8 Reasons to Believe in God Univ of California Press
Reasons We Believe will reinforce your personal faith and will provide you with a clear, concise, evangelistic tool to help you share that faith with others. In an age of cynics and skeptics, Christianity is constantly under attack. Believers need resources that defend the veracity of their faith. They are searching for clear, concise, and credible answers to both doubts of their own and objections from their unbelieving friends. Nathan Busenitz provides such resources to believers. Reasons We Believe confirms and strengthens the faith of believers by demonstrating the reliability of the twofold authority on which Christianity rests: the Word of God and the person of Jesus Christ. Reasons builds a biblical foundation for the authority of the Bible and then shows how

extra-biblical evidence corresponds with and thereby attests to what the Bible claims. This study seeks to reinforce the faith of Christians while also providing them with a straightforward evangelistic tool for reaching non-Christians.

Recent Barna research indicates that less than one in ten evangelical Christians hold a biblical worldview. *A World of Difference* seeks to change this disturbing fact by educating readers on how the Christian perspective is uniquely reasonable, verifiable, and liveable. Author Kenneth Richard Samples faced a profound test of his own belief system during a personal life-and-death crisis. In *A World of Difference*, he uses nine distinct tests to compare the Christian

worldview with current religious and philosophical competitors, including Islam, postmodernism, naturalism, and pantheistic monism. Samples tackles tough issues through this in-depth study of Christianity's history, creed, and philosophical basis. An excellent resource for readers who want their view of life and the world to make sense.

God. Whether one loves him, hates him, denies or defies him, it is hard to deny the worldwide fascination with God. This book explores why and suggests a personal response to the God Attachment in all of us. Why has the human race, the world over, been so fascinated with . . . some

might say obsessed with . . . God? This built-in attachment to God crosses religious, political, ethnic, cultural, and generational barriers. Drs. Clinton and Straub reveal fascinating research about this worldwide phenomenon. From avoidant, anxious, and fearful to secure and personal, the range of responses to our internal attachment to God has a profound influence on the way we do relationships, intimacy, and life choices. With helpful self-assessments, intriguing questions, and surprising revelations, this book moves from worldwide statistics to personal challenge, offering the means to become securely attached to God in a way that can have positive effects on

our attitudes, approach to life, and overall life satisfaction.

The Reason for God Zondervan Academic

This book is intended to help you live your life, and to shed some light on your own values and ethics, if you don't believe in God. More than just a primer on Humanism, but not quite a full-blown treatise on philosophy, it offers some answers to those crucial questions Socrates asked: What is true? And how shall we live our lives? Those of us who don't believe in the supernatural sometimes struggle to understand how we can ground ourselves ethically, and how to find truth, meaning, purpose and joy. This book offers ideas about how to know, without depending on Holy Scriptures or guidance from a deity, what it means to lead a good and ethical life. "Humanism is a value system whose time has come: a positive philosophy for the surging proportion of the world's population who indicate 'None' as their religion but seek meaning, morality, and purpose in their lives.

Michael Werner's statement of Humanism is clear, effective, and graceful, just right for our times. "

Steven Pinker, professor of psychology, Harvard University author, "The Better Angels of Our Nature" and "How the Mind Works." "Mike Werner captures the depth and breadth of Humanism in his latest work. He shows us what love, reason, imagination and science can have in common. In doing so, he demonstrates what we all have to live for, strive for, and believe in." Roy Speckhardt, executive director, American Humanist Association "Outstanding and a must read for everyone who takes life seriously." Rev. William R. Murry, former president, Meadville Lombard Theological School, University of Chicago

Increasingly astronomers recognize that if the cosmos had not unfolded exactly as it did, humanity would not, could not,

exist. Yet these researchers--along with countless ordinary folks--resist belief in the biblical Creator. Why? They say a loving God would have made a better home for us, one without trouble and tragedy. In *Why the Universe Is the Way It Is*, Hugh Ross draws from his depth of study in both science and Scripture to explain how the universe's design fulfills several distinct purposes. He also reveals God's surpassing love and ultimate purposes for each individual. *Why the Universe Is the Way It Is* will interest anyone who wonders where and how the universe came to be, what or who is responsible for it, why we are here, or how and when the universe ends. Far from leaving the reader at this philosophical jumping-off point, Ross builds toward answering the big question of human destiny and the specific question of each reader's personal destiny.

This book presents a strong case for the Christian faith by using scientific evidence and philosophical reasoning. Although an abundance of Christian apologetic textbooks exist, most are not easily accessible because they offer long and scholarly treatments of subject matter that may not appeal to lay readers. This book differs in two ways. First, it presents the case for Christianity in a friendly scholarly prose, which enables readers to plainly

understand each reason to believe. Second, these reasons are concisely structured so that within minutes, readers can quickly examine each argument in light of the evidence presented. *101 Good Reasons to Believe* is essential reading for theists who wish to strengthen their faith in God and for nontheists who desire to critically investigate the truth claims of the Bible. This book includes topics such as: astronomical evidence for the existence of God, evidence for creation and intelligent design, refutation of Darwinian evolution, the historicity of Jesus, why there is human suffering if God exists, the accuracy of the Bible, and evidence for heaven and hell. The 101 reasons

presented make thought-provoking and compelling reading for scholars and non-scholars alike.

A Concise Guide to the Science of Faith

Can their marriage survive the ultimate betrayal? Young and passionately in love, Clara and Ben Pipestone came from vastly different worlds. She was a college student, studying the indigenous people of the Great Plains. He fixed cars in the winter and followed the amateur Indian rodeo circuit all summer. Ignoring those who doomed their relationship to failure, they married, settled into their life in Bismarck, North Dakota, and had a beautiful daughter, Anna. But now, thirteen years later, Ben's alcoholism blurs his judgment and lands him in the arms of

another woman. The betrayal has torn their marriage apart, and their daughter is paying the price. Shoplifting, drinking, and running with a bad crowd, Anna is out of control. Determined to save their troubled teenage daughter, Clara and Ben take Anna and join a two week trek on horseback across an unforgiving winter terrain, a journey across sacred land in remembrance of Ben's Lakota ancestors. Can their journey bring them a better understanding of the past and each other? Can it heal their broken trust and unite them as a family? Bestselling author Kathleen Eagle set aside a gratifying seventeen-year teaching career on a North Dakota Indian reservation to become a full-time novelist. The Lakota Sioux heritage of her husband and their three children has inspired many of her

stories. Among her other honors, she has received the Romance Writers of America's prestigious RITA Award.

Based on fieldwork among Pentecostal men in Caracas, Venezuela, this ethnography seeks an explanation for the explosion of Evangelical Protestantism, unraveling the cultural and personal dynamics of Evangelical conversion to show how and why these men make the choice to convert, and how they come to have faith in a new system of beliefs.

A Response to Common Objections to Christianity Ignatius Press

During the last two decades there has been a renaissance in the field of Christian philosophy. Unfortunately, most of this excellent work has not reached general readers. Reason for the Hope Within was produced specifically to make available the

best of contemporary Christian philosophy in a clear, accessible -- and highly relevant -- manner. Fourteen of America's rising Christian philosophers here cover many of the traditional themes of Christian apologetics (arguments for the existence of God, the problem of evil, the possibility of miracles) as well as topics of special relevance to today's world (Eastern religions, Christianity and science, Christianity and ethics, the existence of heaven and hell).

“Gina Gordon never disappoints,” declares Jen McLaughlin! In this sizzling novel, two outsiders trying to turn their lives around find everything they’re looking for in each other’s arms. Grace: I thought that reinventing myself as a corporate go-getter would be easy compared to my old life as an escort, but I couldn’t have been more wrong. After taking a full-time office job, my past has come back to haunt me, my love life is nonexistent, and I miss sex—even with the lying cheats who used to be my clients. The trouble is, the closest thing to a man in my life is Ben Lockwood. After pushing me away, that jerk has the nerve to ask a favor—so why is he so hard to resist? Ben: Working my way up from cameraman to vice president of an adult media company has been . . . interesting. To focus on my career, I swear off all distractions—especially sex—and

turn to Grace Nolan, the most poised and polished woman I know, for help cleaning up. But after my little vow of celibacy, spending time with Grace is pure torture. I can’t touch her, and yet I can’t stop thinking about her. And deep down, I know the reason why. An inspiring collection of the personal philosophies of a group of remarkable men and women Based on the National Public Radio series of the same name, This I Believe features eighty essayists—from the famous to the unknown—completing the thought that begins the book's title. Each piece compels readers to rethink not only how they have arrived at their own personal beliefs but also the extent to which they share them with others. Featuring a well-known list of contributors—including Isabel Allende, Colin Powell, Gloria Steinem, William F. Buckley Jr., Penn Jillette, Bill Gates, and John Updike—the

collection also contains essays by a Brooklyn lawyer; a part-time hospital clerk from Rehoboth, Massachusetts; a woman who sells Yellow Pages advertising in Fort Worth, Texas; and a man who serves on the state of Rhode Island's parole board. The result is a stirring and provocative trip inside the minds and hearts of a diverse group of people whose beliefs—and the incredibly varied ways in which they choose to express them—reveal the American spirit at its best.

A Comprehensive Case for Christianity

Adda247 Publications

An uplifting study of the scientific evidence for the afterlife from an experienced anesthesiologist/intensive care physician • Details meticulously recorded and hospital-verified cases of near-death experiences • Cites scientific research on NDEs to refute the standard objections of doubters and

materialists point by point • Explores out-of-body experiences, sessions with mediums, electronic communication with the deceased, and other signs from the afterlife Over the course of his 25-year career as an anesthesiologist and intensive care physician, Jean Jacques Charbonier, M.D., gathered hundreds of accounts of patients who returned from clinical death. Across all of these accounts--from patients with vastly different backgrounds--Dr. Charbonier found striking similarities as well as indisputable proof that these experiences were more than hallucinations. He surveyed other physicians, nurses, and professional caregivers and discovered that their patients described the same experiences as well as exhibited the same positive life transformations afterward.

Igniting a scientific quest to learn more, he collected more accounts of near-death experiences as well as out-of-body experiences, attended dozens of sessions with mediums, experimented successfully with electronic communication with the deceased (EVP), interviewed hundreds of people who have cared for the dying, and gathered countless inexplicable stories of “signs” from the afterlife. With each experience he studied, he found himself more firmly believing in the survival of consciousness beyond death. Dr. Charbonier distills his findings into 7 reasons to believe in the afterlife, beginning with the more than 60 million people worldwide who have reported a transcendent afterlife experience. He refutes the standard objections of doubters

and materialists point by point, citing scientific research on NDEs and the work of pioneers in the field of consciousness studies such as Raymond Moody and Pim van Lommel. Drawing on meticulously recorded and hospital-verified cases, Dr. Charbonier explains that we should not fear death for ourselves or our loved ones. By releasing our fear of death, we can properly prepare for “the final journey.” As those who have returned from death reveal, death is simply a transition and its lessons enable us to live more fully, peacefully, and happily in the now.

And Other Lies I've Loved Prometheus Books
In this groundbreaking volume, J. Anderson Thomson, Jr., MD, with Clare Aukofer, offers a succinct yet comprehensive study of how and why the human mind generates religious belief. Dr. Thomson, a highly respected

practicing psychiatrist with credentials in forensic psychiatry and evolutionary psychology, methodically investigates the components and causes of religious belief in the same way any scientist would investigate the movement of astronomical bodies or the evolution of life over time—that is, as a purely natural phenomenon. Providing compelling evidence from psychology, the cognitive neurosciences, and related fields, he, with Ms. Aukofer, presents an easily accessible and exceptionally convincing case that god(s) were created by man—not vice versa. With this slim volume, Dr. Thomson establishes himself as a must-read thinker and leading voice on the primacy of reason and science over superstition and religion.

Christians are increasingly challenged

with evolutionary theories as the only models for the origins and history of the universe. But is there any valid scientifically testable alternative? Now available in trade paper, More Than a Theory offers a comprehensive, testable creation model. This fascinating book responds to the recent, well-publicized challenges from aggressive atheists who deny the existence of a Creator. It also reminds the scientific community of what constitutes good science and supplies Christians with the scientific information they need to defend their conviction that the Creator is the God of the Bible. Complete with appendices that put competing models for creation and/or evolution to the same kinds of tests,

More Than a Theory is a bold and brave work of apologetics that will stir profitable discussion in both the scientific and the religious realms.

Everything Happens for a Reason

Why have we humans always longed to connect with something larger than ourselves? Why does consciousness inevitably involve us in a spiritual quest? Why, in short, won't God go away? Theologians, philosophers, and psychologists have debated this question through the ages, arriving at a range of contradictory and ultimately unprovable answers. But in this brilliant, groundbreaking new book, researchers Andrew Newberg and Eugene d'Aquili offer an explanation that is at once profoundly

simple and scientifically precise: the religious impulse is rooted in the biology of the brain. Newberg and d'Aquili base this revolutionary conclusion on a long-term investigation of brain function and behavior as well as studies they conducted using high-tech imaging techniques to examine the brains of meditating Buddhists and Franciscan nuns at prayer. What they discovered was that intensely focused spiritual contemplation triggers an alteration in the activity of the brain that leads us to perceive transcendent religious experiences as solid and tangibly real. In other words, the sensation that Buddhists call "oneness with the universe" and the Franciscans attribute to the palpable presence of God is not a delusion or a manifestation of wishful thinking but rather

a chain of neurological events that can be objectively observed, recorded, and actually photographed. The inescapable conclusion is that God is hard-wired into the human brain. In *Why God Won't Go Away*, Newberg and d'Aquili document their pioneering explorations in the field of neurotheology, an emerging discipline dedicated to understanding the complex relationship between spirituality and the brain. Along the way, they delve into such essential questions as whether humans are biologically compelled to make myths; what is the evolutionary connection between religious ecstasy and sexual orgasm; what do Near Death Experiences reveal about the nature of spiritual phenomena; and how does ritual create its own neurological environment. As their journey unfolds, Newberg and d'Aquili realize that a single, overarching question lies at the heart of their pursuit: Is religion merely a product of biology or has the human brain been mysteriously endowed with the unique capacity to reach and know God? Blending cutting-edge science with illuminating insights into the nature of consciousness and spirituality, *Why God Won't Go Away* bridges faith and reason, mysticism and empirical data. The neurological basis of how the brain identifies the "real" is nothing short of miraculous. This fascinating, eye-opening book dares to explore both the miracle and the biology of our enduring relationship with God.
