ECPA 2017 Christian Book Award Finalist This classic

one-volume reference work has been appreciated for decades. It is now substantially expanded and revised to focus on a variety of theological themes, thinkers and movements. From African Christian Theology to Zionism, this volume of historical and systematic theology offers a wealth of information and insight for students, pastors and all thoughtful Christians. Over half of the more than eight hundred articles are new or rewritten with hundreds more thoroughly revised. Fully one-third larger than its predecessor, this volume focusing on systematic and historical theology has added entries and material on theological writers and themes in North America and around the world. Helpful bibliographies have also been updated throughout. Over

three hundred contributors form an international team of renowned scholars including Marcella Altaus-Reid, Richard Bauckham, David Bebbington, Kwame Bediako, Todd Billings, Oliver Crisp, Samuel Escobar, John Goldingay, Tremper Longman III, John McGuckin, Jennifer McNutt, Michael J. Nasir-Ali, Bradley Nassif, Mark Noll, Anthony Thiselton, John Webster and N. T. Wright. This new edition combines excellence in scholarship with a high standard of clarity and profound insight into current theological issues. Yet it avoids being unduly technical. Now an even more indispensable reference, this volume is a valuable primer and introduction to the grand spectrum of theology. Sarah Coakley and the Future of Systematic Theology

This book formulates a new theological approach to the study of religion in gaming. Video games have become one of the most important cultural artefacts of modern society, both as mediators of cultural, social, and religious values and in terms of commercial success. This has led to a significant increase in the

critical analysis of this relatively new medium, but theology as an academic discipline is noticeably behind the other humanities on this subject. The book first covers the fundamentals of cultural theology and video games. It then moves on to set out a Christian systematic theology of gaming, focussing on creational theology, Christology, anthropology, evil, moral theology, and thanatology. Each chapter introduces case studies from video games connected to the specific theme. In contrast to many studies which focus on online multiplayer games, the examples considered are largely single player games with distinct narratives and 'end of game' moments. The book concludes by synthesising these themes into a new theology of video games. This study addresses a significant aspect of contemporary society that has yet to be discussed in any depth by theologians. It is, therefore, a fantastic resource for any scholar engaging with the

religious aspects
of digital and
popular culture.

In this concise, one-volume systematic theology, celebrated scholar Anthony Thiselton comprehensively covers the spectrum of Christian doctrine with an eye to practical application for Christian discipleship. Written with students and busy ministers in mind, this book is readable and accessible, comprising fifteen chapters of relatively equal length, with each chapter containing five evenly balanced subsections for teaching and learning convenience. Rather than setting out an abstract system, Thiselton explores theology as a living, organic whole. The book thus includes biblical foundations, historical thought, contemporary writers, and practical implications. Expertly incorporating biblical exegesis, philosophy, conceptual grammar, and hermeneutics, this work is the most succinct

multidisciplinary systematic theology available.

God--The World's Future has been a proven and comprehensive textbook in systematic theology for over twenty years. Explicitly crafted to address our postmodern context, Peters explains the whole body of Christian historical doctrine from within a "roleptic" framework, "hereby the gospel is understood as announcing the pre-actualization of the future consummation of all things in Jesus Christ." Peters skillfully deploys this concept not only to organize the various theological areas or loci but also to rethink doctrines in light of key postmodern challenges from ecumenism, critical historical thinking, contemporary science, and gender and sexuality issues. The Third Edition is thoroughly revised

with updated chapters, additional chapters, updated annotations and bibliographies, and further elaborations in light of recent developments in method and theological reflection. This classic text opens up systematic theology in new dimensions, retrieving traditional categories and topics for a new generation of students and learners to give a fresh reading of Christian theology and articulation of the liberating message of the gospel of God's grace for the future of the world.

The aim of systematic theology is to engage not only the head but also the heart and hands. Only recently has the church compartmentalized these aspects of life—separating the academic discipline of theology from the spiritual disciplines of faith and obedience. This multivolume work brings together rigorous historical and theological scholarship with spiritual disciplines and practical insights—characterized by a simple, accessible, comprehensive, Reformed, and experiential approach. In this volume, Joel R. Beeke and Paul M. Smalley shift from the doctrine of God (theology proper) to the doctrine of humanity (anthropology) and the doctrine of Christ (Christology). This extensive reformed theology explores the Bible's teaching about who we are and why we were created, as well as who Jesus is and why his divinity is essential to the Christian faith.

Originally published in 1949 and then revised in 1979, this

comprehensive introduction to systematic theology has well served countless students and pastors for more than half a century. In this paperback edition it will continue to instruct serious students of the Bible and theology. Following two introductory chapters delineating the nature, necessity, possibility, and divisions of theology, Henry Clarence Thiessen systematically address a wide range of subjects in eight major sections -- Theism, Bibliology, Theology, Anthropology, Soteriology, Ecclesiology, Angelology, and Eschatology. Also included are two specialized indexes for further study -- an Index of Subjects and an Index of Scriptural References that includes over 4,000 entries. *Systematic Theology* Routledge

In this volume, the third and last of his *Systematic Theology*, Paul Tillich sets forth his ideas of the meaning of human life, the doctrine of the Spirit and the church, the trinitarian symbols, the relation of history to the Kingdom of God, and the eschatological symbols. He

handles this subject matter with powerful conceptual ability and intellectual grace. The problem of life is ambiguity. Every process of life has its contrast within itself, thus driving man to the quest for unambiguous life or life under the impact of the Spritual Presence. The Spritual Presence conquers the negativities of religion, culture, and morality, and the symbols anticipating Eternal Life present the answer to the problem of life.

This comprehensive systematic theology by respected theologian Robert Letham covers the whole field of Reformed Christian doctrine from biblical, historical, and theological angles. Letham begins with God's ultimate selfrevelation as the Father, the Son, and the Holy Spirit in indivisible union, continuing on with the works of God in creation, providence, and

grace. He draws deeply from Scripture and important voices from the church to provide a clear and concise articulation of the Reformed faith. He also addresses current issues such as feminism, charismatic gifts, sexual ethics, environmentalism, other religions, the nature of truth, and civil liberties. Each chapter is followed by discussion questions, with a glossary of terms included at the end. This work grounds theological understanding and practice in the life and ministry of the church, accessible to pastors, students, scholars, and anyone who desires to understand, believe, and live scriptural doctrine more fully.

Systematic Theology New Growth Press

This is the first part of Paul

Tillich's three-volume *Systematic Theology*, one of the most profound statements of the Christian message ever composed and the summation and definitive presentation of the theology of the most influential and creative American theologian of the twentieth century. In this path-breaking volume Tillich presents the basic method and statement of his system—his famous "correlation" of man's deepest questions with theological answers. Here the focus is on the concepts of being and reason. Tillich shows how the quest for revelation is integral to reason itself. In the same way a description of the inner tensions of being leads to the recognition that the quest for God is implied in finite being. Here also Tillich defines his thought in relation to philosophy and the Bible and sets forth his famous doctrine of God as the "Ground of Being." Thus God is understood not as a being existing beside other beings, but as being-itself or the power of being in everything. God cannot be made into an object; religious knowledge is, therefore,

necessarily symbolic.

Systematic Theology, a Modern Protestant

"Systematic Theology" in 3 volumes is one of the best-known works by the American Baptist minister and theologian Augustus Hopkins Strong. This carefully crafted Good Press ebook is formatted for your eReader with a functional and detailed table of contents. Excerpt: "Under the influence of Ritschl and his Kantian relativism, many of our teachers and preachers have swung off into a practical denial of Christ's deity and of his atonement. We seem upon the verge of a second

Unitarian defection that will break up churches and compel secessions, in a worse manner than did that of Channing and Ware a century ago. American Christianity recovered from that disaster only by vigorously asserting the authority of Christ and the inspiration of the Scriptures. We need a new vision of the Savior like that which Paul saw on the way to Damascus and John saw on the isle of Patmos, to convince us that Jesus is lifted above space and time, that his existence antedated creation, that he conducted the march of Hebrew history, that he was born of a virgin, suffered on the cross, rose from the dead, and now lives forevermore, the Lord of the universe, the only God with whom we have to do, our Savior here and our Judge hereafter. Without a revival of this faith our churches will become secularized, mission enterprise will die out, and the candlestick will be removed

out of its place as it was with the seven churches of Asia, and as it has been with the apostate churches of New England." Contents: Idea of Theology Method of Theology The Existence of God Origin of Our Idea of God's Existence Corroborative Evidences of God's Existence The Scriptures A Revelation from God The Nature, Decrees, and Works of God The Attributes of God Doctrine of the Trinity The Decrees of God The Works of God Anthropology, Or the Doctrine of Man: The Original State of Man Sin, Or Man's State Of Apostasy Soteriology Christology The Reconciliation of Man to God Ecclesiology, Or the Doctrine of the Church Eschatology...

Systematic Theology: Volume Two University of Chicago Press Michael Horton's highly anticipated *The Christian Faith* represents his magnum opus and will be viewed as one of—if not the—most important systematic theologies since Louis Berkhof

wrote his in 1932. A prolific, award-winning author and theologian, Professor Horton views this volume as “doctrine that can be preached, experienced, and lived, as well as understood, clarified, and articulated.” It is written for a growing cast of pilgrims making their way together and will be especially welcomed by professors, pastors, students, and armchair theologians. Features of this volume include: (1) a brief synopsis of biblical passages that inform a particular doctrine; (2) surveys of past and current theologies with contemporary emphasis on exegetical, philosophical, practical, and theological questions; (3) substantial interaction with various Christian movements within the Protestant, Catholic and Orthodoxy traditions, as well as the hermeneutical issues raised by postmodernity; and (4) charts, sidebars, questions for discussion, and an extensive bibliography, divided into different entry levels and topics.

In Christian theology, the teaching that Christ possessed both a human and divine will is central to the doctrine of two natures, but it also represents a logical paradox, raising questions about how a person can be both impeccable and subject to temptation. This volume explores these questions through an analytic theology approach, bringing together 15 original papers that explore the implications of a strong libertarian concept of free will for Christology. With perspectives from systematic theologians, philosophers, and biblical scholars, several chapters also offer a comparative theology approach, examining the concept of impeccability in the Muslim tradition. Therefore, this volume will be of interest to scholars and graduate

students working in analytic theology, biblical scholarship, systematic theology, and Christian-Islamic dialogue.
