Yet none have been reported missing. And in 2122, twenty years ago, a North clone billionaire was horrifically murdered in the same manner on the tropical planet of St Libra. So, if the murderer is still at large, was Angela Tramelon wrongly convicted? She never wavered under interrogation, claiming she alone survived an alien attack. Investigating this potential alien threat now becomes the Human Defence Agency's top priority. St Libran bio-fuel is the lifeblood of Earth's economy and must be secured. A vast expedition is mounted via the Newcastle gateway, and experts are dispatched to the planet - with Angela Tramelon, grudgingly released from prison. But the expedition is cut off deep within St Libra's rainforests, and the murders begin. Angela insists it's the alien, but her new colleagues aren't sure. Did she see an alien, or does she have other reasons for being on St Libra? *Fuzzy Nation* Pan Macmillan *Mindstar Rising* is the first in Peter F. Hamilton's

For the first time in a single volume, Peter F. Hamilton 's acclaimed novels—Mindstar Rising and A Quantum Murder—set in a near-future so real it seems ripped from tomorrow 's headlines In Mindstar Rising, Greg Mandel, gifted—or cursed—with biotechnology that makes him a living lie detector, is hired to investigate corporate espionage by Event Horizon, a powerful company about to introduce a technology that will solve the energy problems of a world decimated by global warming. Set two years later, A Quantum Murder once again teams Mandel with Event Horizon and its beautiful young owner, Julia Evans, in a locked-room mystery that combines

the ingenuity of an Agatha Christie novel with cutting-edge speculative brilliance. Read together, these novels take on fresh depth and complexity, underscoring the magnitude of Peter F. Hamilton 's creative talent.

From his triumphant debut with Snow Crash to the stunning success of his latest novel, Quicksilver, Neal Stephenson has quickly become the voice of a generation. In this now-classic thriller, he and fellow author J.

Frederick George tell a shocking tale with an all-too plausible premise. There's no way William A. Cozzano can lose the upcoming presidential election. He's a likable midwestern governor with one insidious advantage—an advantage provided by a shadowy group of backers. A biochip implanted in his head hardwires him to a computerized polling system. The mood of the electorate is channeled directly into his brain. Forget issues. Forget policy. Cozzano is more than the perfect candidate. He's a special effect. “ Complex, entertaining, frequently funny.”—Publishers Weekly

The remnants of humanity that survived relocated to the moon and other planets. But they are not alone in their struggle—someone or something, somewhere in deep space, is sending them advanced scientific data via the Ophiuchi Hotline. Peter F. Hamilton ’ s groundbreaking Mandel Files series concludes with *The Nano Flower*, a tour de force of unbridled imagination and cutting-edge scientific speculation. Greg Mandel is a psychic detective whose skills have been augmented by powerful but dangerous biotechnology.

Those abilities have won him success and almost killed him many times over. Little wonder that he has settled down to the life of a gentleman farmer. But Greg ’ s former employer, the mighty tech company Event Horizon, needs him once more. After Royan, hacker-genius and husband to company owner Julia Evans, mysteriously vanishes, a business rival suddenly boasts an incredible new technology. Has Royan been kidnapped and forced to work for his captors, or is the truth far stranger? The answer may lie in a gift of flowers received by Julia—flowers with DNA like nothing on Earth. Greg already has his hands full with corporate killers and other unsavory characters. Is he going to have to add aliens to the list? The Greg Mandel trilogy—which also includes *Mindstar Rising* and *A Quantum Murder*, available in Volume 1—set a new standard for science fiction when it first appeared in the 1990s. *The Nano Flower* is every bit as gripping today—and even more timely.

Welcome to the world of short stories *Spectra*
Peter F. Hamilton has proven himself a modern master of epic space opera, carrying the tradition of far-future empire building begun by Heinlein and Asimov into the new millennium. But

Hamilton is also a master of the short story, and when he tackles one of science fiction ’ s most enduring themes—time travel—the result is as provocative as it is entertaining. It starts in 2007 with a break-in. The victim: Marcus Orthew, the financial and technological genius behind Orthanics, the computer company whose radical products have delivered a one-two punch to the industry, all but knocking PCs and Macs out of the ring. The perpetrator: a man obsessed with Orthew. Just another simple case of celebrity stalking—or so everyone assumes at first, including Metropolitan Police Chief Detective David Lanson. But when Lanson interviews the suspect, he makes a startling claim: Orthew is from the future. Or, rather, a future—a parallel timeline. Thus begins the ride of a lifetime for Lanson, as his pursuit of the facts tumbles him headlong down a rabbit hole—and the hunter finds himself hunted.

The Mandel Files, Volume 2: The Nano Flower Del Rey

Reviewers exhaust superlatives when it comes to the science fiction of Peter F. Hamilton. His complex and engaging novels, which span thousands of years—and light-years—are as intellectually stimulating as they are emotionally fulfilling. Now, with *The Dreaming Void*, the first volume in a trilogy

set in the same far-future as his acclaimed Commonwealth saga, Hamilton has created his most ambitious and gripping space epic yet. The year is 3589, fifteen hundred years after Commonwealth forces barely staved off human extinction in a war against the alien Prime. Now an even greater danger has surfaced: a threat to the existence of the universe itself. At the very heart of the galaxy is the Void, a self-contained microuniverse that cannot be breached, cannot be destroyed, and cannot be stopped as it steadily expands in all directions, consuming everything in its path: planets, stars, civilizations. The Void has existed for untold millions of years. Even the oldest and most technologically advanced of the galaxy's sentient races, the Raiel, do not know its origin, its makers, or its purpose. But then Inigo, an astrophysicist studying the Void, begins dreaming of human beings who live within it. Inigo's dreams reveal a world in which thoughts become actions and dreams become reality. Inside the Void, Inigo sees paradise. Thanks to the gaiafield, a neural entanglement wired into most humans, Inigo's dreams are shared by hundreds of millions – and a religion, the Living Dream, is

born, with Inigo as its prophet. But then he vanishes. Suddenly there is a new wave of dreams. Dreams broadcast by an unknown Second Dreamer serve as the inspiration for a massive Pilgrimage into the Void. But there is a chance that by attempting to enter the Void, the pilgrims will trigger a catastrophic expansion, an accelerated devourment phase that will swallow up thousands of worlds. And thus begins a desperate race to find Inigo and the mysterious Second Dreamer. Some seek to prevent the Pilgrimage; others to speed its progress – while within the Void, a supreme entity has turned its gaze, for the first time, outward. . . . The Ophiuchi Hotline Del Rey
NAMED ONE OF THE BEST BOOKS OF THE YEAR BY PUBLISHERS WEEKLY
New York Times bestselling author Peter F. Hamilton's riveting new thriller combines the nail-biting suspense of a serial-killer investigation with clear-eyed scientific and social extrapolation to create a future that seems not merely plausible but inevitable. A century from now, thanks to a technology allowing instantaneous travel across light-years, humanity has solved its energy shortages, cleaned up the environment, and

created far-flung colony worlds. The keys to this empire belong to the powerful North family—composed of successive generations of clones. Yet these clones are not identical. For one thing, genetic errors have crept in with each generation. For another, the original three clone “brothers” have gone their separate ways, and the branches of the family are now friendly rivals more than allies. Or maybe not so friendly. At least that's what the murder of a North clone in the English city of Newcastle suggests to Detective Sidney Hurst. Sid is a solid investigator who'd like nothing better than to hand off this hot potato of a case. The way he figures it, whether he solves the crime or not, he'll make enough enemies to ruin his career. Yet Sid's case is about to take an unexpected turn: because the circumstances of the murder bear an uncanny resemblance to a killing that took place years ago on the planet St. Libra, where a North clone and his entire household were slaughtered in cold blood. The convicted slayer, Angela Tramel, has always claimed her innocence. And now it seems she may have been right. Because only the St. Libra killer could have committed the Newcastle crime. Problem is, Angela also claims that the murderer was an alien monster. Now Sid must navigate through a Byzantine minefield of competing interests within the police department and the world's political and economic elite . . .

all the while hunting down a brutal killer poised to strike again. And on St. Libra, Angela, newly released from prison, joins a mission to hunt down the elusive alien, only to learn that the line between hunter and hunted is a thin one.
