Reason to Believe Baker Books
God. Whether one loves him, hates him, denies or defies him, it is hard to deny the worldwide fascination with God. This book explores why and suggests a personal response to the God Attachment in all of us. Why has the human race, the world over, been so fascinated with . . . some might say obsessed with . . . God? This built-in attachment to God crosses religious, political, ethnic, cultural, and generational barriers. Drs. Clinton and Straub reveal fascinating research about this worldwide phenomenon. From avoidant, anxious, and fearful to secure and personal, the range of responses to our internal attachment to God has a profound influence on the way we do relationships, intimacy, and life choices. With helpful self-assessments, intriguing questions, and

surprising revelations, this book moves from worldwide statistics to personal challenge, offering the means to become securely attached to God in a way that can have positive effects on our attitudes, approach to life, and overall life satisfaction.

A Doctor Reviews the Case for Consciousness after Death Wyatt North Publishing, LLC

During the last two decades there has been a renaissance in the field of Christian philosophy. Unfortunately, most of this excellent work has not reached general readers. Reason for the Hope Within was produced specifically to make available the best of contemporary Christian philosophy in a clear, accessible -- and highly relevant -- manner. Fourteen of America's rising Christian philosophers here cover many of the traditional themes of Christian apologetics (arguments for the existence of God, the problem of evil, the possibility of miracles) as well as topics of special relevance to today's world (Eastern religions, Christianity and science, Christianity and ethics, the existence of heaven

and hell).

8 Reasons to Believe in God Simon and Schuster

How would you respond to the question, "Why should I be Christian instead of Muslim, Hindu, or Buddhist?" In answering, you might focus on what Scripture teaches and what you believe - namely, the Gospel message. But the skeptics will press you for more. They will ask why a loving god allows evil in the world. They will promote science that supports Darwinian theories. They will challenge the reliability of Scripture. People don't often believe something just because someone says they should, especially when it comes to religion. But what if you answered, "You should be a Christian because Christianity is the only religion that can be proven to be true." And what if you had the evidence to support this powerful claim? In *The Reason I Believe*, author Allen Quist returns to a basic fact-based defense of Christianity. In doing so, he offers a wealth of compelling evidence for the truthfulness of Christianity, including the existence of God, the reliability of Scripture, and the death and resurrection of Jesus Christ. Quist also presents a biblical response to the problem of evil and the scientific issues with Darwinism, equipping Christians to confidently respond to these common objections to their faith. After reading *The Reason I Believe*, Christians and skeptics alike will better understand why Christianity requires faith - just not a blind leap of faith.

Reason to Believe Simon and Schuster

Is religious belief reasonable? Of course the so-called New Atheists, such as Richard Dawkins and Sam Harris, energetically say, "No!," Many others, including some believers, insist that faith is utterly beyond reasoned argument. Faith, they declare, is believing something that reason tells you can't be so. In this way they think they shield belief from rational criticism. But philosopher Richard Purtill will have none of that approach to religion. In this newly updated classic work, Purtill carefully applies the power of the mind to understanding whether there is a rational basis for certain religious beliefs. His focus is on widely held Christian beliefs, although much of what he says applies also to other religious traditions. Purtill assesses the common objections to religious belief: the claims that religious tenets are nonsensical, wishful thinking, the result of gullibility, immoral, or

refuted by modern discoveries. Then he considers the arguments in favor of Christian belief by studying the nature of faith, of the universe, of morality, of happiness, and the world with God in it. He also scrutinizes certain beliefs involving claims of Christian revelation - the credentials of revelation, the idea of God, Jesus as God's Son, organized religion, and the last things (death, judgment, heaven and hell). The two appendices tackle the Christian doctrine of the Atonement and the influence of certain Christian writers on the revival of Christian belief in the 20th century. An updated For Further Reading section is included. *Reason to Believe* is not a work of revealed theology or religious devotion; it is a highly readable book on the philosophy of religion, aimed at the reader who wants to think seriously about religion but who doesn't know all the philosophers' and theologians' jargon and who may or may not be a committed believer.

A Response to Common Objections to Christianity Reason to Believe

Arguably the oldest book in the Bible, the book of Job has a surprising amount to say about some of the newest scientific discoveries and controversies. Far from a book that is just about suffering, Job is filled with rich insight into both ancient and modern questions about the formation of the world, the difference between animals and humans, cosmology, dinosaurs, and the fossil record, how to care for creation, and more. With careful consideration and exegesis, internationally known astrophysicist and Christian apologist Hugh Ross adds yet another compelling argument to the case for the veracity of the biblical commentary on the history of the universe, Earth, life, and humanity. *Hidden Treasures in the Book of Job* shows that the Bible is an accurate predictor of scientific discoveries and a trustworthy source of scientific information, and that both the book of Scripture and the book of nature are consistent both internally and externally.

Can a Scientist Believe in Miracles? SUNY Press
Christians are increasingly challenged with evolutionary theories as the only models for the origins and history of the universe. But is there any

valid scientifically testable alternative? Now available in trade paper, *More Than a Theory* offers a comprehensive, testable creation model. This fascinating book responds to the recent, well-publicized challenges from aggressive atheists who deny the existence of a Creator. It also reminds the scientific community of what constitutes good science and supplies Christians with the scientific information they need to defend their conviction that the Creator is the God of the Bible. Complete with appendices that put competing models for creation and/or evolution to the same kinds of tests, *More Than a Theory* is a bold and brave work of apologetics that will stir profitable discussion in both the scientific and the religious realms.

A Concise Guide to the Science of Faith WestBow Press

In this groundbreaking volume, J. Anderson Thomson, Jr., MD, with Clare Aukofer, offers a succinct yet comprehensive study of how and why the human mind generates religious belief. Dr. Thomson, a highly respected practicing psychiatrist with credentials in forensic psychiatry and evolutionary psychology, methodically investigates the components and causes of religious belief in the same way any scientist would investigate the movement of astronomical bodies or the evolution of life over time—that is, as a purely natural phenomenon. Providing compelling evidence from psychology, the cognitive neurosciences, and related fields, he, with Ms. Aukofer, presents an easily accessible and exceptionally convincing case that god(s) were created by man—not vice versa. With this slim volume, Dr. Thomson establishes himself as a must-read thinker and leading voice on the primacy of reason and science over superstition and religion.

Zondervan

Explores the mutually dependent relationship of faith and reason in human life and human knowledge.

The Personal Philosophies of Remarkable Men and Women Adda247 Publications

“ A brilliant, wide ranging and powerful series of readings on the possibilities, problems and mysteries of faith. This book belongs on the shelf of every believer—and every serious skeptic. ”
— Rabbi David Wolpe, author of *Why Faith Matters* “ This life-giving, faith-filled and hard-

nosed collection reveals why, as St. Anselm wrote, true faith always seeks to understand. ” — Rev. James Martin, author of *My Life with the Saints* From Dr. Francis Collins, *New York Times* bestselling author of *The Language of God*, comes the definitive reader on the rationality of faith.

A World of Difference (Reasons to Believe)

Ballantine Books

This Discussion Guide and accompanying DVD will help you and your group learn how to engage others in dialogue on six common objections to Christianity. Whether in a group setting or individual conversation, *The Reason for God* is a resource for what to say in response to these objections, and a model for how to say it. [Session Titles] Ò Discussion 1. Isn't the Bible a Myth? Hasn't Science Disproved Christianity? Ò Discussion 2. How Can You Say There Is Only One Way to God? What About Other Religions? Ò Discussion 3. What Gives You the Right to Tell Me How to Live My Life? Why Are There So Many Rules? Ò Discussion 4. Why Does God Allow Suffering? Why Is There So Much Evil in the World? Ò Discussion 5. Why Is the Church Responsible for So Much Injustice? Why Are Christians Such Hypocrites? Ò Discussion 6. How Can God Be Full of Love and Wrath at the Same Time? How Can God Send Good People to Hell?

Brain Science and the Biology of Belief Pitchstone Publishing (US&CA)

An uplifting study of the scientific evidence for the afterlife from an experienced anesthesiologist/intensive care physician • Details meticulously recorded and hospital-verified cases of near-death experiences • Cites scientific research on NDEs to refute the standard objections of doubters and materialists point by point • Explores out-of-body experiences, sessions with mediums, electronic communication with the deceased, and other signs from the afterlife Over the course of his 25-year career as an anesthesiologist and intensive care physician, Jean Jacques Charbonier, M.D., gathered hundreds of accounts of patients who returned from clinical death. Across all of

these accounts--from patients with vastly different backgrounds--Dr. Charbonier found striking similarities as well as indisputable proof that these experiences were more than hallucinations. He surveyed other physicians, nurses, and professional caregivers and discovered that their patients described the same experiences as well as exhibited the same positive life transformations afterward. Igniting a scientific quest to learn more, he collected more accounts of near-death experiences as well as out-of-body experiences, attended dozens of sessions with mediums, experimented successfully with electronic communication with the deceased (EVP), interviewed hundreds of people who have cared for the dying, and gathered countless inexplicable stories of “ signs ” from the afterlife. With each experience he studied, he found himself more firmly believing in the survival of consciousness beyond death. Dr. Charbonier distills his findings into 7 reasons to believe in the afterlife, beginning with the more than 60 million people worldwide who have reported a transcendent afterlife experience. He refutes the standard objections of doubters and materialists point by point, citing scientific research on NDEs and the work of pioneers in the field of consciousness studies such as Raymond Moody and Pim van Lommel. Drawing on meticulously recorded and hospital-verified cases, Dr. Charbonier explains that we should not fear death for ourselves or our loved ones. By releasing our fear of death, we can properly prepare for “ the final journey. ” As those who have returned from death reveal, death is simply a transition and its lessons enable us to live more fully, peacefully, and happily in the now. [Reasons We Believe \(Foreword by John MacArthur\)](#) Baker Books

Thousands of e-books are published each year; and rather than holding steady, e-book prices are rising—some 3.5% this year alone. With so many titles out there, how do you know which ones will actually circulate? Demand-driven acquisition (DDA) may be the answer for your library, and getting started needn ’ t be daunting. This LITA Guide includes more than 200 criteria questions to help you develop a DDA e-book program that ’ s right for your library, offering perspective on Why DDA is worth considering, and how it increases instant access to more e-books for library users while holding down overall library book purchasing cost increases. Prioritizing goals to better negotiate with vendors. Workflow with library services providers and e-book aggregators. Managing trade-offs between staff time and direct costs. Factors in policy decisions, such as single or multiple vendors, short term loans, and mediating purchases. Using MARC records and discovery services. Vendor reporting, cost per use, processing costs, and other metrics for assessment. Incorporating DDA titles into your catalog. Focusing on the unique requirements and processes of e-book acquisition, this guide will help ensure that your library ’ s e-book collection is both vibrant and cost-effective.

Everything Happens for a Reason Image
NEW YORK TIMES BESTSELLER • “ A meditation on sense-making when there ’ s no sense to be made, on letting go when we can ’ t hold on, and on being unafraid even when we ’ re terrified. ” —Lucy Kalanithi
“ Belongs on the shelf alongside other terrific books about this difficult subject, like Paul Kalanithi ’ s *When Breath Becomes Air* and Atul Gawande ’ s *Being Mortal*. ” —Bill Gates
NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE
Kate Bowler is a professor at Duke Divinity

School with a modest Christian upbringing, but she specializes in the study of the prosperity gospel, a creed that sees fortune as a blessing from God and misfortune as a mark of God's disapproval. At thirty-five, everything in her life seems to point toward "blessing." She is thriving in her job, married to her high school sweetheart, and loves life with her newborn son. Then she is diagnosed with stage IV colon cancer. The prospect of her own mortality forces Kate to realize that she has been tacitly subscribing to the prosperity gospel, living with the conviction that she can control the shape of her life with "a surge of determination." Even as this type of Christianity celebrates the American can-do spirit, it implies that if you "can't do" and succumb to illness or misfortune, you are a failure. Kate is very sick, and no amount of positive thinking will shrink her tumors. What does it mean to die, she wonders, in a society that insists everything happens for a reason? Kate is stripped of this certainty only to discover that without it, life is hard but beautiful in a way it never has been before. Frank and funny, dark and wise, Kate Bowler pulls the reader deeply into her life in an account she populates affectionately with a colorful, often hilarious retinue of friends, mega-church preachers, relatives, and doctors. Everything Happens for a Reason tells her story, offering up her irreverent, hard-won observations on dying and the ways it has taught her to live. Praise for Everything Happens for a Reason "I fell hard and fast for Kate Bowler. Her writing is naked, elegant, and gripping—she's like a Christian Joan Didion. I left Kate's story feeling more present, more grateful, and a hell of a lot less alone. And what else is art for?" —Glennon Doyle, #1 New York Times bestselling author of Love Warrior and president of Together

Why God Won't Go Away Zondervan Academic
Plasma physicist Ian Hutchinson has been asked hundreds of questions about faith and science. Is God's existence a scientific question? Is the Bible consistent with the modern scientific understanding of the universe? Are there scientific reasons to believe in God? In this comprehensive volume, Hutchinson answers a full range of inquiries with sound scientific insights and measured Christian perspective.

What Can You Believe If You Don't Believe In God? Lulu.com

Does God exist? The oldest and most fundamental question mankind has asked. Is there any evidence of a divine Creator? Haden gives eight reasons to believe in God in this short booklet. In an age of growing skepticism, where 70% of teens walk away from their faith, it is passed time that Christians understand the reasons for their faith. Faith is not blind. There are good reasons to believe in God. Learn some of those reasons today and become a better defender of your faith. Contents Include: 1.

Aquinas' Five Ways 2. The Kalam Cosmological Argument 3. The Fine-Tuning Argument 4. The Moral Argument

The Reason I Believe Ignatius Press

Recent Barna research indicates that less than one in ten evangelical Christians hold a biblical worldview. A World of Difference seeks to change this disturbing fact by educating readers on how the Christian perspective is uniquely reasonable, verifiable, and liveable. Author Kenneth Richard Samples faced a profound test of his own belief system during a personal life-and-death crisis. In A World of Difference, he uses nine distinct tests to compare the Christian worldview with current religious and philosophical competitors, including Islam, postmodernism, naturalism, and pantheistic monism. Samples tackles tough issues through this in-depth study of Christianity's history, creed, and philosophical basis. An excellent resource for readers who want their view of life and the world to make sense.

Conversations on Faith and Life Henry Holt and Company

An inspiring collection of the personal philosophies of a group of remarkable men and women Based on

the National Public Radio series of the same name, *This I Believe* features eighty essayists—from the famous to the unknown—completing the thought that begins the book's title. Each piece compels readers to rethink not only how they have arrived at their own personal beliefs but also the extent to which they share them with others. Featuring a well-known list of contributors—including Isabel Allende, Colin Powell, Gloria Steinem, William F. Buckley Jr., Penn Jillette, Bill Gates, and John Updike—the collection also contains essays by a Brooklyn lawyer; a part-time hospital clerk from Rehoboth, Massachusetts; a woman who sells Yellow Pages advertising in Fort Worth, Texas; and a man who serves on the state of Rhode Island's parole board. The result is a stirring and provocative trip inside the minds and hearts of a diverse group of people whose beliefs—and the incredibly varied ways in which they choose to express them—reveal the American spirit at its best.

Reason for the Hope Within Bell Bridge

Books

A study of the hows and whys of the Catholic faith draws on scriptural passages, personal experience, and everyday life to offer a straightforward, thought-provoking response to common criticisms of Catholicism. 40,000 first printing.

Belief Simon and Schuster

Increasingly astronomers recognize that if the cosmos had not unfolded exactly as it did, humanity would not, could not, exist. Yet these researchers--along with countless ordinary folks--resist belief in the biblical Creator. Why? They say a loving God would have made a better home for us, one without trouble and tragedy. In *Why the Universe Is the Way It Is*, Hugh Ross draws from his depth of study in both science and Scripture to explain how the universe's design fulfills several distinct purposes. He also reveals God's surpassing love and ultimate purposes for each individual. *Why the Universe Is the Way It Is* will interest anyone who wonders where and how the universe came to be, what or who is responsible for it, why we are here, or how and when the universe ends. Far from leaving the reader at this philosophical jumping-off point,

Ross builds toward answering the big question of human destiny and the specific question of each reader's personal destiny.

Cracker Reading Comprehension eBook for SBI PO - IBPS PO and Other Exams 2019 (English Edition) Honey Bee Publishing, LLC

“What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality?” asks Neil deGrasse Tyson, science popularizer and author of *Astrophysics for People in a Hurry*. “I don't know for sure. But a good place to start would be for everyone on earth to read this book.” Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels. Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure. Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon. How do you find a gently persuasive way of steering people away from unfounded beliefs, bogus cures, conspiracy theories, and the like? This down-to-earth, entertaining exploration of commonly held extraordinary claims will help you set the record straight. The author, a veteran journalist, has not only surveyed a vast body of literature, but has also interviewed leading scientists, explored “the most haunted house in America,” frolicked in the inviting waters of the Bermuda Triangle, and even talked to a “contrite Roswell alien.” He is not out simply to debunk unfounded beliefs. Wherever possible, he presents alternative scientific explanations, which in most cases are even more fascinating than the wildest speculation. For example, stories about UFOs and alien abductions lack good evidence, but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe. The proof for Bigfoot or the Loch Ness Monster may be nonexistent, but scientists are regularly discovering new species, some of which are truly stranger than fiction. Stressing the excitement of scientific discovery and the legitimate mysteries

and wonder inherent in reality, this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world.
