"Remember the Maine, to Hell with Spain!" The USS Maine is one of the most famous ships in American history, but for all the wrong reasons. A symbol of naval strength in the late 19th century, the Maine's tragic fate is taught to students across the nation, not just because it was a disaster but because it is associated with the most notorious examples of yellow journalism in the country's history and ultimately brought about a war, despite the fact it's still unclear what caused the ship's explosion. In 1898, one of Spain's last possessions in the New World, Cuba, was waging a war for independence against Spain. Though Cuba was technically exempted from the United States' Monroe Doctrine since Cuba was already a possession of Spain when the Monroe Doctrine was issued, many Americans believed that the United States should side with Cuba against Spain. At the same time, however, President William McKinley wanted to avoid getting tangled in a war between outsiders, while Spain also wanted to avoid any conflict with United States and its powerful navy. Despite leaders hoping to stay above the fray, American economic interests were being harmed by the ongoing conflict between Cuban nationalists and Spain, as merchants' trading with Cuba was suffering now that the island was undergoing conflict. Furthermore, the American press capitalized on the ongoing Cuban struggle for independence, which had been flaring up time and again since 1868. In an effort to sell papers, the press frequently sensationalized stories, which came to be known as yellow journalism, and during the run-up to war, yellow journalism spread false stories about the Cuban conflict in order to

sell newspapers in the competitive New York City market. Despite President McKinley's wishes to avoid a war, he was forced to support a war with Spain after the USS Maine suffered an explosion in Havana's harbor in February 1898. McKinley had sent the ship to help protect American citizens in Cuba from the violence that was taking place there, but the explosion devastated the USS Maine, which had to be towed to harbor and eventually scuttled, but only after 266 American sailors aboard the ship were killed. Although the cause of the explosion was never determined, yellow journalists in the American press blamed Spain, claiming the USS Maine was sabotaged. President McKinley was unable to resist popular pressure after a U.S. Navy report also claimed that the ship had been subjected to an explosion outside of its hull, which subsequently ignited its powder magazines inside the ship. Later investigations proved inconclusive, but President McKinley was now forced to accept war with Spain, bringing about the Spanish-American War. The Explosion of the USS Maine chronicles the controversial explosion, tracing the history of the ship from its glorious beginning to its ignominious end, as well as the critical aftermath. Along with pictures of important people, places, and events, you will learn about the USS Maine like never before, in no time at all.

Although humble in their function, these carefully crafted barns have shaped the lives of Mainers for centuries. Built long before the days of plastic and plywood, the barns have survived for generations, each with a story to tell. In Bridgton, one barn offered comfort to a sixteen-year-old boy when his father was injured. Another New Gloucester barn was so important to one family that its likeness was engraved on their headstones. Some owners said they would rather see their houses burn than their barns, and others have dedicated their lives and livelihoods to restoring and preserving these buildings. From modest English to grand Victorian, Don Perkins examines the structures, origins and evolution of Maine's barns, demonstrating the vital and precious role they play in people's lives.

In this critically acclaimed Maine classic, first published in 1945, Helen Hamlin writes of her adventures teaching school at a remote Maine lumber camp and then of living deep in the Maine wilderness with her game warden husband. Her experiences are a must-read for anyone who loves the untamed nature and wondrous beauty of Maine's north woods and the unique spirit of those who lived there. In the 1930s, in spite of being warned that remote Churchill Depot was "no place for a woman," the remarkable Helen Hamlin set off at age twenty to teach school at the isolated

lumber camp at the headwaters of the Allagash River. She eventually married a game warden and moved deeper into the wilderness. In her book, Hamlin captures that time in her life, complete with the trappers, foresters, lumbermen, woods folk, wild animals, and natural splendor that she found at Umsaskis Lake and then at Nine Mile Bridge on the St. John River.

An award-winning, much-loved biologist turns his gaze on himself, using his long-distance running to illuminate the changes to a human body over a lifetime Part memoir, part scientific investigation, Racing the Clock is the book biologist and natural historian Bernd Heinrich has been waiting his entire life to write. A dedicated and accomplished marathon (and ultra-marathon) runner who won his first marathon at age thirty-nine, Heinrich looks deeply at running, aging, and the body, exploring the unresolved relationship between metabolism, diet, exercise, and age. Why do some bodies age differently than others? How much control do we have over that process and what effect, if any, does being active have? Bringing to bear research from his entire career and in the spirit of his classic Why We Run, Heinrich probes the questions of how we use energy and continue to adapt to our mutable surroundings and circumstances. Beyond that, he examines how our bodies change while we age but also how we can work with, if not overcome, many of these changes—and what all this tells us about evolution and the mechanisms of life, health, and happiness. Racing the Clock offers fascinating and surprising conclusions, all while bringing the reader along on Heinrich's compelling journey to what he says will be his final race—a fifty-kilometer race at age eighty.

Based on the true account of a boy's harrowing journey through the vast wilderness of the Katahdin Mountains, Lost on a Mountain in Maine is a gripping survival story for all ages. Twelve-year-old Donn Fendler steps away from his Boy Scout troop for only a minute, but in the foggy mountains of Maine, a minute is all it takes. After hours of trying to find his way back, a nervous and tired Donn falls down an embankment, making it impossible for him to be found. One sleepless night goes by, followed by a second . . . and before Donn knows it, almost two weeks have passed, leaving him starving, scared, and delirious. With rainstorms, black bears, and his fear of being lost forever, Donn's journey is a physically, mentally, and emotionally charged story told from the point of view of the boy who lived it. Don't miss this thrilling survival story, a proven high-interest winner that pulls in readers the way Hatchet, My Side of the Mountain, and the I Survived books do.

This breakout New York Times bestseller from the celebrated author of Commencement and The Engagements, introduces four unforgettable women and the abiding, often irrational love that keeps them coming back, every summer, to Maine and to each other. For the Kellehers, Maine is a place where children run in packs, showers are taken outdoors, and old Irish songs are sung around a piano. As three generations of Kelleher women arrive at the family's beach house, each brings her own hopes and fears. Maggie is thirty-two and pregnant, waiting for the perfect moment to tell her imperfect boyfriend the news; Ann Marie, a Kelleher by marriage, is channeling her domestic frustration into a dollhouse obsession and an ill-advised crush; Kathleen, the black sheep, never wanted to set foot in the cottage again; and Alice, the matriarch at the center of it all, would trade
