Clocks and calendars rule our lives, and while time is constant, life is anything but linear. The Greeks talked about time in two ways. Chronos means measurable time. Kairos means understanding the value of a moment. As the clock ticks by, it's vital you find meaningful moments to hug your toddler, laugh with school-aged child, or have a deep conversation with your teenager. Paul encourages us in Ephesians to make the most of our time, being proactive with every minute we have. The principles in this book will help you develop skills you need to build meaningful relationships with your children, no matter where they are in life. By building on foundational principles such as consistency and intentionality, and modeling leadership values such as honor, courage, and vision, you will position your children to ultimately change their world. Remember, time is free, but it is precious. Master your time and you will master your life.

Climate Psychology offers ways to work with the unthinkable and emotionally unendurable current predicament of humanity. The style and writing interweave passion and reflection, animation and containment, radical hope and tragedy to reflect the dilemmas of our collective crisis. The authors model a relational approach in their styles of writing and in the book's structure. Four chapters, each with a strikingly original voice and insight, form the core of the book, held either end by two jointly written chapters. In contrast to a psychology that focuses on individual behaviour change, the authors use a transdisciplinary mix of approaches (depth psychology and psychotherapy, earth systems, deep ecology, cultural sociology, critical history, group and institutional outreach) to bring into focus the predicament of this period. While the last decade required a focus on climate denial in all its manifestations (which continues in new ways), a turning point has now been reached. Increasingly extreme weather across the world is making it impossible for simple avoidance of the climate threat. Wendy Hollway, Paul Hoggett, Chris Robertson, and Sally Weintrobe address how climate

psychology illuminates and engages the life and death challenges that face terrestrial life. This book will appeal to three core groups. First, mental health and social care professionals wanting support in containing and potentially transforming the malaise. Second, activists wanting to participate in new stories and practices that nurture their engagement with the present social and cultural crisis. Third, those concerned about the climate emergency, wanting to understand the deeper context for this dangerous blindness.

From New York Times bestselling author Mary Balogh comes a classic historical tale that sizzles with romance and unforgettable drama. Reginald Mason is wealthy, refined, and, by all accounts, a gentleman. However, he is not a gentleman by title, a factor that pains him and his father within the Regency society that upholds station over all else. That is, until an opportunity for social advancement arises, namely, Lady Annabelle Ashton. Daughter of the Earl of Havercroft, a neighbor and enemy of the Mason family, Annabelle finds herself disgraced by a scandal, one that has left her branded as damaged goods. Besmirched by shame, the earl is only too happy to marry Annabelle off to anyone willing to have her. Though Reginald Mason, Senior, wishes to use Annabelle to propel his family up the social ladder, his son does not wish to marry her, preferring instead to live the wild, single life he is accustomed to. With this, Reginald Senior serves his son an ultimatum: marry Annabelle, or make do without family funds. Having no choice, Reginald consents, and enters into a hostile engagement in which the prospective bride and groom are openly antagonistic, each one resenting the other for their current state of affairs while their respective fathers revel in their suffering. So begins an intoxicating tale rife with dark secrets, deception, and the trials of love—a story in which very little is as it seems. With an author Q&A and reading group guide!

\_\_\_\_\_ Can a man with a past and a woman from the future forge a love for all time? Nobody would blame widowed doctoral student Eliza James for giving up on Happily Ever After; at twenty-nine, she's suffered more loss than most people do in a lifetime. But Eliza's convinced her own hero is still out there, waiting for her, just like in the beloved romance novels she devours. Every Jane Austen-loving girl deserves a Darcy, right? Only Eliza doesn't dream of a modern-day affair: she wants the whole Regency experience. When a magical manuscript thrusts her back two hundred years into the arms and life of one Deveric Mattersley, Duke of Claremont, however, Eliza realizes some fantasies aren't all they're cracked up to be, especially when her duke proves himself less than a Prince Charming. Convinced he's at fault for the death of his wife, Deveric Mattersley has no interest in women, much less marriage. Determined to atone for his sins, he decrees himself content to focus on running his family's estates, and on raising his son-until the mysterious Mrs. James appears. Who is she? What does she want? And why does she make Dev's blood run hot in a way no woman ever has? A charming time-travel Regency romance full of wit and humor, A Matter of Time reminds us that, like books, you can't judge people by their covers, and that love often comes when least expected. \_\_\_\_\_

In August 1972, Newsweek proclaimed that "the person in Washington who has done the most for the women's movement may be Richard Nixon." Today, opinions of the Nixon administration are strongly colored by foreign policy successes and the Watergate debacle. Its accomplishments in advancing the role of women in government have been largely forgotten. Based on the "A Few Good Women" oral history project at the Penn State University Libraries, *A Matter of Simple Justice* illuminates the administration's groundbreaking efforts to expand the role of women—and the long-term consequences for women in the American workplace. At the forefront of these efforts was Barbara Hackman Franklin, a staff assistant to the president who was hired to recruit more women into the upper levels of the federal government. Franklin, at the direction of President Nixon, White House counselor Robert Finch, and personnel director Fred Malek, became the administration's de facto spokesperson on women's issues. She helped bring more than one hundred women into executive positions in the government and created a talent bank of more than a thousand names of qualified women. The Nixon administration expanded the numbers of women on presidential commissions and boards, changed civil service rules to open thousands more federal jobs to women, and expanded enforcement of antidiscrimination laws to include gender discrimination. Also during this time, Congress approved the Equal Rights Amendment and Nixon signed Title IX of the Education Amendments into law. Featuring a new forward by Sara Eisen,

this updated edition of *A Matter of Simple Justice* celebrates the 100th anniversary of women's suffrage in the United States through the story of Barbara Hackman Franklin and those "few good women" and shows how the advances that were made in this time by a Republican presidency both reflected the national debate over the role of women in society and took major steps toward equality in the workplace for women.

One of "our most insightful social observers"\* cracks the great political mystery of our time: how conservatism, once a marker of class privilege, became the creed of millions of ordinary Americans. With his acclaimed wit and acuity, Thomas Frank turns his eye on what he calls the "thirty-year backlash"—the populist revolt against a supposedly liberal establishment. The high point of that backlash is the Republican Party's success in building the most unnatural of alliances: between blue-collar Midwesterners and Wall Street business interests, workers and bosses, populists and right-wingers. In asking "what 's the matter with Kansas?"—how a place famous for its radicalism became one of the most conservative states in the union—Frank, a native Kansan and onetime Republican, seeks to answer some broader American riddles: Why do so many of us vote against our economic interests? Where's the outrage at corporate manipulators? And whatever happened to middle-American progressivism? The questions are urgent as well as provocative. Frank answers them by examining pop conservatism—the bestsellers, the radio talk shows, the vicious political combat—and showing how our long culture wars have left us with an electorate far more concerned with their leaders' "values" and

down-home qualities than with their stands on hard questions of policy. A brilliant analysis—and funny to boot—What's the Matter with Kansas? presents a critical assessment of who we are, while telling a remarkable story of how a group of frat boys, lawyers, and CEOs came to convince a nation that they spoke on behalf of the People. \*Los Angeles Times
