Every company can point to a growth strategy. Few, however, systematically implement it; instead, they tweak current products with incremental innovations, or attempt to buy growth through acquisitions. Neither is a satisfactory solution. Internally generated growth accomplished thorough product line renewal and new service development is essential to the long-term vitality of business across industries. The Fast Path to Corporate Growth takes on the challenge large corporations have in developing new product lines that address new market applications and provide new streams of revenue. The book integrates the key disciplines--new product strategy, user research, concept development and prototyping, market testing, and business modeling--into a practical framework for generating enterprise growth. The book illustrates that framework with in-depth examples of companies--including IBM, Honda, and Mars--that have generated impressive results by leveraging their core technologies to new markets and to new uses. Many of these examples contain templates that readers can use in their own projects. The book also addresses the human side of new market applications, providing advice on what executives and innovation team leaders must do to execute the steps of Meyer's framework for developing new market applications. This comprehensive guide to growth will appeal to R&D practitioners, new business development strategists, product managers, and to students in engineering management, innovation management, and corporate strategy.

Japanese carmaker Honda has pioneered a new breed of multinational enterprise - true manufacturing at the global scale. Honda has been a leader in confounding predictions that Japan's carmakers would and could never transfer their success abroad, and that a wholesale 'Japanization' of the west would be provoked if they did. The book covers manufacture, research and development, sourcing of components, human resources and labour relations, collaboration with western firms, political controversy, and the role of concepts and ideas, in Japan, North America, and Europe.
