Jazz Anyone.....?, Book

In this work, the author addresses a perennial question: how does someone recover from a catastrophic disaster or other personal tragedy? The answer, she suggests, may come from coastal residents who survived the 2005 Hurricanes Katrina and Rita. These

survivors endured a long and painful journey after losing homes and communities in these deadly storms, and their experiences provide an authentic and relatable example for other people who must overcome a life changing tragedy. *The Other Side of Suffering* is based on behavioral research conducted by the author in the years after the hurricanes. In her research, Katie Cherry logged thousands of miles crisscrossing the Louisiana coastline and spoke with over 190 current and former coastal residents with catastrophic losses after Katrina. The author begins with an overview of the human

impact of these disasters, and then focuses on the community impact on two coastal parishes in southern Louisiana. The incorporation of the personal journal entries of a Katrina survivor provides an intimate glimpse into the long days and months that over a million displaced Gulf Coast residences experienced. From this research, the author identifies six evidence-based principles of healing: faith and humor, respect and gratitude, and acceptance and silver linings. Colorful illustrations and direct quotes from the respondents bring these principles to life.

Along with a path to healing, the book also discusses grief and the new normal after a disaster, as well as obstacles that may thwart the healing process. Ultimately, the work emphasizes the importance of recovering daily routines and observances as life goes on after disaster.

Headcase is a groundbreaking collection of personal reflections and artistic representations illustrating the intersection of mental wellness, illness, and LGBTQ identity, as well as the lasting impact of historical views equating queer and trans identity with mental illness. The pieces offer personal views from both providers and clients, often one

and the same, about their experiences. In the anthology, readers will access the inner thoughts of an array of individuals, including: a therapist with dual status who also happens to be transgender and practicing in the Midwest; a lesbian writer and psychotherapist recounting her mother's experience with forced institutionalization, shock therapy, and "conversion therapy" in the 1950s; a queer illustrator presenting unique glyph illustrations that represent a panoply of identity-related questions and answers; an award-winning gay male writer discussing his struggle with depression publicly for the first time;

and a trans activist of color writing about surviving madness in the inner city and how his community of mental health and social justice youth activists help each other thrive. Several contributors also document the difficulty of navigating flawed health care systems that limit affordable access to genuinely affirming, effective services. Cultural norms and barriers to accessibility have an enormous impact on the quality of care available to LGBTQ communities. Traversing boundaries of race and ethnic identity, age, gender identity, and socioeconomic status, *Headcase* should appeal to LGBTQ communities and, specifically, LGBTQ mental health consumers and their

friends, families, and comrades.

“ Your heart will be altered

Boyle, S.J., New York Times
bestselling author of Tattoos
on the Heart Liz Hauck and
her dad had a plan to start a
weekly cooking program in a
residential home for teenage
boys in state care, which was

run by the human services
agency he co-directed. When
her father died before they
had a chance to get the project
started, Liz decided she would
try it without him. She
didn ' t know what to expect
from volunteering with court-
involved youth, but as a high
school teacher she knew that
teenagers are drawn to food-
related activities, and as a
daughter, she believed that if
she and the kids made even a
single dinner together she
could check one box off her
father ' s long, unfinished to-
do list. This is the story of
what happened around the
table, and how one dinner
became one hundred dinners.
“ The kids picked the menus,
I bought the groceries, ” Liz
writes, “ and we cooked and
ate dinner together for two
hours a week for nearly three
years. Sometimes
improvisation in kitchens is

disastrous. But sometimes, a combination of elements produces something spectacularly unexpected. I think that 's why, when we don ' t know what else to do, we feed our neighbors. "

Capturing the clumsy choreography of cooking with other people, this is a sharply observed story about the ways we behave when we are hungry and the conversations that happen at the intersections of flavor and memory, vulnerability and strength, grief and connection. **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SHE READS** Stories We've Heard, Stories We've Told Coda

School for the Deaf just want to hook up, pass their history finals, and have politicians, doctors, and their parents stop telling them what to do with their bodies. This revelatory novel plunges readers into the halls of a residential school for the deaf, where they ' ll meet Charlie, a rebellious transfer student who ' s never met another deaf person before; Austin, the school ' s golden boy, whose world is rocked when his baby sister is born hearing; and February, the hearing headmistress, a CODA (child of deaf adult(s)) who is fighting to keep her school open and her marriage intact, but might not be able to do both. As a series of crises both personal and political threaten to unravel each of them, Charlie, Austin, and February find their lives inextricable from one another—and

changed forever. This is a story of sign language and lip-reading, disability and civil rights, isolation and injustice, first love and loss, and, above all, great persistence, daring, and joy. Absorbing and assured, idiosyncratic and relatable, this is an unforgettable journey into the Deaf community and a universal celebration of human connection.

The Hauptvermutung is the
conjecture that any two
triangulations of a polyhedron
are combinatorially equivalent.
The conjecture was formulated
at the turn of the century, and
until its resolution was a central
problem of topology. Initially, it
was verified for low-
dimensional polyhedra, and it
might have been expected that
further development of high-
dimensional topology would
lead to a verification in all

dimensions. However, in 1961
Milnor constructed high-
dimensional polyhedra with
combinatorially inequivalent
triangulations, disproving the
Hauptvermutung in general.
These polyhedra were not
manifolds, leaving open the
Hauptvermutung for
manifolds. The development of
surgery theory led to the
disproof of the high-
dimensional manifold
Hauptvermutung in the late
1960's. Unfortunately, the
published record of the
manifold Hauptvermutung has
been incomplete, as was
forcefully pointed out by
Novikov in his lecture at the
Browder 60th birthday
conference held at Princeton in
March 1994. This volume brings
together the original 1967 papers
of Casson and Sullivan, and the
1968/1972 'Princeton notes on
the Hauptvermutung' of
Armstrong, Rourke and Cooke,
making this work physically
accessible. These papers include

several other results which have become part of the folklore but of which proofs have never been published. My own contribution is intended to serve as an introduction to the Hauptvermutung, and also to give an account of some more recent developments in the area. In preparing the original papers for publication, only minimal changes of punctuation etc.

Constructive Clinical Supervision in Counseling and Psychotherapy articulates a practical, theoretical approach to supervision that integrates salient elements of a number of diverse but complementary theoretical perspectives from the fields of human development, psychotherapy, and clinical supervision to assist in facilitating supervisee growth and change from a constructivist framework. This constructive approach to supervision is designed to serve

as a practical, integrative meta-theory for supervisors of any theoretical orientation. For readers who already identify with constructivist ideas, this book will provide a theoretical grounding for their work, along with strategies to deepen their clinical practice. For those who are new to constructivist thinking, this book offers an innovative possibility for conceptualizing their role as clinical supervisors and alternative interventions to consider during times of impasse.
