A Matter of Time Dreamspinner Press  
January 1954. Mists cover the hills around Selchester. Someone at the research facility known as the Atomic is leaking secrets to Soviet Russia, and when nuclear scientist Bruno Rothesay goes missing, the British Intelligence Services are convinced he's the mole. Hugo Hawksworth isn't so sure. Then a body turns up, and Hugo's instincts are proven correct. But if Rothesay wasn't selling secrets to the Soviets, who is? As Hugo digs deeper into buried connections and unlikely

coincidences, he knows there's more to this case than his London superiors believe. But following his instincts will pit him against the Establishment--and tangle him once again in the poisonous legacy of the late Lord Selchester. As he closes in on the truth, Hugo finds himself confronted by an adversary who will stop at nothing, in a case that will prove the most personal of his career. With a touch of Downton Abbey, a whisper of Agatha Christie and a nod to John Le Carr , A Matter Of Loyalty is the third and final book in this delightfully classic and witty murder-mystery series.

In this new book from Routledge and MiddleWeb, author Angie Miller shows how you can turn your students into informed citizens by teaching them how to research effectively. In today's information-saturated world research skills have moved beyond fact-finding, into fact-sifting, fact-sorting, and fact-assessing. Miller shows you how to help students check sources, take good notes, make use of information, and synthesize and present information across the subject areas. She also shows how to make research a daily practice, not a one-time essay or project. With examples and online handouts you can use immediately, this practical book is a valuable resource for educators seeking to engage students in their work and encourage them toward higher level thinking.

As a Matter of Time Austin Macauley Originally published in 1985, this classic science fiction novel from Glen Cook—best known for his series *The Black Company*—is equal parts spy thriller, murder mystery, and time-travel mind-bender. May 1975. St. Louis. In a snow-swept street, a cop finds the body of a man who died fifty years ago. It's still warm. July 1866, Lidice, Bohemia: A teenage girl calmly watches her parents die as another being takes control of her body. August 2058, Prague: Three political rebels flee in to the past, taking with them a terrible secret. As past, present, and future collide, one man holds the key to the puzzle. And if he doesn't fit it together, the world he knows will fall to pieces. It's just A Matter of Time! Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy,

steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

In a wonderful synthesis of science, history, and imagination, Gino Segrè, an internationally renowned theoretical physicist, embarks on a wide-ranging exploration of how the fundamental scientific concept of temperature is bound up with the very essence of both life and matter. Why is the internal temperature of most mammals fixed near 98.6 °? How do geologists use temperature to track the history of our planet? Why is the quest for absolute zero and its quantum mechanical significance the key to understanding superconductivity? And what can we learn from neutrinos, the subatomic "messages from the sun" that may hold the key to understanding the birth-and death-of our solar system? In answering these and hundreds of other temperature-sensitive questions, Segrè presents an uncanny view of the world around us.

Clocks and calendars rule our lives, and while time is constant, life is anything but linear. The Greeks talked about time in two ways. Chronos means measurable time. Kairos means understanding the value of a moment. As the clock ticks by, it's vital you find meaningful moments to hug your toddler, laugh with school-aged child, or have a deep conversation with your teenager. Paul encourages us in Ephesians to make the most of our time, being proactive with every minute we have. The principles in this book will help you develop skills you need to build meaningful relationships with your children, no matter where they are in life. By building on foundational principles such as consistency and intentionality, and modeling leadership values such as honor, courage, and vision, you will position your children to ultimately change their world. Remember, time is

free, but it is precious. Master your time and you will master your life.

When it comes to big dreams and schemes, young Chuck Lambert would give Walter Mitty a run for his money. In fact, Chuck 's biggest dream of all is really out of this world. Because he 's got his eyes on a prize in the sky. Chuck wants to buy a planet of his own. . . . Madman Murphy, the King of Planetary Realtors, is more than happy to oblige. He 's got a whole galaxy of planets for sale. All Chuck needs is money . . . and a lot of it. Eleven years later, saving every penny he can scrape up, Chuck 's dream comes true. He takes possession and takes off for Planet 19453X. . . . One problem: Madman Murphy has sold Chuck a world of trouble. Because on Planet 19453X the water is undrinkable, the air is unbreathable, and the laws of physics don 't apply. Has Chuck 's dream turned into a nightmare? Not quite. As he 's about to discover, sometimes, to fulfill your true desire, it 's simply a matter of digging a little deeper. . . . By the time A Matter of Matter appeared in 1949, L. Ron Hubbard 's stature as a writer was well established. As author and critic Robert Silverberg puts it: he had become a "master of the art of narrative." Hubbard 's editors urged him to apply his gift for succinct characterization, original plot, deft pacing and imaginative action to the genre of science fiction and fantasy. The rest is Sci-Fi history. Also includes the science fiction adventures, The

Conroy Diary, in which the man who opens up the universe to mankind also opens himself to charges of fraud and tax evasion; The Obsolete Weapon, the story of an American GI involved in the 1943 invasion of Italy who slips back in time and finds himself fighting a different kind of battle—as a gladiator in ancient Rome; and The Planet Makers, in which a great deal is at stake for the engineers who make planets habitable, but one of them has a surprising plan all his own. "... this is a real corker, pulp fiction at its most entertaining."—Booklist \*

Charlie Henderson. Charlie has lived a sheltered, relatively uneventful life in Fresno, California-but he's always wanted more-lots more. As his senior year of high school approaches, he vows to finally break out of his shell, leave his nerdy reputation behind, and become popular like his younger sister, Maddie. At first, everything seems to be going well for him-until one night when he, Maddie, and three of their friends are mysteriously transported back in time. They suddenly find themselves in a gosh-awful mess. With nothing but the clothes on their backs, the five teens must navigate this new place and time . . . a world filled with more chaos and danger than they have ever imagined! Charlie and his friends are trapped in a place of otherworldly tension as events unfold under a shadow of secrecy. Have they become victims of someone else's twisted idea of fun? As things escalate and multiple plots overlap, they all experience a surge of fear, like an uncoiling snake that slithers through them, turning their thoughts back to the ho-hum world they were yanked out of. Perhaps it wasn't so bad, after all. Author Tony Edwards writes realistic fiction that teens can relate with to aid them in their quest of development toward adulthood. Edwards introduces readers to Charlie, a teenager who desperately wants to be

recognized by his peers and to no longer live under his sister's shadow, something many teenagers can identify with. Interestingly, he writes not only for those who enjoy a good book but also for the many teens who do NOT like to read books. It turns out many of these reluctant young readers end up picking up the right book and not wanting to put it down! This book is an excellent example of realistic science fiction. In this coming-of-age story, teens deal with time travel, something that energizes the imagination. The book features a great deal of action, comedy, and character development. Edwards, 25, was a teen himself not that long ago and can therefore easily relate to the burden of today's youth having to live in an ever-increasing digital and virtual world. For this reason, he presents food for thought as he challenges his young readers' minds. Book Two is currently in the works!

Jory Harcourt doesn't have to go looking for trouble. Wherever he goes, it seems to find him—particularly when his partner, Sam Kage, is working undercover on a federal task force. After the recession forces him to close his business, Jory goes to work as a matchmaker and event planner. From

there, it's only a matter of time before his big mouth and up-front attitude make him the rope in a tug-of-war between a trust fund baby and a drug-smuggling criminal. Then, as if that situation weren't delicate enough, Jory's undercover lover shows up working for the smuggler. Between the men who want him and the men who just want him dead, Chicago is getting a little crowded for Jory, so on the advice of his brother, his boyfriend, and the FBI task force, he heads for Hawaii... where a serious accident threatens his quality of life. Can Sam and Jory keep the faith and prove that their relationship really is bulletproof?

When eight-year-old Vinni Stewart disappears from a Jersey shore town, Maddy, her distraught single mother, begins a desperate search for her daughter. Maddy's five-year journey leads her to a bakery in Brooklyn, where she stumbles upon something terrifying. Ultimately, her artist neighbor Evelyn reconnects Maddy to her passion for painting and guides her to a life transformed through art. Detective John D'Orfini sees more than a kidnapping in the plot-thickening twists of

chance surrounding Vinni's disappearance, but his warnings to stay away from the investigation do not deter Maddy, even when her search puts her in danger. When the Russian Mafia warns her to stop sniffing into their business, Maddy must make a choice whether to save one child—even if it might jeopardize saving her own.

A Matter Of Time Night Shade

In the current year, people live for today and fail to pay much attention for the future. We are distracted by 21st Century versions of 'bread and circus'. Several articles and Entertainment narratives promote an empty, hollow, existence depicting family life as boring and oppressive, but encouraging present-minded and shallow thrills to fill the void. Since many individuals have given up on certain received values greater than oneself--family, religion, nation--the future becomes devoid of meaning as there is, presently, little of significant non-financial value worth preserving. Financially, certain economic policies have creative incentive structures punishing long term thinking, while encouraging short term consumption. One of the many ostensible problems affecting Western Society is simple: time preferences. Time preferences can be

simplified to describe how much one values future consumption over present consumption. Time preferences are often limited to the realm of economics; however, in this book, they are expanded in an attempt to illustrate a particular social ailment in tackling the question of how one determines to live in a rapidly changing Western world to include social interactions, prevailing narratives, family, religion, and other issues. No lasting civilization can stand merely living for today--there must be an implied interest in the future beyond the life expectancy of the individual, which their children will inherit. Western birth rates have plummeted to an unprecedented low. Divorce rates and other family-oriented stats paint a bleak picture for the future. And, paradoxically, despite the wonderful GDPs we boast, individuals seem more disinclined than ever to start families--or think about the future. In this book, we delve into several potential spiritual and material reasons as to why Westerners have become so present-minded. Why collective self-confidence has been lost and vapid, cheap, entertainment seems so appealing. This book seeks to illustrate the decivilizing

---

tendencies of high time preferences--instant gratification--on a social scale, how they manifest, what causes them, and how to begin combating a temptation for present-minded consumption over something more future-oriented.
