Lemon-Aid guides steer the  
confused and anxious buyer  
through the economic  
meltdown unlike any other car-  
and-truck books on the  
market. U.S. automakers are  
suddenly awash in profits, and  
South Koreans and Europeans  
have gained market shares,  
while Honda, Nissan, and  
Toyota have curtailed  
production following the 2011  
tsunami in Japan. Shortages of  
Japanese new cars and  
supplier disruptions will likely  
push used car prices through  
the roof well into 2012, so  
what should a savvy buyer do?  
The all-new Lemon-Aid Used  
Cars and Trucks 2012-2013  
has the answers, including:  
More vehicles rated, with  
some redesigned models that  
don ' t perform as well as  
previous iterations downrated.

---

More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Bottom Line, Personal

This book focuses on negotiation processes and how negotiation modeling frameworks and information technology can support these. A modeling framework for negotiation as a purposeful complex adaptive process is presented and computer-implemented in the first three chapters. Two game-theoretic contributions use non-cooperative games in extensive form and a computer-implemented graph model for conflict resolution, respectively. Two chapters use the negotiators' joint utility distribution to provide problem structure and computer support. A chapter on cognitive support uses restructurable modeling as a framework. One chapter matches information technologies with negotiation tasks. Another develops computer support based on preference programming. Two final chapters develop a stakeholder approach to support system evaluation, and a research framework for them, respectively. Negotiation Processes: Modeling Frameworks and Information Technology will be of interest to researchers and students in the areas of negotiation, group decision/negotiation support systems and management science, as well as to practising negotiators interested in this technology.
