The Map: A Beginner's Guide to Doing Research in ...

Translation studies is an academic interdiscipline dealing with the systematic study of the theory, description and application of translation, interpreting, and localization. As an interdiscipline, Translation Studies borrows much from the various fields of study that support translation. These include comparative literature, computer science, history, linguistics, philology, philosophy, semiotics, and terminology. The term translation studies was coined by the Amsterdam-based American scholar Dictionary of Linking Words: A Guide to Translation Studies
