In this book, modeling and control design of electric motors, namely step motors, brushless DC motors and induction motors, are considered. The book focuses on recent advances on feedback control designs for various types of electric motors, with a slight emphasis on stepper motors. For this purpose, the authors explore modeling of these devices to the extent needed to provide a high-performance controller, but at the same time one amenable to model-based nonlinear designs. The control designs focus primarily on recent robust adaptive nonlinear controllers to attain high performance. It is shown that the adaptive robust nonlinear controller on its own achieves reasonably good performance without requiring the exact knowledge of motor parameters. While carefully tuned classical controllers often achieve required performance in many applications, it is hoped that

the advocated robust and adaptive designs will lead to standard universal controllers with minimal need for fine tuning of control parameters.

One of Hollywood's first openly Latin stars, Jennifer Lopez has held fast to her New York Bronx roots, while rising above them to become the highest paid Latina actress in history. Her expansive body of work-ranging from film, music, and dance to television production and fashion-has broken down long-standing racial barriers and earned her a place in Forbes' 2007 list of the Top 20 Richest Women in Entertainment. In spite of several box office and a dramatic personal life that has made her the frequent target of tabloid gossip, this determined artist has managed to retain her place at the top of her field and stands poised to make more significant contributions to the entertainment industry. Since bursting into the spotlight with her portrayal of deceased Latin superstar Selena in 1997, Jennifer Lopez has captivated the public eye and carved a niche for herself among Hollywood's elite.
