Inventory Management Volume 2 Detroit Iron

Inventory Management Vol. 2 updates some topics in Pete Kornafel ' s Inventory Management and Purchasing book published in 2004. The original book is still in print, and much of it is still " best practice " for forecasting and purchasing inventory for hard goods distributors. This Vol. 2 book includes new material on SKU level forecasting with the addition of external data, a big new

section on store assortment planning, some “ best practice ” techniques for managing special situations such as multiple sources, hub-spoke store networks, promotions, category management and supply chain collaboration. All the content is of my own design with what I feel is “ best practice ” in each of these areas. And this Vol. 2 has some observations about the future of the automotive aftermarket in the U.S. This includes the impact of the Covid-19 pandemic in the (hopefully) short term, and some longer-term factors that will, over time, profoundly change the aftermarket.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
