One word binds us all: geography. We are all geographers, human beings who care about the places we think of as 'home' - our habitat. And yet we have lost touch with the connection between our actions and the state of the planet that we all share. We need a new narrative that restores the connection

We all know, that data cleaning is one of the most time-consuming stages in the data analysis process. We need to acquire missing values, check their distribution, figure out the patterns, and make a decision on how to fill the spaces. At this point you should realize, that

identification of missing data patterns and correct imputation process will influence further analysis.
