From New York Times bestselling author Helena Hunting comes a new romance about trading secrets, breaking the rules, and playing for keeps. My name is Ryan Kingston, and I'm a rule follower. I've never been in a fistfight. I always obey the speed limit. I don't get drunk, and I definitely don't pick up random women at bars. Except the night I found out that my whole existence has been a lie. I got drunk. And picked up a stranger. Her name was Queenie, and she was everything I'm not: reckless, impulsive, and chaotic. We did shots and traded secrets. And ended up naked at my place. She left me a thank-you note in the morning and her panties as a parting gift. But no way to contact her. Six weeks later I'm sitting in the first official team meeting of the season, and there she is. I neglected to mention that I'm the goalie for Seattle's NHL team. And Queenie? Turns out she's the general manager's daughter.

A toxic relationship crumbled my self-esteem, so when my uncle needs someone to temporarily run his butcher shop, I swap the hectic city for small-town life. I have no idea what butchering entails, and Wilder James, the sexy--albeit grumpy--rancher, reminds me of it every time I see him. His snap judgment of me because I'm a city girl is infuriating, but I'm forced to work with him. It isn't until he begins to drop his guard that I learn the reasons for the walls around his heart. My ex's words cut deep, sitting like invisible wounds on my skin, but Wilder is crumbling every insecurity, showing me what it feels like to be wanted. My time in Mason Creek is temporary, and soon I'll have to say the hardest goodbye.

Finally Again Zoe Dawson

The way people buy has gone through a massive revolution in recent years: thanks to blogs, review sites and chat rooms, we no longer have to rely on what a company says about its products and services - we can read what our fellow consumers think about what they've bought, and make our own decisions bearing those views in minds. The result? Empowered customers who know exactly what they want and who can now explore many ways to get it. Many companies, however, just won't accept that things have changed and haven't adjusted their marketing efforts to match. In *Crowd Surfing*, David Brain and Martin Thomas explain what marketers, advertisers and brand specialists need to do to communicate with today's savvier consumers. They include case studies of successes and failures from the business world and beyond, and interview leaders such as Michael Dell and Sebastian Coe to help illustrate their points.

The Messy Lives of Book People Simon and Schuster

Read the news about America's colleges and universities—rising student debt, affirmative action debates, and conflicts between faculty and administrators—and it's clear that higher education in this country is a total mess. But as David F. Labaree reminds us in this book, it's always been that way. And that's exactly why it has become the most successful and sought-after source of learning in the world. Detailing American higher education's unusual struggle for survival in a free market that never guaranteed its place in society—a fact that seemed to doom it in its early days in the nineteenth century—he tells a lively story of the entrepreneurial spirit that drove American higher education to become the best. And the best it is: today America's universities and colleges produce the most scholarship, earn the most Nobel prizes, hold the largest endowments, and attract the most esteemed students and scholars from around the world. But this was not an inevitability. Weakly funded by the state, American schools in their early years had to rely on student tuition and alumni donations in order to survive. This gave them tremendous autonomy to seek out sources of financial support and pursue unconventional opportunities to ensure their success. As Labaree shows, by striving as much as possible to meet social needs and fulfill individual ambitions, they developed a broad base of political and financial support that, grounded by large undergraduate programs, allowed for the most cutting-edge research and advanced graduate study ever conducted. As a result, American higher education eventually managed to combine a unique mix of the populist, the practical, and the elite in a single complex system. The answers to today's problems in higher education are not easy, but as this book shows, they shouldn't be: no single person or institution can determine higher education's future. It is something that faculty, administrators, and students—adapting to society's needs—will determine together, just as they have always done.
