Honeyball and Bowers' Textbook on Employment Law is an approach to employment law with strong critical analysis whilst placing it in its wider contexts, in a concise and user-friendly format. Fully updated to take into account the recent significant developments in this area, including the Equality Act 2010, the key topics on most employment law courses are addressed in detail. An extremely clear writing style allows this text to remain accessible and student-focussed, while providing detailed explanations and analysis of the law. The text also includes diagrams and chapter summaries throughout to aid student understanding, while further reading suggestions assist with essaypreparation and research. Setting employment law in context, this book considers both industrial and collective issues as well as examining the increasing role of the EU in UK employment law. A separate chapter on human rights also enables students to understand the role human rights legislation plays in the development of employment law. This book also contains cross referencing to Painter & Holmes' Cases & Materials on Employment Law, ensuring that these two texts continue to complement one another and provide the perfect combination of textbook analysis and the most up-to-date cases and materials. This text is accompanied by a free Online Resource Centre (www.oxfordtextbooks.co.uk/orc/honeyball12e/) which contains updates to the law and useful weblinks.

Over two hundred and thirty years ago the Fallocaust happened, killing almost everything that lived and creating what is now known as the greywastes. A dead wasteland where cannibalism is a necessity, death your reality, and life before the radiation nothing but pictures in dog-eared magazines. Reaver is a greywaster, living in a small block controlled by a distant ruler said to have started the Fallocaust. He is a product of the savage world he was raised in and prides himself on being cold and cruel. Then someone new to his town catches his eye, someone different than everyone else. Without knowing why he starts to silently stalk him, unaware of where it will lead him.

"This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries. Its starting point is the striking variation in African economic performance. Unevenness and inequalities form a central fact of African economic experiences. The authors highlight not only differences between countries, but also variations within countries, differences often organized around distinctions of gender, class, and ethnic identity. For example, neo-natal mortality and school dropout have been reduced, particularly for some classes of women in some areas of Africa. Horticultural and agribusiness exports have grown far more rapidly in some countries than in others. These variations (and many others) point to opportunities for changing performance, reducing inequalities, learning from other policy experiences, and escaping the ties of structure, and the legacies of a colonial past. The book rejects teleological illusions and Eurocentric prejudice, but it does pay close attention to the results of policy in more industrialized parts of the world. Seeing the contradictions of capitalism for what they are - fundamental and enduring - may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth, linear process, or that it would be were certain impediments suddenly removed. The authors criticize a wide range of orthodox and heterodox economists, especially for their cavalier attitude to evidence. Drawing on their own decades of research and policy experience, they combine careful use of available evidence from a range of African countries with political economy insights (mainly derived from Kalecki, Kaldor and Hischman) to make the policy case for specific types of public sector investment"--

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, In Battle for Peace frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, In Battle for Peace remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.

Networks of Modernity: Germany in the Age of the Telegraph, 1830-1880 offers a fresh perspective on the history of Germany by investigating the origins and impact of the

'communications revolution' that transformed state and society during the nineteenth century. It focuses upon the period 1830-1880, exploring the interactions between the many different actors who developed, administered, and used one of the most important technologies of the period-the electric telegraph. It reveals the channels through which scientific and technical knowledge circulated across Central Europe during the 1830s and 1840s, stimulating both collaboration and confrontation between the scientists, technicians, businessmen, and bureaucrats involved in bringing the telegraph to life. It highlights the technology's impact upon the conduct of trade, finance, news distribution, and government in the tumultuous decades that witnessed the 1848 revolutions, the wars of unification, and the establishment of the Kaiserreich in 1871. Following the telegraph lines themselves, it weaves together the changes which took place at a local, regional, national, and eventually global level, revisiting the technology's impact upon concepts of space and time, and highlighting the importance of this period in laying the foundations for Germany's experience of a profoundly ambiguous, networked modernity.

This is a comprehensive, up-to-date clinical textbook on the bioeffects and safety of diagnostic ultrasound in obstetrics. It is an authoritative and detailed work, but free of technical jargon and formulas. In thirteen chapters by respected authorities from the United States, England, and Australia, it presents a well defined, logical progression of clinically relevant information beginning with a description of the ultrasound output of modern equipment. It describes the biological effects that can be produced, including the effects of ultrasound exposure on fetal development, sensitivity to diagnostic ultrasound, cavitation produced by diagnostic pulses, echocontrast agents, and acoustic streaming and radiation pressure in diagnostic applications. It also analyzes the latest clinical risk-benefit studies, cost effectiveness, and safety regulations, recommendations, and guidelines. It is unquestionably today's definitive textbook authority on safety in diagnostic ultrasound. In cludes bibliographic references and index.
