50 Lines of Evidence That Confirm the Christian Faith Harlequin

Reasons We Believe will reinforce your personal faith and will provide you with a clear, concise, evangelistic tool to help you share that faith with others. In an age of cynics and skeptics, Christianity is constantly under attack. Believers need resources that defend the veracity of their faith. They are searching for clear, concise, and credible answers to both doubts of their own and objections from their unbelieving friends. Nathan Busenitz provides such resources to believers. Reasons We Believe confirms and strengthens the faith of believers by demonstrating the reliability of the twofold authority on which Christianity rests: the Word of God and the person of Jesus Christ. Reasons builds a biblical foundation for the authority of the Bible and then shows how extra-biblical evidence corresponds with and thereby attests to what the Bible claims. This study seeks to reinforce the faith of Christians while also providing them with a straightforward evangelistic tool for reaching non-Christians.

The Personal Philosophies of Remarkable Men and Women Reason to Believe

This collection of essays shows now New

Atheists's claim on reason fits poorly withing their presumptions and presuppositions. Reason rightly belongs to God, and strong reasoning is accessible through biblically informed thinking. A Comprehensive Case for Christianity American Library Association Does Christianity Have Good Answers for the Really Tough Questions? Dr. R. C. Sproul believes it does. In this book, the founder of Ligonier Ministries deals with the most common objections to the truths of the Christian faith, including: Has science disproved the existence of God? Will non-Christians who never hear of Christ go to hell? Is it narrow-minded and bigoted to believe Christ is only one way to God? Why do people need God when life is going smoothly? Isn't Christianity just a crutch for people who can ' t handle life ' s pressures? Is heaven real or just "pie in the sky"? Do Christians have a good answer to evil and suffering? How does the church explain all its hypocrites? Reason to Believe is no collection of pat answers and proof texts. It addresses each objection in a separate chapter—rigorously and biblically—and includes a special capsule summary that gives the kernel of each argument. This is a superb resource for those in visitation and calling programs, and a

must for anyone who wants to do more than scratch the surface of Christian truths.

SUNY Press

A first African-American governor of Massachusetts draws on lessons from his own life and career to counsel readers on how to build a meaningful community and country, sharing stories from his disadvantaged youth while describing his views on the transcendent power of friendship and faith. 100,000 first printing.

Reasons We Believe (Foreword by John MacArthur)
Baker Books

This book presents a strong case for the Christian faith by using scientific evidence and philosophical reasoning. Although an abundance of Christian apologetic textbooks exist, most are not easily accessible because they offer long and scholarly treatments of subject matter that may not appeal to lay readers. This book differs in two ways. First, it presents the case for Christianity in a friendly scholarly prose, which enables readers to plainly understand each reason to believe. Second, these reasons are concisely structured so that within minutes, readers can quickly examine each argument in light of the evidence presented. 101 Good Reasons to Believe is essential reading for theists who wish to strengthen their faith in God and for nontheists who desire to critically investigate the truth claims of the Bible. This book includes topics such as: astronomical evidence for the existence of God, evidence for creation and intelligent design, refutation of Darwinian evolution, the historicity of Jesus, why there is human suffering if God exists, the accuracy of the Bible, and evidence for heaven and hell. The 101 reasons presented make thought-provoking and compelling reading for scholars and non-scholars alike.

Reason to Believe Harmony

How would you respond to the question, "Why should I be Christian instead of Muslim, Hindu, or Buddhist?" In answering, you might focus on what Scripture teaches and what you believe - namely, the Gospel message. But the skeptics will press you for more. They will ask why a loving

god allows evil in the world. They will promote science that supports Darwinian theories. They will challenge the reliability of Scripture. People don't often believe something just because someone says they should, especially when it comes to religion. But what if you answered, "You should be a Christian because Christianity is the only religion that can be proven to be true." And what if you had the evidence to support this powerful claim? In *The Reason I Believe*, author Allen Quist returns to a basic fact-based defense of Christianity. In doing so, he offers a wealth of compelling evidence for the truthfulness of Christianity, including the existence of God, the reliability of Scripture, and the death and resurrection of Jesus Christ. Quist also presents a biblical response to the problem of evil and the scientific issues with Darwinism, equipping Christians to confidently respond to these common objections to their faith. After reading *The Reason I Believe*, Christians and skeptics alike will better understand why Christianity requires faith - just not a blind leap of faith.

Lessons From An Improbable Life Humanist Press

Is religious belief reasonable? Of course the so-called New Atheists, such as Richard Dawkins and Sam Harris, energetically say, "No!" Many others, including some believers, insist that faith is utterly beyond reasoned argument. Faith, they declare, is believing something that reason tells you can't be so. In this way they think they shield belief from rational criticism. But philosopher Richard Purtill will have none of that approach to religion. In this newly updated classic work, Purtill carefully applies the power of the mind to understanding whether there is a rational basis for certain religious beliefs. His focus is on widely held Christian beliefs, although much of what he says applies also to other religious traditions. Purtill assesses the common objections to religious belief and claims that religious tenets are nonsensical,

wishful thinking, the result of gullibility, immoral, or refuted by modern discoveries. Then he considers the arguments in favor of Christian belief by studying the nature of faith, of the universe, of morality, of happiness, and the world with God in it. He also scrutinizes certain beliefs involving claims of Christian revelation – the credentials of revelation, the idea of God, Jesus as God's Son, organized religion, and the last things (death, judgment, heaven and hell). The two appendices tackle the Christian doctrine of the Atonement and the influence of certain Christian writers on the revival of Christian belief in the 20th century. An updated For Further Reading section is included. Reason to Believe – is not a work of revealed theology or religious devotion; it is a highly readable book on the philosophy of religion, aimed at the reader who wants to think seriously about religion but who doesn't know all the philosophers' and theologians' jargon and who may or may not be a committed believer.

A Reason to Believe Image

Based on fieldwork among Pentecostal men in Caracas, Venezuela, this ethnography seeks an explanation for the explosion of Evangelical Protestantism, unraveling the cultural and personal dynamics of Evangelical conversion to show how and why these men make the choice to convert, and how they come to have faith in a new system of beliefs.

Finding the True Meaning of the Events in Our Lives Ballantine Books

Think and Grow Rich is a motivational personal development and self-help book by Napoleon Hill. The book was heavily inspired by the work of Andrew Carnegie. While the title focuses on how to get rich, the author explains that the philosophy taught in the book can be used to help people succeed in all lines of work and to do or be almost

anything they want.

God Attachment InterVarsity Press

Thousands of e-books are published each year; and rather than holding steady, e-book prices are rising—some 3.5% this year alone. With so many titles out there, how do you know which ones will actually circulate? Demand-driven acquisition (DDA) may be the answer for your library, and getting started needn't be daunting. This LITA Guide includes more than 200 criteria questions to help you develop a DDA e-book program that's right for your library, offering perspective on Why DDA is worth considering, and how it increases instant access to more e-books for library users while holding down overall library book purchasing cost increases. Prioritizing goals to better negotiate with vendors. Workflow with library services providers and e-book aggregators. Managing trade-offs between staff time and direct costs. Factors in policy decisions, such as single or multiple vendors, short term loans, and mediating purchases. Using MARC records and discovery services. Vendor reporting, cost per use, processing costs, and other metrics for assessment. Incorporating DDA titles into your catalog. Focusing on the unique requirements and processes of e-book acquisition, this guide will help ensure that your library's e-book collection is both vibrant and cost-effective.

8 Reasons to Believe in God Wm. B. Eerdmans Publishing

This Discussion Guide and accompanying DVD will help you and your group learn how to engage others in dialogue on six common objections to Christianity. Whether in a group setting or individual conversation, *The Reason for God* is a resource for what to say in response to these objections, and a model for how to say it. [Session Titles]

- Discussion 1. Isn't the Bible a Myth? Hasn't Science Disproved Christianity?
- Discussion 2. How Can You Say There Is Only One Way to God? What About Other Religions?
- Discussion 3. What Gives You the Right to Tell Me How to Live My Life? Why Are There So Many Rules?
- Discussion 4. Why Does God Allow Suffering? Why Is There So Much Evil in the World?
- Discussion 5. Why Is the Church Responsible for So Much Injustice? Why Are Christians Such Hypocrites?
- Discussion 6. How Can God Be Full of Love and Wrath at the Same Time? How Can God Send Good People to Hell?

How the Oldest Book in the Bible Answers Today's Scientific Questions Apologetics

An uplifting study of the scientific evidence for the afterlife from an experienced anesthesiologist/intensive care physician

- Details meticulously recorded and hospital-verified cases of near-death experiences
- Cites scientific research on NDEs to refute the standard

objections of doubters and materialists point by point

- Explores out-of-body experiences, sessions with mediums, electronic communication with the deceased, and other signs from the afterlife

Over the course of his 25-year career as an anesthesiologist and intensive care physician, Jean Jacques Charbonier, M.D., gathered hundreds of accounts of patients who returned from clinical death. Across all of these accounts--from patients with vastly different backgrounds--Dr. Charbonier found striking similarities as well as indisputable proof that these experiences were more than hallucinations. He surveyed other physicians, nurses, and professional caregivers and discovered that their patients described the same experiences as well as exhibited the same positive life transformations afterward. Igniting a scientific quest to learn more, he collected more accounts of near-death experiences as well as out-of-body experiences, attended dozens of sessions with mediums, experimented successfully with electronic communication with the deceased (EVP), interviewed hundreds of people who have cared for the dying, and gathered countless inexplicable stories of “ signs ” from the afterlife. With each experience he studied, he found himself more firmly believing in the survival of consciousness beyond death. Dr. Charbonier distills his findings into 7 reasons to believe in the afterlife, beginning with the more than 60 million people worldwide who have reported a transcendent afterlife experience. He refutes the standard objections of doubters and materialists point by point, citing scientific research on NDEs and the work of pioneers in the field of consciousness studies such as Raymond Moody and Pim van Lommel. Drawing on meticulously recorded and hospital-verified cases, Dr. Charbonier explains that we should not fear death for ourselves or our loved ones. By releasing our fear of death, we can properly prepare for “ the final journey. ” As those who have returned from death reveal, death is simply a transition and its lessons enable us to live more fully, peacefully, and happily in the

now.

Hidden Treasures in the Book of Job (Reasons to Believe) Honey Bee Publishing, LLC

Christians are increasingly challenged with evolutionary theories as the only models for the origins and history of the universe. But is there any valid scientifically testable alternative? Now available in trade paper, More Than a Theory offers a comprehensive, testable creation model. This fascinating book responds to the recent, well-publicized challenges from aggressive atheists who deny the existence of a Creator. It also reminds the scientific community of what constitutes good science and supplies Christians with the scientific information they need to defend their conviction that the Creator is the God of the Bible. Complete with appendices that put competing models for creation and/or evolution to the same kinds of tests, More Than a Theory is a bold and brave work of apologetics that will stir profitable discussion in both the scientific and the religious realms.

A World of Difference (Reasons to Believe) Zondervan

Does God exist? The oldest and most fundamental question mankind has asked. Is there any evidence of a divine Creator? Haden gives eight reasons to believe in God in this short booklet. In an age of growing skepticism, where 70% of teens walk away from their faith, it is passed time that Christians understand the reasons for their faith. Faith is not blind. There are good reasons to believe in God. Learn some of those reasons today and become a better defender of your faith. Contents Include: 1. Aquinas' Five Ways 2. The Kalam Cosmological Argument 3. The Fine-Tuning Argument 4. The Moral Argument

Reason for the Hope Within Baker Books

The democratic party's most eloquent statesman in a triumph of heart, mind, and voice delivers a vivid rebuke to the radical Republicans running riot in Washington. Fortright in confessing his party's own failings, Cuomo is remorseless in dismantling the opposition, using the floodlight of his clear prose to reveal the evasion and show the inadequacy of the now-famous, celebrated

Contract with America. In its place, he offers a hopeful vision of what we the people might achieve if we can only learn to remember "we're all in this together." Written with a depth of understanding drawn from twenty years of daily involvement with local, state and federal government and six decades as the American son of quintessential immigrants, Reason to Believe is Cuomo's tribute to the uncompromising wisdom of people like his parents and the parents of his wife, Matilda, seekers and believers who taught him the lesson America needs so badly now: "that what is right is usually also what is necessary; that in helping one another we almost always help ourselves."

The Reason I Believe Simon and Schuster

"What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality?" asks Neil deGrasse Tyson, science popularizer and author of *Astrophysics for People in a Hurry*. "I don't know for sure. But a good place to start would be for everyone on earth to read this book." Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels. Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure. Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon. How do you find a gently persuasive way of steering people away from unfounded beliefs, bogus cures, conspiracy theories, and the like? This down-to-earth, entertaining exploration of commonly held extraordinary claims will help you set the record straight. The author, a veteran journalist, has not only surveyed a vast body of literature, but has also interviewed leading scientists, explored "the most haunted house in America," frolicked in the inviting waters of the Bermuda Triangle, and even talked to a "contrite Roswell alien." He is not out simply to debunk unfounded beliefs. Wherever possible, he

presents alternative scientific explanations, which in most cases are even more fascinating than the wildest speculation. For example, stories about UFOs and alien abductions lack good evidence, but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe. The proof for Bigfoot or the Loch Ness Monster may be nonexistent, but scientists are regularly discovering new species, some of which are truly stranger than fiction. Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality, this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world.

Reasons to Believe Henry Holt and Company

Arguably the oldest book in the Bible, the book of Job has a surprising amount to say about some of the newest scientific discoveries and controversies. Far from a book that is just about suffering, Job is filled with rich insight into both ancient and modern questions about the formation of the world the difference between animals and humans cosmology dinosaurs and the fossil record how to care for creation and more With careful consideration and exegesis, internationally known astrophysicist and Christian apologist Hugh Ross adds yet another compelling argument to the case for the veracity of the biblical commentary on the history of the universe, Earth, life, and humanity. Hidden Treasures in the Book of Job shows that the Bible is an accurate predictor of scientific discoveries and a trustworthy source of scientific information, and that both the book of Scripture and the book of nature are consistent both internally and externally.

Does God Exist? Loveswept

In each of our lives we are faced with events that seem inexplicable, unjust, even cruel—events that can shatter our perception of the world, our understanding of ourselves, and our faith in a higher power. Friends and family members often offer comfort with “ Everything happens for a reason ” —a simple, common phrase with an unbearably elusive meaning. In Everything Happens for a Reason, psychotherapist Mira Kirshenbaum helps us understand the principles

behind this frequently used phrase and provides us with tools to grasp its true meaning. According to Kirshenbaum, there is significance to each of the events in our lives. We all can discover meaning in what has happened to us—seeing such occurrences as gifts, lessons, or opportunities that we might not have been able to get any other way. Building on more than twenty-five years of clinical research, Kirshenbaum has developed tests to help readers decode the confusing or unfortunate events in their lives and find solace and strength in the positive outcomes that exist. Kirshenbaum offers ten universal reasons for the tragedies in our lives, among them letting go of fear, radically accepting ourselves, becoming a truly good person, finding forgiveness, and discovering our mission. While coming to terms with unexpected loss and disappointment is never easy, Everything Happens for a Reason empowers readers to embrace the positive and comprehend the specific message that is larger and more powerful than their grief.
