“ Offers a useful reminder of the role of modern science in fundamentally transforming all of our lives. ”  
—President Barack Obama (on Twitter) “ An important book. ” —Steven Pinker, The New York Times Book Review  
The surprising and important story of how humans gained what amounts to an extra life, from the bestselling author of How We Got to Now and Where Good Ideas Come From In 1920, at the end of the last major pandemic, global life expectancy was just over forty years. Today, in many parts of the world, human beings can expect to live more than eighty years. As a species we have doubled our life expectancy in just one century. There are few measures of human progress more astonishing than this increased longevity. Extra Life is Steven Johnson ’ s attempt to understand where that progress came from, telling the epic story of one of humanity ’ s greatest achievements. How many of those extra years came from vaccines, or the decrease in famines, or seatbelts? What are the forces that now keep us alive longer? Behind each breakthrough lies an inspiring story of cooperative innovation, of brilliant thinkers bolstered by strong systems of public support and collaborative networks, and of dedicated activists fighting for meaningful reform. But for all its focus on positive change, this book is also a reminder that meaningful gaps in life expectancy still exist, and that new threats loom on the horizon, as the COVID-19 pandemic has made clear. How do we avoid decreases in life expectancy as our public health systems face unprecedented challenges? What current technologies or interventions that could reduce the impact of future crises are we somehow ignoring? A study in how meaningful change happens in society, Extra Life celebrates the enduring power of common goals and public resources, and the heroes of public health and medicine too often ignored in popular accounts of our history. This is the sweeping story of a revolution with immense public and personal consequences: the doubling of the human life span.

An in-depth look at how mortuary cultures and issues of death and the dead in Africa have developed over four centuries In My Time of Dying is the first detailed history of death and the dead in Africa south of the Sahara. Focusing on a region that is now present-day Ghana, John Parker explores mortuary cultures and the relationship between the living and the dead over a four-hundred-year period spanning the seventeenth to twentieth centuries. Parker considers many questions from the African historical perspective, including why people die and where they go after death, how the dead are buried and mourned to ensure they continue to work for the benefit of the living, and how perceptions and experiences of death and the ends of life have changed over time. From exuberant funeral celebrations encountered by seventeenth-century observers to the brilliantly conceived designer coffins of the late twentieth century, Parker shows that the peoples of Ghana have developed one of the world ’ s most vibrant cultures of death. He explores the unfolding background of that culture through a diverse range of issues, such as the symbolic power of mortal remains and the dominion of hallowed ancestors, as well as the problem of bad deaths, vile bodies, and vengeful ghosts. Parker reconstructs a vast timeline of death and the dead, from the era of the slave trade to the coming of Christianity and colonial rule to the rise of the modern postcolonial nation. With an array of written and oral sources, In My Time of Dying richly adds to an understanding of how the dead continue to weigh on the shoulders of the living.  
A History of My Times Farrar, Straus and Giroux  
A rags-to-riches story of the climb from urban poverty to the New York Times, this insider’s view of struggle and change at the nation’s premier newspaper reconstructs the most controversial period in the paper’s history and records how journalists reported and edited the biggest events of the past two decades. A candid discussion on race, this memoir is the inspirational story of a man who covered presidents, documented extraordinary social and cultural challenges, led his team to an unprecedented number of Pulitzers, stumbled disastrously during an unjust scandal, and in the end discovered the true value of his life.

The History of My Own Times. ... Translated from the French by Thomas Holcroft Penguin Classics  
The renowned radio host and one of the most trusted voices in the nation candidly and compassionately addresses the hotly contested right-to-die movement, of which she is one of our most inspiring champions. The basis for the acclaimed PBS series. Through interviews with terminally ill patients and their relatives, as well as physicians, ethicists, religious leaders, and representatives of both those who support and vigorously oppose this urgent movement, Rehm gives voice to a broad range of people personally linked to the realities of medical aid in dying. With characteristic evenhandedness, she provides the full context for this highly divisive issue and presents the fervent arguments—both for and against—that are propelling the current debate: Should we adopt laws allowing those who are dying to put an end to their suffering? Featuring a deeply personal foreword by John Grisham, When My Time Comes is a response to many misconceptions and misrepresentations of end-of-life care. It is a call to action—and to conscience—and it is an attempt to heal and soothe, reminding us that death, too, is an integral part of life.  
The Soul of America Grand Central Publishing  
INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what’s really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

An in-depth look at how The New York Times failed in its coverage of the fate of European Jews from 1939–45. It examines how the decisions that were made at The Times ultimately resulted in the minimizing and misunderstanding of modern history’s worst genocide. Laurel Leff, a veteran journalist and professor of journalism, recounts how personal relationships at the newspaper, the assimilationist tendencies of The Times’ Jewish owner, and the ethos of mid-century America, all led The Times to consistently downplay news of the Holocaust. It recalls how news of Hitler's 'final solution' was hidden from readers and - because of the newspaper's influence on other media - from America at large. Buried by The Times is required reading for anyone interested in America's response to the Holocaust and for anyone curious about how journalists determine what is newsworthy.  
Empire of Pain Penguin  
A New York Times Editors' Choice Book Named a Most Anticipated Book of 2022 by Literary Hub and Goodreads A playful history of the humble index and its outsized effect on our reading lives. Most of us give little thought to the back of the book—it’s just where you go to look things up. But as Dennis Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession,

sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists’ living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and—of course—indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years.  
The New York Times Book of Medicine e-artnow  
One of America’s top physicians traces the history of risk in medicine—with powerful lessons for today Every medical decision—whether to have chemotherapy, an X-ray, or surgery—is a risk, no matter which way you choose. In You Bet Your Life, physician Paul A. Offit argues that, from the first blood transfusions four hundred years ago to the hunt for a COVID-19 vaccine, risk has been essential to the discovery of new treatments. More importantly, understanding the risks is crucial to whether, as a society or as individuals, we accept them. Told in Offit's vigorous and rigorous style, You Bet Your Life is an entertaining history of medicine. But it also lays bare the tortured relationships between intellectual breakthroughs, political realities, and human foibles. Our pandemic year has shown us, with its debates over lockdowns, masks, and vaccines, how easy it is to get everything wrong. You Bet Your Life is an essential read for getting the future a bit more right.

One of The New York Times's 100 Notable Books of 2020. A New York Times Book Review Editors' Choice. "Finely wrought, a master class in the layering of time and contradiction that gives us a deeply imagined, and deeply human, soul." --Rebecca Makkai, The New York Times Book Review  
From the bestselling author of The Septembers of Shiraz, the story of an Iranian man reckoning with his capacity for love and evil Set in Iran and New York City, Man of My Time tells the story of Hamid Mozaffarian, who is as alienated from himself as he is from the world around him. After decades of ambivalent work as an interrogator with the Iranian regime, Hamid travels on a diplomatic mission to New York, where he encounters his estranged family and retrieves the ashes of his father, whose dying wish was to be buried in Iran. Tucked in his pocket throughout the trip, the ashes propel him into a first-person excavation—full of mordant wit and bitter memory—of a lifetime of betrayal, and prompt him to trace his own evolution from a perceptive boy in love with marbles to a man who, on seeing his own reflection, is startled to encounter someone he no longer recognizes. As he reconnects with his brother and others living in exile, Hamid is forced to reckon with his past, with the insidious nature of violence, and with his entrenchment in a system that for decades ensnared him. Politically complex and emotionally compelling, Man of My Time explores variations of loss—of people, places, ideals, time, and self. This is a novel not only about family and memory but about the interdependence of captor and captive, of citizen and country, of an individual and his or her heritage. With sensitivity and strength, Dalia Sofer conjures the interior lives of the “generation that had borne and inflicted what could not be undone.”

A historian's personal journey into the complex questions of immigration, home and nation From Ireland to London in the 1950s, Derry in the Troubles to contemporary, de-industrialised Manchester, Joyce finds the ties of place, family and the past are difficult to break. Why do certain places continue to haunt us? What does it mean to be British after the suffering of Empire and of war? How do we make our home in a hypermobile world without remembering our pasts? Patrick Joyce's parents moved from Ireland in the 1930s and made their home in west London. But they never really left the homeland. And so as he grew up among the streets of Paddington and Notting Hill and when he visited his family in Ireland he felt a tension between the notions of home, nation and belonging. Going to My Father's House charts the historian's attempt to make sense of these ties and to see how they manifest in a globalised world. He explores the places - the house, the street, the walls

and the graves - that formed his own identity. He ask what place the ideas of history, heritage and nostalgia have in creating a sense of our selves. He concludes with a plea for a history that holds the past to account but also allows for dynamic, inclusive change.

The great scholar, W. E. B. Du Bois, once wrote about the Problem of race in America, and what he called “Double Consciousness,” a sensitivity that every African American possesses in order to survive. Since childhood, Ailey Pearl Garfield has understood Du Bois’s words all too well. Bearing the names of two formidable Black Americans—the revered choreographer Alvin Ailey and her great grandmother Pearl, the descendant of enslaved Georgians and tenant farmers—Ailey carries Du Bois’s Problem on her shoulders. Ailey is reared in the north in the City but spends summers in the small Georgia town of Chicassetta, where her mother’s family has lived since their ancestors arrived from Africa in bondage. From an early age, Ailey fights a battle for belonging that’s made all the more difficult by a hovering trauma, as well as the whispers of women—her mother, Belle, her sister, Lydia, and a maternal line reaching back two

centuries—that urge Ailey to succeed in their stead. To come to terms with her own identity, Ailey embarks on a journey through her family’s past, uncovering the shocking tales of generations of ancestors—Indigenous, Black, and white—in the deep South. In doing so Ailey must learn to embrace her full heritage, a legacy of oppression and resistance, bondage and independence, cruelty and resilience that is the story—and the song—of America itself.

My Times in Black and White Farrar, Straus and Giroux

The bestselling author of *Intern and Doctored* tells the story of the thing that makes us tick For centuries, the human heart seemed beyond our understanding: an inscrutable shuddering mass that was somehow the driver of emotion and the seat of the soul. As the cardiologist and bestselling author Sandeep Jauhar shows in *Heart: A History*, it was only recently that we demolished age-old taboos and devised the transformative procedures that have changed the way we live. Deftly alternating between key historical episodes and his own work, Jauhar tells the colorful and little-known story of the doctors who risked their careers and the patients who risked their lives to know and heal our most vital organ. He introduces us to Daniel Hale Williams, the African American doctor who performed the world’s first open heart surgery in Gilded Age Chicago. We meet C. Walton Lillehei, who connected a patient’s circulatory system to a healthy donor’s, paving the way for the heart-lung machine. And we encounter Wilson Greatbatch, who saved millions by inventing the pacemaker—by accident. Jauhar deftly braids these tales of discovery, hubris, and sorrow with moving accounts of his family’s history of heart ailments and the patients he’s treated over many years. He also confronts the limits of medical technology, arguing that future progress will depend more on how we choose to live than on the devices we invent. Affecting, engaging, and beautifully written, *Heart: A History* takes the full measure of the only organ that can move itself.

Takaki traces the economic and political history of Indians, African Americans, Mexicans, Japanese, Chinese, Irish, and Jewish people in America, with considerable attention given to instances and consequences of racism. The narrative is laced with short quotations, cameos of personal experiences, and excerpts from folk music and literature. Well-known occurrences, such as the Triangle Shirtwaist Factory Fire, the Trail of Tears, the Harlem Renaissance, and the Japanese internment are included. Students may be surprised by some of the revelations, but will recognize a constant thread of rampant racism. The author concludes with a summary of today's changing economic climate and offers Rodney King's challenge to all of us to try to get along. Readers will find this overview to be an accessible, cogent jumping-off place for American history and political science plus a guide to the myriad other sources identified in the notes.

A Good Morning America Book Club Pick A Veranda Magazine Book Club Pick A captivating, bighearted, richly tapestried story of people brought together by love, war, art, flood, and the ghost of E. M. Forster, by the celebrated author of *Tin Man*. Tuscany, 1944: As Allied troops advance and bombs fall around deserted villages, a young English soldier, Ulysses Temper, finds himself in the wine cellar of a deserted villa. There, he has a chance encounter with Evelyn Skinner, a middle-aged art historian who has come to Italy to salvage paintings from the ruins and recall long-forgotten memories of her own youth. In each other, Ulysses and Evelyn find a kindred spirit amidst the rubble of war-torn Italy, and set off on a course of events that will shape Ulysses's life for the next four decades. As Ulysses returns home to London, reimmersing himself in his crew at The Stoat and Parot—a motley mix of pub crawlers and eccentrics—he carries his time in Italy with him. And when an unexpected inheritance brings him back to where it all began, Ulysses knows better than to tempt fate, and returns to the Tuscan hills. With beautiful prose, extraordinary tenderness, and bursts of humor and light, *Still Life* is a sweeping portrait of unforgettable individuals who come together to make a family, and a deeply drawn celebration of beauty and love in all its forms.

Xenophon's History recounts nearly fifty turbulent years of warfare in Greece between 411 and 362 BC. Continuing the story of the Peloponnesian War at the point where Thucydides finished his magisterial history, this is a fascinating chronicle of the conflicts that ultimately led to the decline of Greece, and the wars with both Thebes and the might of Persia. An Athenian by birth, Xenophon became a firm supporter of the Spartan cause, and fought against the Athenians in the battle of Coronea. Combining history and memoir, this is a brilliant account of the triumphs and failures of city-states, and a portrait of Greece at a time of crisis.
