In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-

called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

One of the cornerstones of the religious Jewish experience in all its variations is Torah study, and this learning is considered a central criterion for leadership. Jewish Women's Torah Study addresses the question of women's integration in the halachic-religious system at this pivotal intersection. The contemporary debate regarding women's Torah study first emerged in the second half of the 19th century. As women's status in general society changed, offering increased legal rights and opportunities for education, a debate on the need to change women's participation in Torah study emerged. Orthodoxy was faced with the question: which parts, if any, of modernity should be integrated into Halacha? Exemplifying the entire array of Orthodox responses to modernity, this book is a valuable addition to the scholarship of Judaism in the modern era and will be of interest to students and scholars of Religion, Gender Studies and Jewish Studies.

Time to Write, Second Edition McFarland

The choices that individuals make in moments of crisis can transform them. By focusing on fictional characters trapped on fictional islands, the book examines how individuals react when forced to make hard choices within the liminal space of a "prison" island. At stake is the perception of choice: do characters believe that they have the power to choose, or do they think that they are at the mercy of fate? The results reveal certain patterns--psychological, historical, social, and political--that exist across a variety of popular/public cultures and time periods. This book focuses on how the interplay between liminality and the Locus of Control theory creates

dynamic sites of negotiated meaning. This psychological concept has never before been used for literary analysis. Offered here as an alternative to the defects of Freudian psychology, the Locus of Control theory has been proven reliable in thousands of studies, and the results have been found, with few exceptions, to be consistent in both women and men. That consistency is explored through close readings of islands found in popular culture books, films, and television shows, with suggestions for future research.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Golding 's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age.

This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Analyzes interviews with students, teachers, and administrators to develop a new set of literacies essential for student success in the digital age. To read John s work is to take on the role of a patient listener A book, like a piece of music, is scored for time, and I feel Time to Write is scored adagio. I believe that Time to Write can be read as a critique of [the] time-chopping approach to education and an argument for presence, for being fully open to experience, for being there To do good work, we must enter something like island time or what John calls existential time or what is sometimes called flow when we lose, at least temporarily, a sense of clock time.

from the Foreword by Thomas Newkirk
Twenty-five years ago, John Sylvester Lofty studied the influence of cultural time values on students resistance to writing instruction in an isolated Maine fishing community. For the new edition of Time to Write, Lofty

returned to the island to consider how social and educational developments in the intervening years may have affected both local culture and attitudes toward education. Lofty discovered how the island time values that previously informed students literacy learning have been transformed by outside influences, including technology, social media, and the influx of new residents from urban areas. Building on the ethnographic findings of the original study, the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication, and those of school-based literacy. Lofty examines the new literacies now essential for students in a technologically connected world, both those who aspire to continue the traditional island work of lobster fishing, and for the many who now choose to pursue other careers and attend college on the mainland.

Rescue on Nim's Island Open Road Media First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The

amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.
