### Accounting Information Systems Arden Shakespeare

This book contains a collection of research papers on accounting information systems including their strategic role in decision processes, within and between companies. An accounting system is a complex system composed of a mix of strictly interrelated elements such as data, information, human resources, IT tool, accounting models and procedures. Accounting information systems are often considered the instrument by default for accounting automation. This book aims to sketch a clear picture of the current state of AIS research, including design, acceptance

and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance. The book will be of interest to financial and managerial accountants and IT/IS practitioners, including information systems managers and consultants.

Hurt's Accounting Information Systems, 2e continues to take a fresh new approach that puts judgment and critical thinking, not technology, at the heart of the AIS course. Using a conversational writing style appealing to students, this book presents AIS as an art as much as a science. AIS is presented as a set of fundamental ideas and concepts that can be applied in various organisational contexts. Students are provided with vocabulary they will need to succeed in the profession and ensuring that they can communicate clearly and effectively about accounting information systems with both accountants and nonaccountants. The text end-of-chapter exercises and assessment tools are all competency-based, distilling knowledge to its
