Exceptional students become exceptional teachers. Rachel achieved her masters degree in education and became a certified teacher at age 17. Rachels first interview with the teachers union placed her on notice that she was a link in a curriculum driven education program. She was to teach her grade level curriculum only and never bring attention upon herself or her peers. Conformity was the rule and mediocrity was the goal. Rachel refused the unions demand to conform and motivates her students to become exceptional and exceed grade level expectations. The more successful Rachel is in her classroom, the more the push back by the teachers union to return her to mediocrity. Conflict between Rachel and the union results in the union poisoning Rachel, falsely accusing her of abusing a student; false drug violations on school property and ultimately the loss of her left leg as the union seeks to stop Rachels desire to help her students become exceptional. Learn how Rachel fights back and creates the Sinclair Academy, a private educational system that the union has no control over. No longer does the union want to stop Rachel from promoting accelerated learning; now the union wants her 2,500 teachers to join the teachers union. See how far the teachers union will go in an attempt to force union membership and what a young, tenacious teacher will do in saying, No.

This practical book shows how veteran, justice-oriented social studies teachers are responding to the Common Core State Standards, focusing on how they build curriculum, support students' literacy skills, and prepare students to think and act critically within and beyond the classroom. In order to provide direct classroom-to-classroom insights, the authors draw on letters written by veteran teachers addressed to new teachers entering the field. The first section of the book introduces the three approaches teachers can take for teaching for social justice within the constraints of the Common Core State Standards (embracing, reframing, or resisting the standards). The second section analyzes specific approaches to teaching the Common Core, using teacher narratives to illustrate key processes. The final section demonstrates how teachers develop, support, and sustain their identities as justice-oriented educators in standards-driven classrooms. Each chapter includes exemplary lesson plans drawn from diverse grades and classrooms, and offers concrete recommendations to guide practice. This book: offers advice from experienced educators who have learned to successfully navigate the constraints of high-stakes testing and

standards-based mandates; shares and analyzes curricular and pedagogical approaches to teaching the Common Core; and examines a range of philosophical and political stances that teachers might take as they navigate the unique demands of teaching for social justice in their own context.
