“ An original fantasy filled with magic and culture, the story of a character torn between two names, two loyalties, and two definitions of good and evil. ” —Kevin J. Anderson, New York Times bestselling author of Spine of the Dragon Wen Alder was born into two worlds. On his father ’ s side, a legacy of proud loyalty and service to the god-like Sienese Emperor spanning generations. And it is expected that Alder, too, will follow this tradition by passing the Imperial exams, learning the accepted ways of magic and, if he serves with honor, enhancing his family's prominence by rising to take a most powerful position in Sien—the Hand of the Emperor. But from his mother he has inherited defiance from the Empire, a history of wild gods and magic unlike anything the Imperial sorcerers could yet control. It began when his spirited, rebellious grandmother took Alder into the woods and introduced him to her ways—ways he has never been able to forget. Now, on the verge of taking the steps that will forge the path of his life, Alder discovers that the conflict between the Empire and the resistance is only the beginning of a war that will engulf both heaven and earth, gods and man—and he may be the key to final victory for whichever side can claim him as their own... “ Sublime prose and pin-sharp characterisation combine to produce a captivating epic of conflicted loyalties and dangerous ambition. ” —Anthony Ryan, New York Times bestselling author “ The Hand of the Sun King is not the gentle story of a boy ’ s rise to power, instead, it digs its fingernails into the layers of an empire that would consume and erase half that boy ’ s identity. Brilliantly told and immediately engrossing, filled with magic, mistakes and their merciless consequences. ” —Andrea Stewart, author of The Bone Shard Daughter “ The Hand of the Sun King is an outstanding debut novel with very well-conceived world building and an excellent, original magic system, and twists that will keep you reading late into the night and guessing until the very end. The thing that really makes it shine is the main character—I really loved his development throughout the story. Alder is a character I look forward to

following for multiple books to come. ” —Michael Mammay, author of the Planetside series “ A great coming of age story about a foolish boy who seeks to unravel the secrets of magic and maybe do something good in the process. I absolutely loved it. ” —Nick Martell, author of Kingdom of Liars “ Well written, thought provoking and enjoyable, The Hand of the Sun King is an impressive debut novel that left me eager for more. ” —Lisbeth Campbell, author of The Vanished Queen “ A great debut novel. ” —SFFWorld “ A spellbinding debut with terrific characterisations, immersive world-building, and prose that swept me away ... hands down the best debut of the year. Scratch that; this is one of the best debuts I've ever read. ” —Novel Notions “ Exquisite ... Greathouse's characterisation, his prose, and worldbuilding are an absolute triumph. ” —The Fantasy Hive “ An excellent mix of classic and modern fantasy with a grimdark undertone of despair. ” —Grimdark Magazine “ The Hand of the Sun King is an enjoyable novel that pays great homage to the traditions and mythologies it borrows from. ” —Quill to Live “ Teeming with culture, doused in war, political intrigue ... but strikes out its own path in the genre. ” —FanFiAddict “ Set in a fantastical world of magic with a rich history, this novel fits beautifully into its genre while also addressing some failings of the genre by turning them on their head. ” —Dawn Vogel, History That Never Was

The one hundred year history of how Europe coerced the African continent into its various empires--and the resulting story of how Africa succeeded in decolonization. In this dramatic (and often tragic) story of an era that radically changed the course of world history, Lawrence James investigates how, within one hundred years, Europeans persuaded and coerced Africa into becoming a subordinate part of the modern world. His narrative is laced with the experiences of participants and onlookers and

introduces the men and women who, for better or worse, stamped their wills on Africa. The continent was a magnet for the high-minded, the adventurous, the philanthropic, the unscrupulous. Visionary pro-consuls rubbed shoulders with missionaries, explorers, soldiers, big-game hunters, entrepreneurs, and physicians. Between 1830 and 1945, Britain, France, Belgium, Germany, Portugal, Italy and the United States exported their languages, laws, culture, religions, scientific and technical knowledge and economic systems to Africa. The colonial powers imposed administrations designed to bring stability and peace to a continent that appeared to lack both. The justification for occupation was emancipation from slavery--and the common assumption that late nineteenth-century Europe was the summit of civilization. By 1945 a transformed continent was preparing to take charge of its own affairs, a process of decolonization that took a quick twenty years. This magnificent history also pauses to ask: what did not happen and why?

"A surgeon internationally recognized for his expertise in heart and lung transplants . . . writes with assurance and aplomb about his achievements." —Kirkus Reviews Stuart Jamieson has lived two lives. One began in heat and dust. Born to British ex-pats in colonial Africa, Jamieson was sent at the age of eight to a local boarding school, where heartless instructors bullied and tormented their students. In the summers he escaped to fish on crocodile-infested rivers and explore the African bush. As a teenager, an apprenticeship with one of Africa's most fabled trackers taught Jamieson how to deal with dangerous game and even more dangerous poachers, lessons that would later serve him well in the high-stakes career he chose. Jamieson's second life unfolded when he went to London to study medicine during the turbulent 1960s, leaving behind the only home he knew as it descended into revolution. Brilliant and self-assured, Jamieson advanced quickly in the still-new field of open-heart surgery. It was a fraught time. For patients with terminal heart disease, heart transplants were the new hope. But poor outcomes had all but ended the procedure. In 1978 Jamieson came to America and to Stanford—the only cardiac center in the world doing heart transplants successfully. Here, Jamieson's pioneering work on the anti-rejection drug cyclosporin would help to make heart transplantation a routine life-saving operation, that is still in practice today as he continues to train the next generation of heart surgeons. Stuart Jamieson's story is the story of four decades of advances in heart surgery. "Every reader interested in the history behind one of medicine's riskiest procedures will find it fascinating." —Booklist *A Raisin in the Sun* McSweeney's

Meeting Daniel, a barely recovered drug addict ready to start living life on his own terms, might just change that. There are two problems. One: William isn't out. What's the point in telling your friends you're bisexual when you aren't going to date anyone? Two: Daniel's abusive ex-boyfriend still roams the university campus, searching for cracks in Daniel's recovery. No matter how quickly William falls for Daniel, their friendship is too important to risk ruining over a crush. William is fine with being just friends for the rest of forever. Well, not quite. A moving portrait of Africa from Poland's most celebrated foreign correspondent - a masterpiece from a modern master. Famous for being in the wrong places at just the right times, Ryszard Kapuscinski arrived in Africa in 1957, at the beginning of the end of colonial rule - the "sometimes dramatic and painful, sometimes enjoyable and jubilant" rebirth of a continent. The Shadow of the Sun sums up the author's experiences ("the record of a 40-year marriage") in this place that became the central obsession of his remarkable career. From the hopeful years of independence through the bloody disintegration of places like Nigeria, Rwanda and Angola, Kapuscinski recounts great social and political changes through the prism of the ordinary African. He examines the rough-and-ready physical world and identifies the true geography of Africa: a little-understood spiritual universe, an African way of being. He looks also at Africa in the wake of two epoch-making changes: the arrival of AIDS and the definitive departure of the white man. Kapuscinski's rare humanity invests his subjects with a grandeur and a dignity unmatched by any other writer on the Third World, and his unique ability to discern the universal in the particular has never been more powerfully displayed than in this work.

From the author of *A Tangle of Knots* and *Absolutely Almost*, a touching story about a boy who won't let one tragic accident define him. Trent's pretty positive the entire disaster was his fault, so for him middle school feels like a fresh start, a chance to prove to everyone that he's not the horrible screw-up they seem to think he is. If only Trent could make that fresh start happen. It isn't until Trent gets caught up in the whirlwind that is Fallon Little—the girl with the mysterious scar across her face—that things begin to change. Because fresh starts aren't always easy. Our sun is one star among 50 billion in the galaxy. Our galaxy is only one among 50 billion in the universe. With a vastness this incomprehensible, it is easy to feel like we are mere specks of sand on an endless shore. But our sun is special. Though roughly 150 million kilometers separate us, we could not be more connected.

DIV/divDIVWe have understood the sun's importance for millennia. The earliest humans, awestruck by its blazing splendor, left drawings of the sun on cave walls. It's 1897. Gold has been discovered in the Yukon. New York is under the sway of Hearst and Pulitzer. And in a few months, an American battleship will explode in a Cuban harbor, plunging the U.S. into war. Spanning five years and half a dozen countries, this is the unforgettable story of that extraordinary moment: the turn of the twentieth century, as seen by one of the greatest storytellers of our time. Shot through with a lyrical intensity and stunning detail that recall Doctorow and Deadwood both, *A Moment in the Sun* takes the whole era in its sights—from the white-racist coup in Wilmington, North Carolina to the bloody dawn of U.S. interventionism in the Philippines. Beginning with Hod Brackenridge searching for his fortune in the North, and hurtling forward on the voices of a breathtaking range of men and women—Royal Scott, an African American infantryman whose life outside the military has been destroyed; Diosdado Concepción, a Filipino insurgent fighting against his country's new colonizers; and more than a dozen others, Mark Twain and President McKinley's assassin among them—this is a story as big as its subject: history rediscovered through the lives of the people who made it happen.

Written in Irvin Yalom's inimitable story-telling style, *Staring at the Sun* is a profoundly encouraging approach to the universal issue of mortality. In this magisterial opus, capping a lifetime of work and personal experience, Dr Yalom helps us recognise that the fear of death is at the heart of much of our day-to-day anxiety. This reality is often brought to the surface by an 'awakening experience' – a dream, a loss (such as the death of a loved one, a divorce, or the loss of a job or home), illness, trauma, or ageing. Once we confront our own mortality, Dr Yalom writes, we are inspired to rearrange our priorities, communicate more deeply with

those we love, appreciate more keenly the beauty of life, and increase our willingness to take the risks necessary for personal fulfillment. This is a book with tremendous utility, including the provision of techniques for dealing with the most prevalent kinds of fears of death – especially by living in the here and now, and by embracing what Dr Yalom calls ‘rippling’, the influence and impact we all have that has a life beyond our own.
