The Global status report on
road safety 2018 launched
by WHO in December 2018
highlights that the number of
annual road traffic deaths
has reached 1.35 million.
Road traffic injuries are now
the leading killer of people
aged 5-29 years. The burden
is disproportionately borne
by pedestrians cyclists and
motorcyclists in particular

those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

The Sticking Point Solution

"O'Reilly Media, Inc."

Some of the most charismatic motorcycles ever produced were built during the 1970s. The decade ushered in shattering performance, evocative styling, and distinctive personalities among the European, Japanese,

and American manufacturers. Renowned motorcycling author Roland Brown rides the best of the decade and offers a contemporary perspective on the machines that created the superbike category. This is a must-have book for vintage bike buyers and enthusiasts who want to know more about the strengths and the weaknesses of these exciting motorcycles.

Triumph Bonneville: 60 Years is a celebration one of motorcycling's most iconic and beloved bikes. First manufactured in Great

Britain in 1959, Triumph's legendary model resonates deeply with motorcycle enthusiasts worldwide who love its style, sound, performance, and undeniable coolness. It's no surprise that Triumph was Steve McQueen's favorite ride. The Bonneville's story is one of successes and challenges as Triumph grew steadily in the post-World War II decades to become America's most successful "import" motorcycle marque. Triumph won every championship worth winning, owned the	world speed record for fifteen years, and wooed Hollywood's hottest stars. Bonneville was Triumph's halo machine, one of the highest performance motorcycles of the 1960s. However, as competing marques eventually eclipsed the Bonneville in the 1970s, Triumph management struggled, leading first to bankruptcy and then to the demise of the company in 1983. Triumph was resurrected by British industrialist John Bloor in the late 1990s to become a	twenty-first century global success story, which includes a revived and thoroughly retro-contemporary Bonneville range. <u>Motorcycle Accident Cause Factors and Identification of Countermeasures</u> Haynes Manuals N. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel

and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime

Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs
