A Day in the Life is the story of how the ideal marriage between two young and extraordinarily beautiful members of the English upper class fell apart as the psychedelic dreams of the sixties gave way to the harsh, hard-rock reality of the seventies. A tender, moving, and often harrowing look at the moment in time when the counterculture collided with the international jet set, A Day in the Life captures the spirit of that era and the people who lived through it with unerring

accuracy and heartfelt precision.

When Tommy Weber and Susan "Puss" Coriat, London's most beautiful couple, were married in 1964, it was the fitting end to a storybook romance. But the fast cars Tommy loved to race, their celebrity friends, and the huge trust fund Puss had inherited masked a tortured truth - both had suffered through oppressive and neglectful childhoods and were now caught up in a wildly extravagant lifestyle that neither Puss' inheritance nor Tommy's increasingly desperate schemes could support. Six years later, Puss found herself wandering around India with her two sons while Tommy, who was now smuggling drugs to survive, lived in London with a stunning young actress. A Day in the Life is also the stirring account of how the couple's tow sons - one of whom is the well-known actor Jake Weber - somehow managed

---

to survive a childhood that would have destroyed those of lesser spirit. An unbelievable true-life tale that often reads like a novel, *A Day in the Life* follows the fortunes and misfortunes of one remarkable family while also introducing us to an extensive cast of supporting characters that includes Keith Richards, Anita Pallenberg, Mick Jagger, Jimi Hendrix, Eric Clapton, George Harrison, John Lennon, and Charlotte Rampling, as well as many of the movers and shakers who helped create the "swinging London" scene.

You have to live on twenty-four hours of daily time. Out of it you have to spin health, pleasure, money, content, respect, and the evolution of your immortal soul. Its right use, its most effective use, is a matter of the highest urgency and of the most thrilling actuality. All depends on that. Your happiness – the elusive prize that you are all clutching for, my friends! – depends on that. Which of us lives on twenty-four hours a day? And when I say "lives," I do not mean exists, nor "muddles through." Which of us is not saying to himself – which of us has not been saying to

himself all his life: "I shall alter that when I have a little more time"? We never shall have more time. We have, and we have always had, all the time there is. It is the realization of this profound and neglected truth (which, by the way, I have not discovered) that has led me to the minute practical examination of daily time-expenditure.

We didn't know where it was all going. We just didn't know. One day in September 1968 Don McCullin, then regarded as the world's most accomplished war photographer, received a commission from the Apple Corporation to spend a day photographing the Beatles. McCullin had just returned from covering the bitter fighting during the Tet Offensive in Vietnam, and was the most hardened

photojournalist in the field. He was astonished by the invitation. On Sunday 28 July he met the Beatles at the Sunday Times studio and began to photograph them in colour for a Life magazine cover. The day that followed has become known in Beatles lore as 'The Mad Day Out?'. McCullin shot twenty rolls of black-and-white film in various locations across London, from the banks of the Thames to Paul McCartney's garden. Apart from the cover photograph and two pictures in McCullin's recent book *In England*, we believe the work to be otherwise unpublished. The timing of this day was significant. At the height of their international fame following the release of Sgt. Pepper's Lonely Hearts Club Band, the Beatles were in the middle of recording the White Album. The war was raging in Vietnam and riots had spread through capital cities worldwide. It was the very moment of a generational divide, and the Beatles were the iconic figureheads of the youth movement. One of the most poignant photographs taken that day was of John Lennon posing as dead, surrounded by the other three, in an image that he himself had carefully choreographed. What was an intentional pose in protest is now seen as tragic and prophetic. These

---

pictures are of four inspired musicians on the cusp of the change. They mark the passing of an era in which we can glimpse our own lost youth.

In 1975, Angola was tumbling into pandemonium; everyone who could was packing crates, desperate to abandon the beleaguered colony. With his trademark bravura, Ryszard Kapuscinski went the other way, begging his was from Lisbon and comfort to Luanda—once famed as Africa's Rio de Janeiro—and chaos. Angola, a slave colony later given over to mining and plantations, was a promised land for generations of poor Portuguese. It had belonged to Portugal since before there were English-speakers in North America. After the collapse of the fascist dictatorship in Portugal in 1974, Angola was brusquely cut loose, spurring the catastrophe of a still-ongoing civil war. Kapuscinski plunged right into the middle of

the drama, driving past thousands of haphazardly placed check-points, where using the wrong shibboleth was a matter of life and death; recording his impressions of the young soldiers—from Cuba, Angola, South Africa, Portugal—fighting a nebulous war with global repercussions; and examining the peculiar brutality of a country surprised and divided by its newfound freedom. Translated from the Polish by William R. Brand and Katarzyna Mroczkowska-Brand.

This edited collection brings together some of the leading researchers in the study of the daily experience of work and daily well-being. The book covers both theoretical and methodological issues involved in studying workers' well-being as it

evolves on a daily basis. Interest in the topic of daily fluctuations in worker well-being has grown rapidly over the past ten years. This is partly because of advances in research and statistical methods, but also because researchers have found that the psychological processes that influence well-being play out from moment to moment, and from day to day. Topics covered in this book include: The theoretical basis of studying work as a series of daily episodes  
Assessment of different components of daily well-being  
Factors involved in the regulation of well-being at work  
Qualitative and quantitative diary experience sampling and event reconstruction methods  
Latent growth curve modelling of diary data  
The final chapter of the book includes a preview of how daily methods may evolve in the future. Intended as a guide for researchers with good knowledge of field research methods, the book will be particularly useful to researchers of work-related phenomena who seek to expand their knowledge of dynamic methods in field contexts,

and those who want to start using these methods. It will also be of interest to students of work psychology and organisational behaviour, and related disciplines.

Community and Everyday Life Capstone

Thriving Across the Lifespan and Around the Globe: The Day in the Life Visual Research

Approach is the result of several decades of international, pan-disciplinary research-team collaborations using quasi-ecological visual methodologies to investigate the psychosocial development of children in diverse communities. The initial studies highlighted in this work involved filming a ' Day in the Life ' of toddlers and primary school children, their families, and schools in diverse communities in Asia, South and North

America, and Europe. Filmed in their homes and communities for an entire day, the youngest participants were commonly seen to be thriving in diverse psychosocial domains, such as in their security strivings, emergent literacy and graphic representations, and musicality. Research shows that the nature of a child's development can vary in as many ways as there are diverse contexts. Thriving in the transition from home to primary school is a second developmental milestone investigated in the research. The book serves as an account of the lived experiences of thriving children, among their families, their schools and their communities. The contents give an invaluable insight into the psychology of early childhood while giving the reader an opportunity to understand the resilience of mobile early teenagers as well as independent older adults. The contributions in the book also provide an additional layer to our understanding of visual ethnography by covering such phenomena as agency and

communitarianism, spirituality, and the place of humour in the context of challenges encountered across the lifespan. Through presenting quasi-ecological experimental approaches, this reference enhances the reader ' s insight into the texture and nature of thriving in situ, in natural contexts.
