Northern BC is a vast area, covering more land than the entire country of Sweden. In the west, the port city of Prince Rupert sits nestled among the majestic coast mountains, acting as a gateway to the Pacific Ocean and the incredible islands of Haida Gwaii. To the east, the Rocky Mountains cast their imposing shadow over the land, attracting hikers, mountaineers and ski tourers from far and wide. As you move north towards the Yukon border, the human population becomes sparser and nature rules the land. In between, places like Spatsizi Wilderness Provincial Park contain some of the most breathtaking landscapes in the country. Whether you are looking to fish, camp, ATV, snowmobile, view wildlife or just take in the sights along the region ' s many roads, Northern BC offers an abundance of adventure. The powerful and affirming story of a father's journey with his teenage daughter to the far reaches of Alaska Alaska ' s Arctic National Wildlife Refuge, home to only a handful of people, is a harsh and lonely place. So when James Campbell ' s cousin Heimo Korth asked him to spend a summer building a cabin in the rugged Interior, Campbell hesitated about inviting his fifteen-year-old daughter, Aidan, to join him: Would she be able to withstand clouds of mosquitoes, the threat of grizzlies, bathing in an ice-cold river, and hours of grueling labor peeling and hauling logs? But once there, Aidan embraced the wild. She even agreed to return a few months later to help the Korths work their traplines and hunt for caribou and moose. Despite windchills of 50 degrees below zero, father and daughter ventured out daily to track, hunt, and trap. Under the supervision of Edna, Heimo ' s Yupik Eskimo wife, Aidan grew more confident in the woods. Campbell knew that in traditional Eskimo cultures, some daughters earned a rite of passage usually reserved for young men. So he decided to take Aidan back to Alaska one final time before she left home. It would be their third and most ambitious trip, backpacking over Alaska ' s Brooks Range to the headwaters of the mighty Hulahula River, where they would assemble a folding canoe and paddle to the Arctic Ocean. The journey would test them, and their relationship, in one of the planet ' s most remote places: a land of wolves, musk oxen, Dall sheep, golden eagles, and polar bears. At turns poignant and humorous, Braving It is an ode to America ' s disappearing wilderness and a profound meditation on what it means for a child to grow up—and a parent to finally, fully let go.

This best-selling book is also “ #1 book in motorcycle safety ” (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid

accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “ Motorcycle Dynamics, ” Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider ' s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider ' s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called “ Cornering Habits ” is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough ' s skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough ' s voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it ' s road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or “ blind ” truck drivers. The book offers the kind of first-hand experience that can literally save riders ' lives, as illustrated in the chapters “ Booby Traps ” and “ Special Situations, ” which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs,

hazardous wildlife, and difficult weather conditions. The final chapter of the book, “ Sharing the Ride, ” is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

Path Planning (PP) is one of the prerequisites in ensuring safe navigation and manoeuvrability control for driverless vehicles. Due to the dynamic nature of the real world, PP needs to address changing environments and how autonomous vehicles respond to them. This book explores PP in the context of road vehicles, robots, off-road scenarios, multi-robot motion, and unmanned aerial vehicles (UAVs).

Yamaha Raptor 700R 2006-2009

2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to

one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Written in the Snows

Century of Northwest wilderness skiing stories by noted expert 150 black-and-white and color photographs Celebrates the friluftsliv, or open-air living spirit, of backcountry skiing In *Written in the Snows*, renowned local skiing historian Lowell Skoog presents a definitive and visually rich history of the past century of Northwest ski culture, from stirring and colorful stories of wilderness exploration to the evolution of gear and technique. He traces the development of skiing in Washington from the late 1800s to the present, covering the beginnings of ski resorts and competitions, the importance of wild places in the Olympic and Cascade mountains (including Oregon's Mount Hood), and the friluftsliv, or open-air living spirit, of backcountry skiing. Skoog addresses how skiing has been shaped by larger social trends, including immigration, the Great Depression, war, economic growth, conservation, and the media. In turn, Northwest skiers have affected their region in ways that transcend the sport, producing local legends like Milnor Roberts, Olga Bolstad, Hans Otto Giese, Bill Maxwell, and more. While weaving his own impressions and experiences into the larger history, Skoog shows that skiing is far more than mere sport or recreation.

Timequake

A New York Times Notable Book from the acclaimed author of *Slaughterhouse-Five*, *Breakfast of Champions*, and *Cat's Cradle*. At 2:27pm on February 13th of the year 2001, the Universe suffered a crisis in self-confidence. Should it go on expanding indefinitely? What was the point? There's been a timequake. And everyone—even you—must live the decade between February 17, 1991 and February 17, 2001 over again. The trick is that we all have to do exactly the same things as we did the first time—minute by minute, hour by hour, year by year, betting on the wrong horse again, marrying the wrong person again. Why? You'll have to ask the old science fiction writer, Kilgore Trout. This was all his idea.
