Since the time the IIT-JEE started, the  
examination scheme and methodology have  
witnessed many a change. From the lengthy  
subjective problems of 1950s to the matrix match  
type questions of the present day, the paper-  
setting pattern and approach have changed. A  
variety of questions have been framed to test an  
aspirant's calibre, aptitude, and attitude for  
engineering field and profession. Across all  
these years, however, there is one thing that  
has not changed about the IIT-JEE, i.e., its  
objective of testing an aspirant's grasp and  
understanding of the concepts of the subjects of  
study and their applicability at the grass-root  
level. This series of books is an attempt at  
coming face to face with the latest IIT-JEE  
pattern in its own format, which is going to be  
highly advantageous to an aspirant for securing  
a good rank. This series of books features all  
types of problems asked in the examination be it  
MCQs (one or more than one correct), assertion  
reason type, matrix match type, or paragraph-  
based, thought-type questions. Not discounting  
to need for skilled and guided practice, the  
material in the book has been enriched with a  
large number of fully solved concept-application  
exercises so that every step in learning is  
ensured for the understanding and application of  
the subject.
