The Gospel Messenger, #1 Macmillan

In early 1968, desperate entrepreneur Donald Crowhurst was trying to sell a nautical navigation device he had developed when he saw that the Sunday Times would be sponsoring the Golden Globe Race, the first ever solo, round-the-world sailing competition. An avid amateur sailor, Crowhurst sensed a marketing opportunity and shocked the world by entering the competition using an untested trimaran of his own design. Shock soon turned to amazement when he quickly took the lead, checking in by radio message from locations far ahead of his seasoned competitors. But on July 10, 1969, roughly eight months after he had sailed from England--and less than two weeks from his expected triumphant return--his wife was informed that his boat, the Teignmouth Electron, had been discovered drifting quietly, abandoned in the middle of the Atlantic Ocean. Crowhurst was missing, assumed drowned. How did he come to such an end when his race had begun with such incredible promise? In this masterpiece of investigative journalism, Nicholas Tomalin and Ron Hall reconstruct one of the greatest modern stories of one man's descent into self-delusion, public deception, and madness. Based on in-depth interviews with Crowhurst's family and friends, combined with gripping excerpts from his logbooks that revealed (among other things) he had been falsifying his locations all along, Tomalin and Hall paint an unforgettable, haunting portrait of a complex, deeply troubled man and his final fateful journey.

Whether the life of crime - specifically, running a shoplifting ring in a middle American mall - pays? ... What causes a son to finally say enough is enough ... and decide "Today is the day I am going to kill my dad." Comedian Brandt Tobler has the answers in this funny, touching and sometimes downright unbelievable memoir of a small town Wyoming-kid turned

Dave Adams is a teenager standing at a crossroads in his life. He's lonely, a bully in need of direction. Through the pages of an ancient, leather-bound journal, Dave makes contact with an ancestor, James Adams, captain of a seventeenth century sailing-ship. Captain Adams is also straddling a fence, and the life of an honest sea-going merchant pales in comparison to the excitement and opportunities available for a captain willing to do what it takes to get ahead. Will the captain's decisions take him and his crew where they want to go? And how will those decisions affect Dave as he makes his way through high school and finds his first summer job? *Pirate Journey* explores the parallel lives of a scurvy sea captain and a high school bully as they make decisions and face the consequences of their choices, both good and bad.

A New York Times Notable Book for 2011 A Library Journal Top Ten Best Books of 2011 A Boston Globe Best Nonfiction Book of 2011 Bestselling author Tony Horwitz tells the electrifying tale of the daring insurrection that put America on the path to bloody war. Plotted in secret, launched in the dark, John Brown's raid on Harpers Ferry was a pivotal moment in U.S. history. But few Americans know the true story of the men and women who launched a desperate strike at the slaveholding South. Now, *Midnight Rising* portrays Brown's uprising in vivid color, revealing a country on the brink of explosive conflict. Brown, the descendant of New England Puritans, saw slavery as a sin against America's founding principles. Unlike most abolitionists, he was willing to take up arms, and in 1859 he prepared for battle at a hideout in Maryland, joined by his teenage daughter, three of his sons, and a guerrilla band that included former slaves and a dashing spy. On October 17, the raiders seized Harpers Ferry, stunning the nation and prompting a counterattack led by Robert E. Lee. After Brown's capture, his defiant eloquence galvanized the North and appalled the South, which considered Brown a terrorist. The raid also helped elect Abraham Lincoln, who later began to fulfill Brown's dream with the Emancipation Proclamation, a measure he called "a John Brown raid, on a gigantic scale." Tony Horwitz's riveting book travels antebellum America to deliver both a taut historical drama and a telling portrait of a nation divided—a time that still resonates in ours.

Brother XII Tyndale House Publishers, Inc. Imagine what it would be like to go back in time to the 15th century Venice. And imagine what it would be like to meet your lifelong hero, Michelangelo. And imagine what it would be like if, on first meeting, you spill a tray of pasta and wine on that very same hero. Well, that's what happens to serious young artist Mark Breen. As the result of a drunken bet, Mark knocks out a painting of a toilet bowl. Much to his amazement, he sells it. In short order he's hailed as the new Andy Warhol and becomes an overnight sensation—and a very wealthy man. Soon, images of his toilet bowls are on more t-shirts, mugs, and calendars than Edvard Munch's *The Scream*. His friend and mentor, Hugh Connelly, afraid that Mark is in danger of losing his "artistic soul," advises him to go back to Italy and reacquaint himself with the "old masters." In Venice, Mark falls in love with Alexandra, a beautiful art restorer, but it's a one-sided affair. One night, hoping to win her over, he climbs up on a roof to find out who painted her favorite fresco. He falls off the roof and wakes up in 15th century Venice where he meets an innkeeper named Francesca, who looks exactly like Alexandra. And it gets curiouser and curiouser from there. During his stay—which is sometimes zany and sometimes frightening—he meets his hero, Michelangelo, who teaches him the true meaning of art.

In an exhilarating tale of historic adventure, the Pulitzer Prize-winning author of *Confederates in the Attic* retraces the voyages of Captain James Cook, the Yorkshire farm boy who drew the map of the modern world. Captain James Cook's three epic journeys in the 18th century were the last great voyages of discovery. His ships sailed 150,000 miles, from the Arctic to the Antarctic, from Tasmania to Oregon, from Easter Island to Siberia. When Cook set off for the Pacific in 1768, a third of the globe remained blank. By the time he died in Hawaii in 1779, the map of the world was substantially complete. Tony Horwitz vividly recounts Cook's voyages and the exotic scenes the captain encountered: tropical orgies, taboo rituals, cannibal feasts, human sacrifice. He also relives Cook's adventures by following in the captain's wake to places such as Tahiti, Savage Island, and the Great Barrier Reef to discover Cook's embattled legacy in the present day. Signing on as a working crewman aboard a replica of Cook's vessel, Horwitz experiences the thrill and terror of sailing a tall ship. He also explores Cook the man: an impoverished farmboy who broke through the barriers of his class and time to become the greatest navigator in British history. By turns harrowing and hilarious, insightful and entertaining, *BLUE LATITUDES* brings to life a man whose voyages helped create the 'global village' we know today.

Scottish novelist David Lindsay (1876-1945) was born to a middle-class Calvinist family, forced by poverty to work as an insurance clerk instead of attending university, and at the age of forty took up the cause and worked his way to Corporal of the Royal Army Pay Corps in World War I. After the war he moved to Cornwall with his wife and began writing full-time, publishing his first novel, "A Voyage to Arcturus," in 1920. Although the science fiction novel initially sold less than six hundred copies, it has come to be known as a major "underground" novel of the 20th century, and heavily influenced C.S. Lewis's "Out of the Silent Planet." The story is set at Tormance, an imaginary planet orbiting Arcturus, where an adventurous Scot named Muskall has travelled and where he encounters myriad characters and lands that reflect Lindsay's critique of various philosophical systems.

Voyage with the Vikings Knowthis Media
'A lovely debut from a gifted young author. Violet Moller brings to life the ways in which knowledge reached us from antiquity to the present day in a book that is as delightful as it is readable.'
Peter Frankopan, author of *The Silk Roads* In *The Map of Knowledge* Violet Moller traces the journey taken by the ideas of three of the greatest scientists of antiquity - Euclid, Galen and Ptolemy - through seven cities and over a thousand years. In it, we follow them from sixth-century Alexandria to ninth-century Baghdad, from Muslim Cordoba to Catholic Toledo, from Salerno's medieval medical school to Palermo, capital of Sicily's vibrant mix of cultures, and - finally - to Venice, where that great merchant city's printing presses would enable Euclid's geometry, Ptolemy's system of the stars and Galen's vast body of writings on medicine to spread even more widely. In tracing these fragile strands of knowledge from century to century, from east to west and north to south, Moller also reveals the web of connections between the Islamic world and Christendom, connections that would both preserve and transform astronomy, mathematics and medicine from the early Middle Ages to the Renaissance. Vividly told and with a dazzling cast of characters, *The Map of Knowledge* is an evocative, nuanced and vibrant account of our common intellectual heritage. 'An endlessly fascinating book, rich in detail, capacious and humane in vision.' Stephen Greenblatt, author of *The Swerve: How the World Became Modern*

Published to coincide with the Golden Globe Race's 50th Anniversary It lay like a gauntlet thrown down; to sail around the world alone and non-stop. No one had ever done it, no one knew if it could be done. In 1968, nine men - six Englishmen, two Frenchmen and an Italian - set out to try, a race born of coincidence of their timing. One didn't even know how to sail. They had more in common with Captain Cook or Ferdinand Magellan than with the high-tech, extreme sailors of today, a mere forty years later. It was not the sea or the weather that determined the nature of their voyages but the men they were, and they were as different from one another as Scott from Amundsen. Only one of the nine crossed the finishing line after ten months at sea. The rest encountered despair, sublimity, madness and even death.

New England erupted into a bloody conflict that nearly wiped out the English colonists and natives alike. These events shaped the existing communities and the country that would grow from them.

*Includes a table of contents "I just want to go through Central Park and watch folks passing by. Spend the whole day watching people. I miss that." - Barack Obama Of all the great cities in the world, few personify their country like New York City. As America's largest city and best known immigration gateway into the country, the Big Apple represents the beauty,

diversity and sheer strength of the United States, a global financial center that has enticed people chasing the "American Dream" for centuries. Given that background, it's fitting that the city's most unique landmark, Central Park, sits at the heart of Manhattan and provides a stark contrast to the hustle and bustle surrounding it. As actor Haley Joel Osment once put it, "My favorite place is Central Park because you never know what you're going to find there. I also like that when I look out the windows of surrounding hotels, it's seems like I'm looking out over a forest." In 1811, an ambitious plan was laid out that would transform Manhattan's grid into 2,028 blocks, from Houston Street to 155th Street. Forests would be cut down, hills razed, ponds and streams filled. It took years to survey, and years to complete: at different points in time, one might have seen a long avenue laid out, unpaved, with a scattering of as-yet-unattached six-story buildings amid boulders yet to be cleared and soon-to-be-demolished shantytowns. Ironically, almost no parks were incorporated into the plan, and Central Park would not be built until the end of the 19th century. When Central Park was designed, however, it was an ambitious project on an almost unprecedented affair. As serene as Central Park is today, it's hard to imagine that its creation was an entirely manmade affair consisting of dynamite blasts, tons of imported topsoil, and the labor of thousands of workers. Before the area's transformation, the land was swampy terrain used by impoverished squatters and people who let their livestock roam the grounds, but after nearly 15 years of work, the metamorphosis was nearly complete. Of course, New Yorkers soon came to understand that such a large park required serious upkeep; as historian Robert Caro noted, "Lawns, unseeded, were expanses of bare earth, decorated with scraggly patches of grass and weeds, that became dust holes in dry weather and mud holes in wet...The once beautiful Mall looked like a scene of a wild party the morning after. Benches lay on their backs, their legs jabbing at the sky..." With city resources being pumped into maintaining Central Park, it has become the most visited urban park in the world, and it is a cultural touchstone that draws not only tourists but events. Locals commonly walk or run through the park, and others play sports or simply picnic, but Central Park is also home to monuments of all sorts, including statues dedicated to artists and playwrights, the Strawberry Fields tribute to John Lennon, and an Ancient Egyptian obelisk known colloquially as Cleopatra's Needle. On top of all that, Central Park has a diverse array of wildlife thanks to a sizable reservoir, over 1,000 different species of trees, a zoo, and more. Put simply, Central Park is the most unique place in one of America's most unique cities. Central Park: The History of New York City's Most Unique Landmark chronicles the construction and history of the Big Apple's most famous park. Along with pictures of

important people, places, and events, you will learn about Central Park like never before, in no time at all.
