Reproduction.
Many features of the penguin life cycle vary with body size and geographic distribution; the chronology of breeding may also vary within a species in relation to latitude. The majority of species breed only once each year. Certain species, such as the African

penguin (*Spheniscus demersus*), probably other members of this genus, and the blue penguin, breed twice a year.

A Natural History of Rape - The New York Times

Natural history is a domain of inquiry involving organisms, including animals, fungi, and plants, in their natural environment, leaning more towards observational than experimental methods of study. A person who studies natural history is called a naturalist or natural historian. Natural history encompasses scientific research but is not limited to it. It involves the

systematic study of any category of natural objects or organisms. So while it dates from studies in the ancient Greco-Roman world

Natural History (Pliny) - Wikipedia

The study and description of living things and natural objects, especially their origins, evolution, and relationships to one another. Natural history includes the sciences of zoology, mineralogy, geology, and paleontology. The American Heritage® Student Science Dictionary, Second Edition.

Natural history - definition of natural history by The ...

The Natural History is a work by Pliny the

Elder. It is one of the largest single works to have survived from the Roman Empire to the modern day and purports to cover all ancient knowledge. The work's subject area is thus not limited to what is today understood by natural history; Pliny himself defines his scope as "the natural world, or life". It is encyclopedic in scope, but its structure is not like that of a modern encyclopedia. It is the only work by Pliny to have survived, and the last tha

A Natural History of the Sonoran Desert: Revised and ...

A Natural History of the Sonoran Desert provides the most complete collection of Sonoran Desert natural history information ever compiled and is a perfect introduction to this biologically rich desert of North America. Penguin - Natural history / Britannica

A natural history guide is a dynamic document, and this is a critical time for a new edition. As larger and larger molecular data sets are gathered through next-generation sequencing (both 16S rRNA gene tag sequencing and metagenomics), this natural history guide will enable cross-study comparisons and syntheses that are currently not feasible.

Rob DeSalle is curator at the American Museum of Natural History, where he has curated or cocurated six highly praised exhibitions and leads a research group in the Institute for Comparative Genomics. He is the author or coauthor of fifteen books, including *Our Senses*, *Welcome to the Genome*, *The Accidental Homo Sapiens* and *The Brain: Big Bangs, Behaviors and Beliefs*.
