From an economist who warned of the global financial crisis, a new warning about the continuing peril to the world economy Raghuram Rajan was one of the few economists who warned of the global financial crisis before it hit. Now, as the world struggles to recover, it's tempting to blame what happened on just a few greedy bankers who took irrational risks and left the rest of us to foot the bill. In *Fault Lines*, Rajan argues that serious flaws in the economy are also to blame, and warns that a potentially more devastating crisis awaits us if they aren't fixed. Rajan shows how the individual choices that collectively brought about the economic meltdown—made by bankers, government officials, and ordinary homeowners—were rational responses to a flawed global financial order in which the incentives to take on risk are incredibly out of step with the dangers those risks pose. He traces the deepening fault lines in a world overly dependent on the indebted American consumer to power global economic growth and stave off global downturns. He exposes a system where America's growing inequality and thin social safety net create tremendous political pressure to encourage easy credit and keep job creation robust, no matter what the consequences to the economy's long-term

---

health; and where the U.S. financial sector, with its skewed incentives, is the critical but unstable link between an overstimulated America and an underconsuming world. In *Fault Lines*, Rajan demonstrates how unequal access to education and health care in the United States puts us all in deeper financial peril, even as the economic choices of countries like Germany, Japan, and China place an undue burden on America to get its policies

right. He outlines the hard choices we need to make to ensure a more stable world economy and restore lasting prosperity.

Love—only a four letter word, yet it's so powerful that it can conquer anything in this world! We've all experienced the first flush of love and remember the lingering fragrance of it. For ages Love has remained one of the most cherished experiences that everyone wishes to

---

live through at least once. Humanity, time and again, has coined many definitions to describe this beautiful emotion, but this small word is a feeling that can't simply be defined. It has to be narrated . . . in the form of stories—love stories. Love Stories That Touched My Heart is a collection of such stories from readers who have a tale to tell, shortlisted from over 2000 entries that were submitted in a competition conducted by Penguin India.

Selected and edited by Ravinder Singh, this anthology—made up of the stories that touched Ravin's heart—the most—will make you believe that someone, somewhere, is made for you.

The fear of the unknown bothers most of us, even if it comes at the cost of chasing our dreams. How many of

us want to drop everything that we are doing and travel the world? How many of us do? Neeraj Narayanan just did that, quitting his job one day and flying to Barcelona. Join him on his journey as he takes you rollicking across some countries in Europe and South East Asia, motoring up high mountain passes, hiding in

jungles and being part of crazy festivals, hoping to find pretty girls in pursuit but only ending up with furious bulls, bears, and gypsies on his tail. At some point, he has almost no money left but his resolve to build a life out of travel doesn't ebb. This is a witty yet heart-warming tale of one man's solo

*Problems in General Physics* Simon and Schuster Advanced Problems in Physical Chemistry has been conceived to meet the specific requirements of the students preparing for IIT-JEE, Olympiad and other competitive examinations. This book provides a comprehensive and systematic coverage of problems in

physical chemistry and enables quick applications of concepts through numerous problems provided in each chapter. The problems are graded as per JEE Main and Advanced respectively. The best way to ensure that students understand the concepts of physical chemistry is to solve as many problems on each

topic. This book is a must-have resource for candidates preparing for JEE Main and Advanced exams.

becoming intelligent was to become painfully ignorant of the difference between good and evil. Adi, a 10-year-old boy, works together with two old philosophers as they try to unravel the prophecy of a promised King. With insatiable curiosity, Adi must work with the wise men as they rationalize with each other on why and how humans became intelligent. Together they attempt to answer some of the most profound questions related to existence.

Does evolution end with consciousness in a machine. Krish soon realizes that he has a bigger fight on his hands. A fight to preserve love in a desolate world. His quest for true love ultimately leads him down a path where he comes face to face with a fearsome snake delivering a kiss of death. Humans have come a long way by questioning the nature of objects around us and pushing the limits of our intelligence, but it's now time that we ask the greatest

there an 'Overman' who can reach evolution's pinnacle? Will this Overman be able to define values for humankind?
