The state of contemporary music is dizzyingly diverse in terms of style, media, traditions, and techniques. How have trends in music developed over the past decades? *Music Composition in the 21st Century* is a guide for composers and students that helps them navigate the often daunting complexity and abundance of resources and influences that confront them as they work to achieve a personal expression. From pop to classical, the book speaks to the creative ways that new composers mix and synthesize music, creating a music that exists along a more continuous spectrum rather than in a series of siloed practices. It pays special attention to a series of critical issues that have surfaced in recent years, including harmony, the influence of minimalism, the impact of technology, strategies of "openness," sound art, collaboration, and improvisation. Robert Carl identifies an emerging common practice that allows creators to make more informed aesthetic and technical decisions and also fosters an inherently positive approach to new methods.

Integrating musical activities in the elementary school classroom can assist in effectively teaching and engaging students in Language Arts, Science, Math, and Social Studies, while also boosting mental, emotional and social development. However, many elementary education majors fear they lack the needed musical skills to use music

successfully. Future elementary school teachers need usable, practical musical strategies to easily infuse into their curriculum. Written for both current and future teachers with little or no previous experience in music, *Using Music to Enhance Student Learning, Second Edition* offers strategies that are not heavily dependent on musical skills. While many textbooks are devoted to teaching music theory skills, this textbook is dedicated to pedagogy – the actual teaching of music – particularly in those schools without a separate music class in their curriculum. The ultimate goal is for future teachers to provide their elementary school classes with engaging learning experiences. These learning experiences are clearly presented to enable children to acquire knowledge in all subject areas within a joyful, creative environment rich with music activities. New to the second edition are the animated listening maps, more audio tracks, a new guitar unit, expanded coverage in the recorder unit, a connection with visual art and music, expanded activities in American history and math, and updated research and statistics. The prevailing discourse surrounding urban music education suggests the deficit-laden notion that urban school settings are "less than," rather than "different than," their counterparts. Through the lens of contextually-specific teaching, this book provides a counternarrative on urban music education that encourages urban music teachers to focus on the strengths of their students as their primary resource. Through a combination of research-based strategies and practical suggestions from the author's own experience teaching music in urban settings, the book highlights important issues for teachers to consider, such as culturally relevant pedagogy, the "opportunity gap," race, ethnicity, socioeconomic status, musical content, curricular change, music program development, student motivation, and strategies for finding inspiration and support. Throughout the book, the stories of five highly successful urban music teachers are highlighted, providing practical, real-world advice for music teachers across the domains of general, choral, band, and string music teaching. Recognizing that the term "urban" can encompass a wide variety of different school and community settings, this book challenges all teachers who work in under-served and under-resourced settings to take a critical look at their own music classroom and work to tailor their pedagogy to meet the particular needs of their students.

A Practical Guide to Becoming a Composer Oxford University Press, USA

From Grammy-winning musical icon and legendary bassist Victor L. Wooten comes an inspiring parable of music, life, and the difference between playing all the right notes...and feeling them. The Music Lesson is the story of a struggling young musician who wanted music to be his life, and who wanted his life to be great. Then, from nowhere it seemed, a teacher arrived. Part musical genius, part philosopher, part eccentric wise man, the teacher would guide the young musician on a spiritual journey, and teach him that the gifts we get from music mirror those from life, and every movement, phrase, and chord has its own meaning...All you have to do is find the song inside. "The best book on music (and its connection to the mystic laws of life) that I've ever read. I learned so much on every level."—Multiple Grammy Award-winning saxophonist Michael Brecker

A Comprehensive Guide to Music Therapy Yale University Press

The Viewpoints is a technique of improvisation that grew out of the postmodern dance world. It was first articulated by choreographer Mary Overlie, who broke down the two dominant issues performers deal with—space and time—into six categories. Since that time, directors Anne Bogart and Tina Landau have expanded her notions and adapted them for actors to function together spontaneously and intuitively and to generate bold, theatrical work. The Viewpoints are a set of names given to certain principles of movement through time and space—they constitute a language for talking about what happens on stage. Coupling this with Composition, which is the practice of selecting and arranging the separate components of theatrical language into a cohesive work of art, provides theatre artists with an important new tool for creating and understanding their art form. Primarily intended for the many theatre artists who, in the last several years, have become intrigued with Viewpoints yet have had no single source to refer to in their investigations. It can also be used by anyone with a general interest in collaboration and the creative process, whether in art, business or daily life. Anne Bogart is Artistic Director of the SITI Company, which she founded with Japanese director Tadashi Suzuki in 1992. She is the recipient of two OBIE Awards and a Bessie Award, and is an associate professor at Columbia University. Her recent works include *Alice's Adventures*; *Bobrauschenbergamerica*; *Small Lives, Big Dreams*; *Marathon Dancing*; and *The Baltimore Waltz*. Tina Landau, noted director and playwright, whose original work includes *Space* (*Time* magazine 10 Best), *Dream True* (with composer Ricky Ian Gordon) and *Floyd Collins* (with composer Adam Guettel), which received the Lucille Lortel Award for Best Musical, an OBIE Award and seven Drama Desk nominations. She has been an ensemble member of the Steppenwolf Theatre Company since 1997.
