"[This book] offers easy-to-use, quick tips that will benefit a great number of nurses. Critical care nurses often need help with ventilator modes and types of usage and this book is a great resource."Score: 96, 4 Stars.--Doody's Medical Reviews The only book written about mechanical ventilation by nurses for nurses, this text fills a void in addressing high-level patient care and management specific to critical care nurses. Designed for use by practicing nurses, nursing students, and nursing educators, it provides a detailed, step-by-step approach to developing expertise in this challenging area of practice. The guide is grounded in evidence-based research and explains complex concepts in a user-friendly format along with useful tips for daily practice. It has been written based on the authors' many years of teaching students at all levels of critical care as well as their experience in mentoring novice and experienced nurses in the critical care arena. Emphasizing the nurse's role in mechanical ventilation, the book offers many features that facilitate in-depth learning. These include bulleted points to simplify complex ideas, learning objectives, key points summarized for speedy reference, learning activities, a case study in each chapter with questions for reflection, clinical "pearls," references for additional study, and a glossary. A digital companion includes cue cards summarizing challenging practice concepts and how-to procedural videos. The book addresses the needs of both adult critical care patients and geriatric critical care patients. A chapter on International Perspectives addresses the similarities and differences in critical care throughout the globe. Also covered are pharmacology protocols for the mechanically ventilated patient. Additionally, the book serves as a valuable resource for nurses preparing for national certification in critical care. Key Features: Written by nurses for nurses Provides theoretical and practical, step-by-step information about mechanical ventilation for practicing nurses, students, and educators Comprises a valuable resources for the orientation of nurses new to critical care Contains chapters on international perspectives in critical care and pharmacology protocols for the mechanically ventilated patient

The IWA Performance Indicator System for water services is now recognized as a worldwide reference. Since it first appearance in 2000, the system has been widely quoted, adapted and used in a large number of projects both for internal performance assessment and metric benchmarking. Water professionals have benefited from a coherent and flexible system, with precise and detailed definitions that in many cases have become a standard. The system has proven to be adaptable and it has been used in very different contexts for diverse purposes. The Performance Indicators System can be used in any organization regardless of its size, nature (public, private, etc.) or degree of complexity and development. The third edition of Performance Indicators for Water Supply Services represents a further improvement of the original manual. It contains a reviewed and consolidated version of the indicators, resulting from the real needs of water companies worldwide that were expressed during the extensive field testing of the original system. The indicators now properly cover bulk distribution and the needs of developing countries, and all definitions have been thoroughly revised. The confidence grading scheme has been simplified and the procedure to assess the results- uncertainty has been significantly enhanced. In addition to the updated contents of the original edition, a large part of the manual is now devoted to the practical application of the system. Complete with simplified step-by-step implementation procedures and case studies, the manual provides guidelines on how to adapt the IWA concepts and indicators to specific contexts and objectives. This new edition of Performance Indicators for Water Supply Services is an invaluable reference source for all those concerned with managing the performance of the water supply industry, including those in the water utilities as well as regulators, policy-makers and financial agencies.
