Named one of Vogue 's " Most Anticipated Books of 2019 " This is a manifesto for the 99 percent Unaffordable housing, poverty wages, inadequate healthcare, border policing, climate change—these are not what you ordinarily hear feminists talking about. But aren ' t they the biggest issues for the vast majority of women around the globe? Taking as its inspiration the new wave of feminist militancy that has erupted globally, this manifesto makes a simple but powerful case: feminism shouldn ' t start—or stop—with the drive to have women represented at the top of their professions. Few discussions in modern social science have occupied as much attention as the changing nature of welfare states in western societies. Gosta Esping-Andersen, one of the most distinguished contributors to current debates on this issue, here provides a new analysis of the character and role of welfare states in the functioning of contemporary advanced western societies. Esping-Andersen distinguishes several major types of welfare state, connecting these with variations in the historical development of different western countries. Current economic processes, the author argues, such as those moving towards a post-industrial order, are not shaped by autonomous market forces but by the nature of states and state differences. Fully informed by comparative materials, this book will have great appeal to

everyone working on issues of economic development and post-industrialism. Its audience will include students and academics in sociology, economics and politics.

The Jewish Educational Leader's Handbook Policy Press

This book examines the epistemological, political, and socio-economic consequences of the Fourth Industrial Revolution (4IR) for Africa. Presenting various case studies on epistemic freedom, theology, race and robotics, tertiary education, political and economic transformation, human capital, and governance, it debates whether the 4IR will be part of the solution to the African problem, namely that of coloniality in its various forms. Solving the African problem using the 4IR requires ethical, just and epistemologically independent leadership. However, the lack of ICT infrastructure militates against Africa ' s endeavours to make the 4IR a problem-solving moment. To its credit, Africa possesses some of the major capital needed (human,

mineral, and social), and it constitutes a huge market comprising a young population eager to participate in the 4IR as problem-solvers and not as a problem to be solved—as equal citizens and not as the marginalized other.
