The analysis of plants, insects, soil and other particulates from scenes of crime can be vital in proving or excluding contact between a suspect and a scene, targeting search areas, and establishing a time and place of death. Forensic Ecology:

A Practitioner ' s Guide provides a complete handbook covering all aspects of forensic ecology. Bringing together the forensic applications of anthropology, archaeology, entomology, palynology and sedimentology in one volume, this book provides an essential resource for practitioners in the field of forensic science, whether crime scene investigators, forensic science students or academics involved in the recovery and analysis of evidence from crime scenes. Forensic Ecology: A Practitioner ' s Guide includes information not only

on the search, location, recovery and analysis of evidence, but includes sampling strategies for diatom analysis, pollen and soils samples and entomology and provides guides for good practice. Each chapter provides background information on each discipline and is structured according to pre-scene attendance (what questions should the scientist ask when receiving a call? What sort of preparation is required?), scene attendance (including protocols at the scene, sampling strategies, recording), scientific examination of analysis of the evidence up to the stages and guidelines for witness statement and presenting evidence in court. The book is written by specialists in all fields with a wealth of experience who are current forensic practitioners around the world. It provides an essential and accessible resource for students, academics, forensic practitioners and police officers everywhere.

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.
