Binocular Field of View. This spec tells you the width of the area (usually in feet) that you can view at a glance, 1,000 yards from where you stand.

A wide field of view is best to find and identify objects such as birds. Usually a higher magnification power results in a narrower field of view.

Seven by fifty. That is all you need to know. Almost. The classic size of binoculars for marine use is 7x50. This means that they have 7x magnification and the objective lenses are 50mm in diameter. There are three characteristics of the 7x50 binoculars that make them attractive for marine use:

conservative magnification, large objective size, and generous exit pupil size.
