This is a significant update to the highly influential text *People and Cultures of Hawaii: A Psychocultural Profile*. Since its publication in 1980, the immigrant groups it discusses in depth have matured and new ones have been added to the mix. The present work tracks the course of these changes over the past twenty years, constructing a historical understanding of each group as it evolved from race to ethnicity to culture. Individual chapters begin with an overview of one of fifteen groups. Following the development of its unique ethnocultural identity, distinctive character traits such as temperament and emotional expression are explored--as well as ethnic stereotypes. Also discussed are modifications to the group's ethnocultural identity over time and generational change--which traits may have changed over generations and which are more hardwired or enduring. An important feature of each chapter is the focus on the group's family social structure, generational and gender roles, power distribution, and central values and life goals. Readers will also find a description of the group's own internal social class structure, social and political strategies, and occupational and educational patterns. Finally, contributors consider how a particular ethnic group has blended into Hawai'i's culturally sensitive society. *People and Cultures of*

Hawai'i: The Evolution of Culture and Ethnicity will, like its predecessor, fill an important niche in understanding the history of different ethnic groups in Hawai'i.

Continuous Spikes and Waves During Slow Sleep Harlequin

This original volume examines the interface between attentional and linguistic processes in humans from the perspectives of psycholinguistics and cognitive science. It systematically explores how autonomy and automaticity are reflected during language processing in a variety of situations. A true, mechanistic explanation of how humans process language would require a complete understanding of the interface language has with important cognitive systems like attention, memory, as well as with vision. Interdisciplinary work in this area has so far not been able to generate a substantial theoretical position on this issue. This volume therefore looks at different language processing domains, such as speaking, listening, reading, as well as discourse and text processing, to evaluate the role attention plays in such performances; and also at how often linguistic inputs affect attentional processing. In this sense, it

proposes that the attention--language interface is bidirectional. It also considers applied issues like language disorders, bilingualism and illiteracy, where the attention--language interface seems especially relevant as a theoretical apparatus for research investigations. Therefore, this volume brings closer theoretical explanations from the language sciences and cognitive sciences. It argues that language processing is multi-modal in its very essence and many conceptual structures in language evolve out of a complex interplay among participating cognitive systems such as attention and memory, supported by vision and audition.

Interaction Between Attention and Language Systems in Humans

Reading is all about understanding. How do we know our kids are getting it—and what do we do when they don't get it? Authors Juli Kendall and Outey Khuon believe that small group comprehension lessons have a key role to play in advancing students' understanding of texts. *Making Sense: Small-Group Comprehension Lessons for English Language Learners*, they provide answers to many common questions asked by teachers of ELL. It is an easy-to-use, practical resource for ELD, ESL, and ESOL teachers. The book's five main sections are geared to the stages of language proficiency, and lessons span kindergarten through grade 8. The authors outline 52 lessons that teach students how to make connections, visualize, infer, and determine importance. Each lesson follows a four-part teaching framework: Start Up/Connection: Helping students build background and use prior knowledge to connect to the lesson Give Information : Explicitly telling students what they are going to learn and why they are learning it Active Involvement : Students practice what they are learning while the teacher monitors and adjusts instruction accordingly Off-You-Go!: Opportunities for students to practice what they learned with peers or independently. *Making Sense* will appeal to experienced teachers seeking to expand their repertoire of lessons, as well as new teachers just beginning the adventure of teaching comprehension to English language learners.
