"This book helps in raising and sustaining motivation for better grades. These books are the best possible match to the specification, motivating readers by making maths easier to learn. They include complete past exam papers and student-friendly worked solutions which build up to practice questions, for all round exam preparation. These books also feature real-life applications of maths through the 'Life-links' and 'Why ...?' pages to show readers how this maths relates, presenting opportunities to stretch and challenge more able students. Each book includes a Live Text CDROM which features: fully worked solutions examined step-by-step, animations for key learning points, and revision support through the Exam Cafe."--Publisher's description

Which A levels? 2019 Philip Allan

Get to grips with the core practicals and develop the skills students need to succeed with an assessment-driven approach, combining clear summaries of practical work that reinforce understanding, with sample questions and answers to improve exam technique. - Easily identify what students need to know with a concise summary of the required practical work examined in the A-level specifications. - Consolidate understanding of practical work, methodology, mathematical and other skills out of the laboratory with exam tips and knowledge check questions, with answers in the back of the book. - Improve exam technique with sample answers, examiner's tips and exam-style questions. -

Provide extra support with coverage of methodologies and generic practical skills not focused on in the textbooks.

Edexcel A2 Biology Revision Guide
Hodder Education

Making the right choice of A levels is crucial. Not only will it affect your enjoyment of studying over the next two years but it also has implications for your choice of career, further training or higher education options. The tenth edition of this student-friendly guide has been revised and updated and includes study and employment options after 16 as well as at degree level. It also contains information on apprenticeships, an increasingly popular alternative to full-time higher education. Each subject entry covers: - What and how you study - Which A levels fit well together for

competitive courses and careers - Related higher education courses - Career and training options after A levels and degree courses - Alternative qualifications such as the International Baccalaureate.

*Aiming for an A in A-level
Biology* Philip Allan

Our Revision Workbooks are designed to help students develop vital skills throughout the course and build their confidence in preparation for the exam, with guided questions, unguided questions, practice papers and a full set of answers.

Salters-nuffield Psychology Press
Endorsed by Edexcel Build investigative

skills, test understanding and apply biological theory to topical examples with this Edexcel Year 1 Student Book - Supports all 16 required practicals with activities and questions to help students explain procedures, analyse data and evaluate results - Provides clear definitions, as well as explanations, of the meanings of all technical vocabulary needed for the new specification - Helps bring students up to speed with a summary of prior knowledge and diagnostic questions at the start of each chapter - Offers assessment guidance with Exam Practice Questions at the end of each chapter, graded by difficulty to support progression, along with Challenge Questions to stretch more

able students - Mathematical skills throughout and a dedicated 'Maths in Biology' chapter explaining key concepts and methods - Develops understanding with free online access to Test yourself Answers, an Extended Glossary, Learning Outcomes and Topic Summaries Edexcel A level Biology Student Book 1 includes AS level

REVISE Salters Nuffield AS/A Level Biology Revision Guide Cambridge University Press

Missing the Meaning investigates recent evidence that school text materials are more problematic than previously imagined. Difficulties with language, illustrations, design and cultural

mismatch are highlighted, and ways in which young students 'read' books and electronic materials in classrooms are compared through contributions from researchers across five continents. The book suggests new ways to develop and use text so that the materials are better matched to the diverse needs of teachers and students. The implications of this collection are wide, applying not only to teachers, but to teacher educators, educational publishers, software developers and policy makers.

Salters-Nuffield A level Biology Student Book 2. Pearson Edexcel A-level Biology (Salters-Nuffield) Student Guide: Practical Biology

This text places biological concepts into real-

life contexts, and allows students to explore the tremendous advances in the subject - in areas such as molecular biology, cell biology, medical physiology, genetics, biotechnology, conservation, evolutionary studies and the biology of the brain.

Edexcel A Level Science Heinemann 'Teaching in context' has become an accepted, and often welcomed, way of teaching science in both primary and secondary schools. The conference organised by IPN and the University of York Science Education Group, Context-based science curricula, drew on the experience of over 40 science educators and 10 projects. The book is arranged in four parts. Part A consists of two papers, one on situated learning and the other on implementation of new

curricula. Part B contains descriptions of five major curricula in different countries, why they were introduced, how they were developed and implemented and evaluation results. Part C gives descriptions of three projects that are of smaller scale and their materials are used as interventions in other more conventional curricula. There is also a contribution on some fundamental research where modules of work are written to examine how best to design context-based curricula. Finally, Part D consist of two chapters, one summarising some of the findings that came out of the chapters in the three earlier parts and the second looks at the future.
