NIST's Manufacturing Engineering Laboratory (MEL) is developing standards that promote interoperability among members of the U.S. automotive supply chain. This study assesses the costs of imperfect interoperability to the U.S. automotive supply chain and describes the sources of these costs. This study estimates that imperfect interoperability imposes at least \$1 billion per year on the members of the U.S. automotive supply chain. By far, the greatest component of these costs is the resources devoted to repairing or reentering data files that are not usable for downstream applications.

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and

driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

Learn how to rebuild and upgrade your Buick Nailhead with the first book ever dedicated to the subject! In this all-new book from Nailhead racer and veteran engine builder Gary Weldon, you will learn everything you need to know about how to rebuild and upgrade the venerable Buick Nailhead engine. Weldon takes you through each step, including a review of the birth of the Nailhead, the benefits of its unique design, serial and casting number information to source and identify the best project, and a history of the engine in development. Also covered are the processes of rebuilding, including disassembly, inspection, sourcing the best parts, making critical upgrades, reassembly, and break-in. Of course, all the machine shop work is covered, and practical advice on building engines for competition is provided. The Nailhead was a throwback to the early overhead-valve engine design, and that unique design makes it a popular choice for period-correct hot rod projects. In addition, if your torquey Nailhead resides between the fenders of a Buick Special, LeSabre, Invicta, Roadmaster, Riviera, Century, Skylark, Wildcat, or Electra 225, this book will help you keep that old beauty on the road.

Cincinnati Magazine

Now revised and updated, this book tells the story of how the automobile transformed

American life and how automotive design and technology have changed over time. It details cars' inception as a mechanical curiosity and later a plaything for the wealthy; racing and the promotion of the industry; Henry Ford and the advent of mass production; market competition during the 1920s; the development of roads and accompanying highway culture; the effects of the Great Depression and World War II; the automotive Golden Age of the 1950s; oil crises and the turbulent 1970s; the decline and then resurgence of the Big Three; and how American car culture has been represented in film, music and literature. Updated notes and a select bibliography serve as valuable resources to those interested in automotive history.

Recently, the Army forecast that it would experience a 4.5-million-acre training land shortfall by 2013 and proposed to purchase additional land adjacent to certain existing training ranges. In response to a congressional request, GAO reviewed the Army's approach for acquiring training land. This report (1) evaluates the Army's approach to the acquisition of training land, (2) describes the Army's consideration of alternatives and assessment of the environmental and economic effects, and (3) analyzes the Army's effectiveness in communicating its approach for making decisions to pursue these acquisitions before the Office of the Secretary of Defense's (OSD) approval. GAO reviewed the Army strategic plan for training lands and other relevant documents, and focused on all five land acquisitions since 2002 at Fort Irwin, California;

three training sites in Hawaii; and the proposed expansion of the Piñon Canyon Maneuver Site in Colorado. GAO recommends that (1) the Army develop and implement a process to update periodically its strategic plan for training ranges to reflect current needs and (2) OSD and the Army jointly review their strategies for communicating major land acquisitions and agree on a common practice that would address concerns about early disclosure and provide the Army and the other services some flexibility to engage the public. DOD generally agrees with the recommendations to view the full product, including and the Army jointly review their strategies for communicating major land acquisitions and agree on a common practice that would address concerns about early disclosure and provide the Army and the other services some flexibility to engage the public.
