My Piano

I just finished reading a marvelous book, called *Soprano on Her Head : Right-Side-Up Reflections on Life and Other Performances*, by Eloise Ristad. My piano professor recommended I read this book during a lesson when we were discussing performance anxiety (which I experience frequently, I must admit). In this easy-to-read, humorous book, Ristad shares her experiences and ideas

gained through teaching/coaching musicians and leading performance anxiety workshops.

As we let the tones change and followed the changes with body movement, Liz, our soprano, ended up on her knees with her head upside down on the floor. Effortlessly, and without thinking how--for who could have told her how to sing on her head--she found all the resonance she had been struggling for, with the added bonus of incredible dynamic control.

about how Eloise Ristad spent her time teaching musicians to overcome their (mostly mental) blocks to become better musicians - including the story of how the soprano who couldn't get her singing voice to come through clearly found success by practising singing standing on her head - she was of course so concerned about not falling over, she stopped "trying" so hard and

allowed her inner self to sing properly!
