ministry leaders, parents, concerned friends and family members. What is Overeating and Compulsive Eating? Overeating means excessive eating. Compulsive eating is uncontrolled overeating based on "emotional hunger," not physical hunger. It often comes with a seemingly irresistible urge to eat. What are the warning signs of compulsive

overeating? People who compulsively overeat are often trying to find comfort, escape from a problem, or calm their anxiety with food. Emotional eaters are trapped in a vicious cycle: eating to feel better, feeling worse instead, and then turning back to food for comfort and relief. What are some of the effects and symptoms of overeating? Physical

symptoms of overeating: Chronic neck and joint pain, diabetes, heart disease, high blood pressure, kidney disorder, shortness of breath after mild exertion Relational symptoms of overeating: Feeling embarrassed, feeling inhibited, feeling isolated, and feeling rejected.
