### *Forget Burial Time Out Guides*

Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other

topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, "So what?" Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes

the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources  
New information on the visual representation of data  
Expanded bibliography with many electronic sources

**The Electrician** John Wiley & Sons

Authoritative criticism covering every area of world cinema: classic silents and thirties comedies, documentaries and the avant-garde, French or Japanese cinema as well as the Hollywood mainstream and the latest megaproductions and B-movie horrors. Assessments of well over 10,000 movies, including full details of director, cast, alternative titles and release date for each film.

The Electrical Review John Wiley & Sons

Finalist for the LGBTQ Nonfiction Award from Lambda Literary Queers and trans people in the 1980s and early '90s were dying of AIDS and the government failed to care. Lovers, strangers, artists, and community activists came together take care of each other in the face of state violence. In revisiting these histories alongside ongoing queer and trans movements, this

book uncovers how early HIV care-giving narratives actually shape how we continue to understand our genders and our disabilities. The queer and trans care-giving kinships that formed in response to HIV continue to inspire how we have sex and build chosen families in the present. In unearthing HIV community newsletters, media, zines, porn, literature, and even vampires, *Forget Burial* bridges early HIV care-giving activisms with contemporary disability movements. In refusing to bury the legacies of long-term survivors and of those we have lost, this book brings early HIV kinships together with ongoing movements for queer and trans body self-determination.  
*In What Style Should We Build?* Createspace Independent Publishing Platform

With more than 5,000 works cited, *Handbook of Avian Hybrids of the World* is the greatest compendium of information ever published on hybridization in birds. Worldwide in scope, it provides information on all reported avian crosses, not only those occurring in captivity, but also in a natural setting (approximately 4,000 crosses are covered). This book is a basic reference, intended both for the serious birder and the professional biologist. McCarthy's work fills a need for reference material that takes into account the last half century of data. It will be of interest to workers in a wide variety of fields, ranging from animal behavior to genetics, ecology, zoology, and systematics. In fact, it will make fascinating reading for anyone interested in birds and the natural world.

**Cost Estimates of Manual & Automatic Crash Protection Systems (CP's) in Selected 1988-1992 Model Year Passenger Car Brake Systems** Oxford University Press

The Sentencing Council of England and Wales has as its core aim to promote consistency in sentencing,

---

with a developed system of appellate guidance at sentencing in addition to a narrative guidelines system which is now two decades old. As such, there is much to analyse and many lessons to be learned - for England and Wales and other jurisdictions.

Consistency in sentencing is widely regarded to be an essential component of a fair sentencing system; but what does consistency mean exactly? In *Achieving Consistency in Sentencing*, the author maintains that consistency incorporates both substantive and procedural elements, focussing upon the proper application of principle. The notion of comparing 'like' cases is rejected as simplistic, impractical, and unprincipled. Lyndon Harris argues that a more principled approach reconciles the tension between consistency and individualised justice which has been suggested to exist. The author uses clear empirical evidence of inconsistency in sentencing to emphasize the crucial need for discretion during the sentencing exercise which, he argues, should be structured in a way that encourages sentences to be imposed in accordance with the principles underpinning the scheme while maintaining the ability to individualise sentences. Using England and Wales as a case study, this work analyses various methods of structuring discretion. The latter part of the book examines the interplay between the primary givers of guidance: Parliament, the Court of Appeal (Criminal Division),

and the Sentencing Council and draws conclusions (good and bad) as to ways in which consistency can be achieved. Lyndon Harris identifies lessons to be learned while pointing out the strengths and deficiencies in the various devices used to guide sentencing judges when they are required to exercise their discretion. The book draws attention to the need for greater flexibility and structure while emphasising the work that needs to be done to address racial and gender inconsistencies in sentencing. Thus, while providing a theoretically sound critique of the concept, this monograph is of direct practical relevance to those studying or practising in sentencing systems worldwide.

Praise for *How I Became a Quant* "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, *How I Became a Quant* details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative

analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management

"Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. *How I Became a Quant* reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to

---

us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Imagine being forced to move to a new planet where YOU are the alien! From the creator of the Tapper Twins, New York Times bestselling author Geoff Rodkey delivers a topical, sci-fi middle-grade novel that proves friendship and laughter can transcend even a galaxy of differences. The first time I heard about Planet Choom, we'd been on Mars for almost a year. But life on the Mars station was grim, and since Earth was no longer an option (we may have blown it up), it was time to find a new home. That's how we ended up on Choom with the Zhuri. They're very smart. They also look like giant mosquitos. But that's not why it's so hard to live here. There's a lot that the Zhuri don't like: singing (just ask my sister, Ila), comedy (one joke got me sent to the principal's office), or any kind of emotion. The biggest problem, though? The Zhuri don't like us. And if humankind is going to survive, it's up to my family to change their minds. No pressure.

Discover the secrets of written persuasion! "The principles of hypnosis, when applied to copywriting, add a new spin to selling. Joe Vitale has taken hypnotic words to set the perfect sales environment and then shows us how to use those words to motivate a prospect to take the action you want. This is truly a new and effective approach to copywriting, which I

---

strongly recommend you learn. It's pure genius." -Joseph Sugarman, author of Triggers "I've read countless book on persuasion, but none come close to this one in showing you exactly how to put your readers into a buying trance that makes whatever you are offering them irresistible." -David Garfinkel, author of Advertising Headlines That Make You Rich "I am a huge fan of Vitale and his books, and Hypnotic Writing (first published more than twenty years ago), is my absolute favorite. Updated with additional text and fresh examples, especially from e-mail writing, Joe's specialty, Hypnotic Writing is the most important book on copywriting (yes, that's really what it is about) to be published in this century. Read it. It will make you a better copywriter, period." -Bob Bly, copywriter and author of The Copywriter's Handbook "I couldn't put this book down. It's eye opening and filled with genuinely new stuff about writing and persuading better. And it communicates it brilliantly and teaches it brilliantly- exemplifying the techniques by the writing of the book itself as you go along." -David Deutsch, author of Think Inside the Box, [www.thinkinginside.com](http://www.thinkinginside.com) "Hypnotic Writing is packed with so much great information it's hard to know where to start. The insights, strategies, and tactics in the book are easy to apply yet deliver one heck of a punch. And in case there's any question how to apply them, the before-and-after case studies drive the points home like nothing else can. Hypnotic Writing is not just about hypnotic writing. It is hypnotic writing. On the count of three, you're going to love it. Just watch and see."

-Blair Warren, author of The Forbidden Keys to Persuasion
