*The Routledge Handbook to Sociology of Music Education* is a comprehensive, authoritative and state-of-the-art review of current research in the field. The opening introduction orients the reader to the field, highlights recent developments, and draws together concepts and research methods to be covered. The chapters that follow are written by respected, experienced experts on key issues in their area of specialisation. From separate beginnings in the United States, Europe, and the United Kingdom in the mid-twentieth century, the field of the sociology of music education has and continues to experience rapid and global development. What Happens When One of America's Most Admired Biographers Writes His Own Biography? For Eric Metaxas, the answer is Fish Out of Water: A Search for the Meaning of Life—a poetic and sometimes hilarious memoir of his early years, in which the Queens-born son of Greek and German immigrants struggles to make sense of a world in which he never quite seems to fit. Renowned for his biographies of William Wilberforce, Dietrich Bonhoeffer, and Martin Luther, Metaxas is the author of five New York Times bestsellers, the witty host of the acclaimed Socrates in the City conversation series, and a nationally syndicated radio personality. But here he reveals a personal story few have heard, taking us from his mostly happy childhood—and riotous triumphs at Yale—to the nightmare of drifting toward a dark abyss of meaninglessness from which he barely escapes. Along the way he introduces us to an unforgettable troupe of picaresque characters who join this quintessentially first-generation American boy in what is both bildungsroman and odyssey—and which underscores just how funny, serious, happy, sad, and ultimately meaningful life can be.

The salmon pools of Maine achieved legendary status among anglers and since 1912, it was tradition to present the first salmon caught in the Penobscot River each spring to the U.S. President. The last salmon presented was in 1992, to George W. Bush. That year, the Penobscot accounted for more than 70 percent of the salmon returns on the entire Eastern seaboard, yet that was only 2 percent of the river’s historic populations. Due to commercial over harvesting, damming,

and environmental degradation of the fish’s home waters, Atlantic salmon populations had been decimated. The salmon is said to be as old as time and to know all the past and future. Twenty-two thousand years ago, someone carved a life-sized image of Atlantic salmon in the floor of a cave in southern France. Salmon were painted on rocks in Norway and Sweden. The Celts mythologized the salmon as holder of all mysterious knowledge. The President’s Salmon presents a rich cultural and biological history of the Atlantic salmon and the salmon fishery, primarily revolving around the Penobscot River, the last bastion for the salmon in America and a key battleground site for the preservation of the species.
